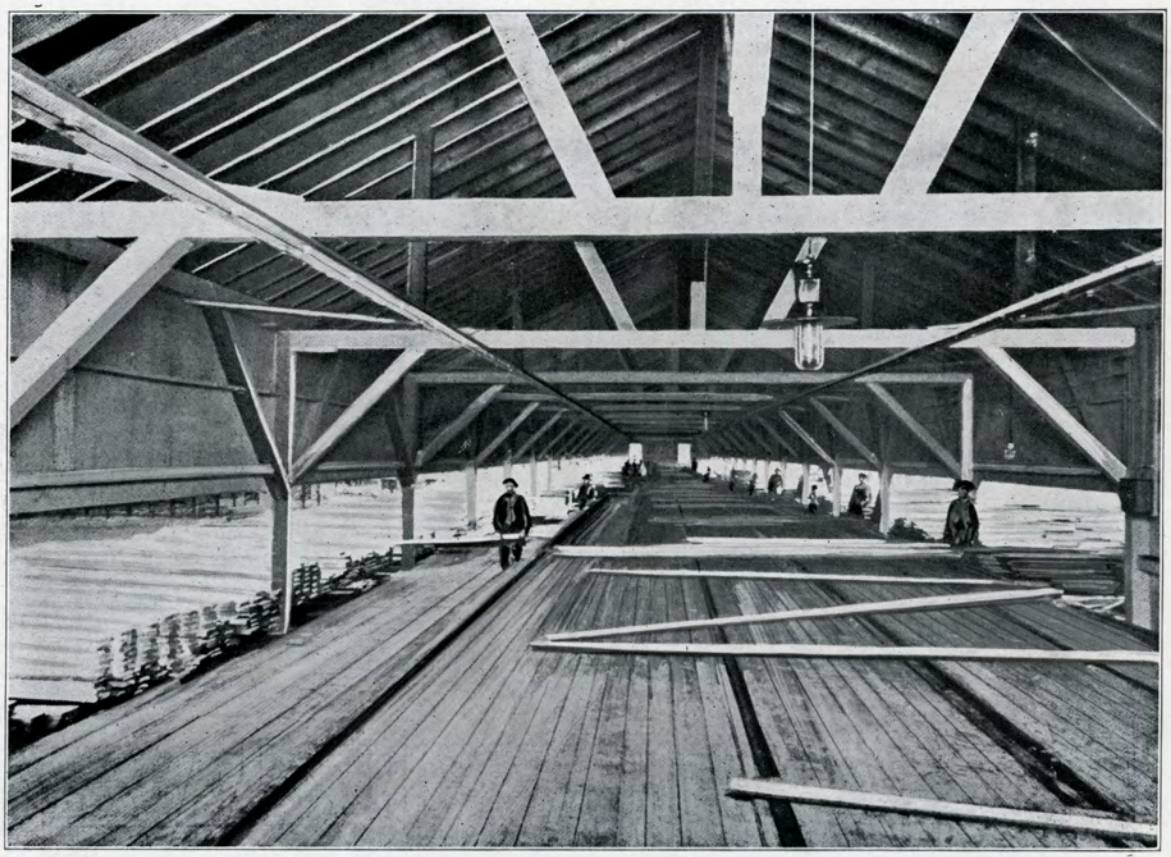
LUFKIN FOUNDRY & MACHINE COMPANY
LUFKIN

LUMBER ASSORTING MACHINERY



ASSORTING SHED

We design Sorters of every description—Edge Sorters, Drop Sorters, arranged to handle lumber to yards by overhead trolly, dollys, by hand, mules or roll-off wagons, as used in "ground" yards.

PLAIN LUMBER SORTER

made any width or length to suit conditions. The drive can be arranged to stop and start if desired. Let us know your requirements.

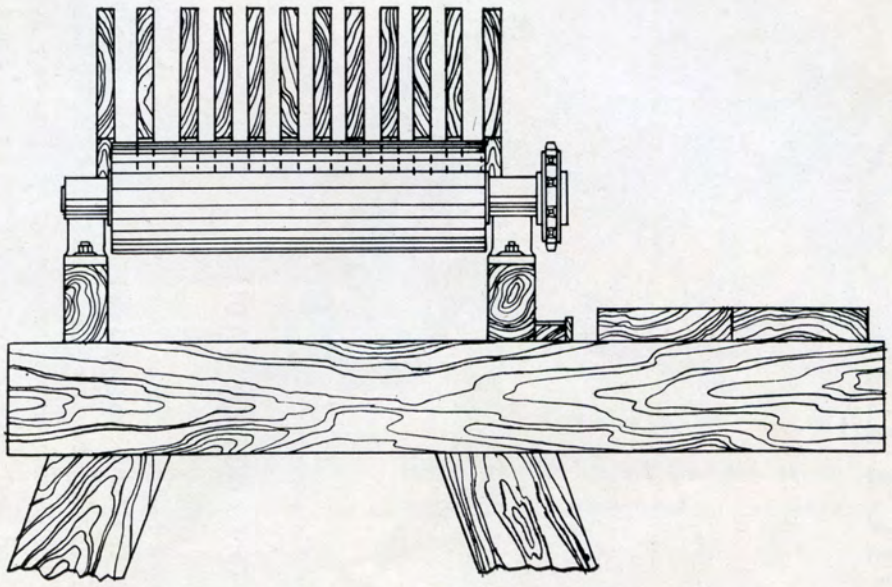
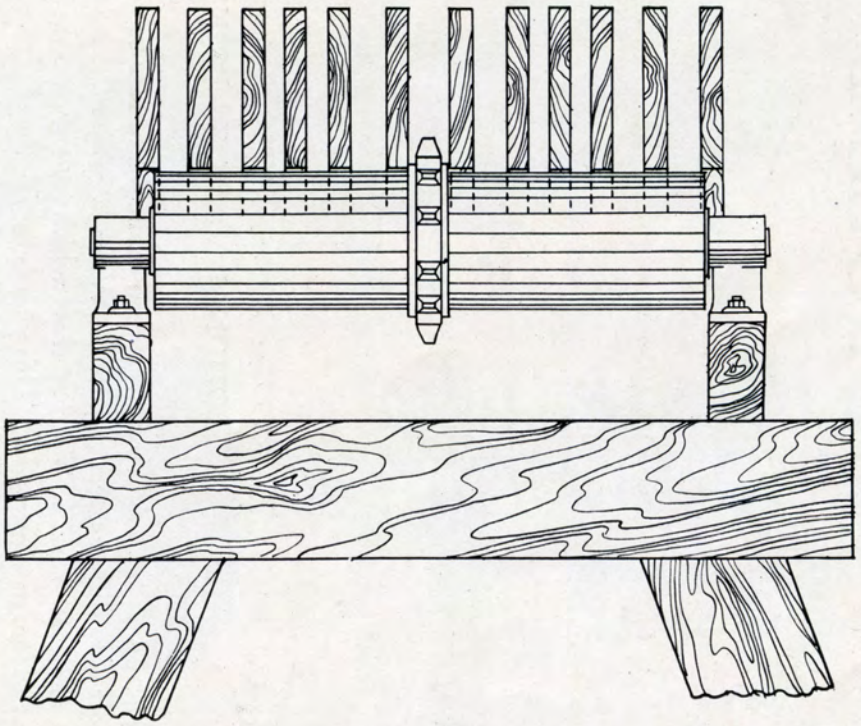
SINGLE ROLL EDGE SORTER



Lumber to drop one side only. Driven by gears or sprockets and chain.

DOUBLE EDGE SORTER



Driven by chain arranged to drop lumber on both sides.

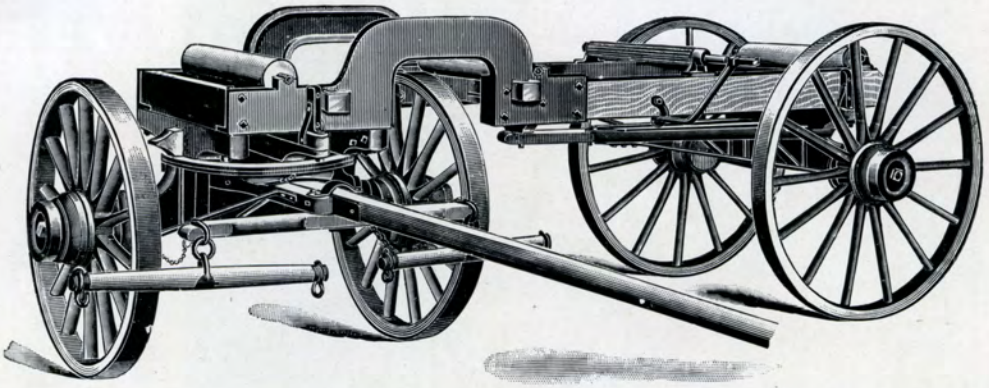
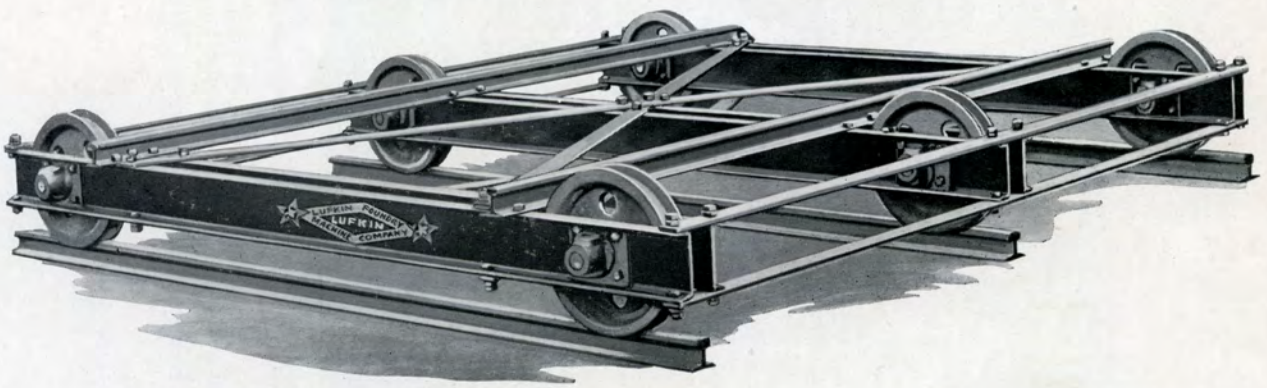
ROLL-OFF WAGON

For Ground Yards

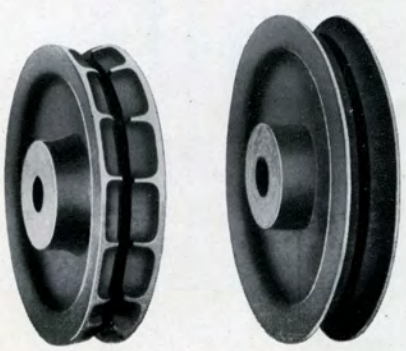


This Wagon is used in connection with Sorter shown on preceding page. They are especially made for this service. High side-boards are used, but for convenience are not shown.

TRANSFER CARS



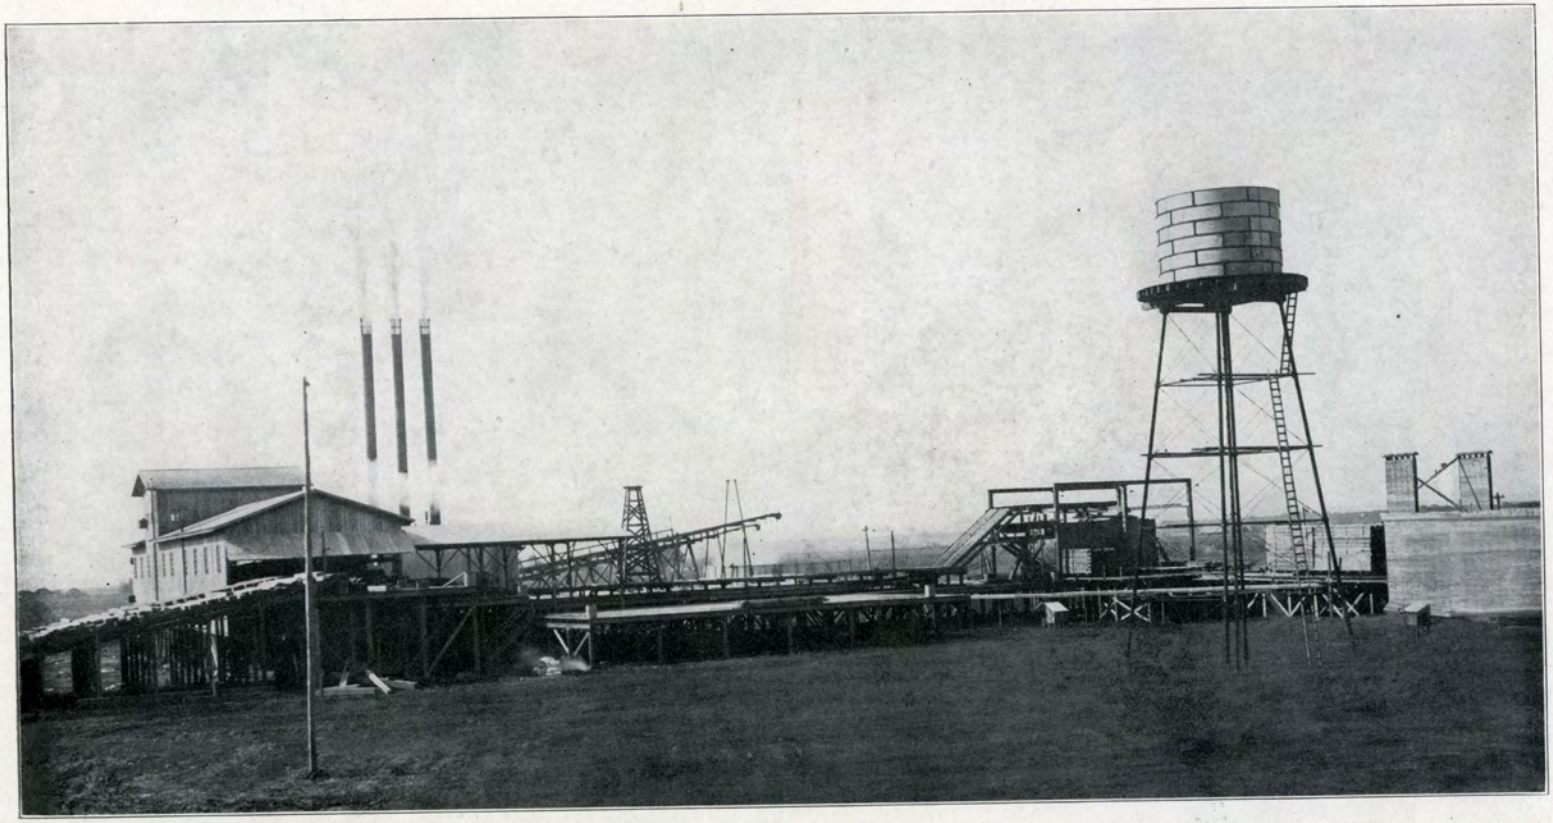
We make all sizes to suit requirements, either hand or power-operated.



SPECIAL IDLERS AND POCKET WHEELS

For Close Link Chains on Lumber Sorters

These work very successfully, especially when chain is built and fitted to pocket wheel of same pattern which it is to run on. We have patterns for ½" and ⅝" chains to suit all requirements.



PLANT OF NEWELL LUMBER CO., EUNICE, LA., EQUIPPED COMPLETE

Note the Lumber Sorter. A shed covers Soda Dip and Common Sorter, where lumber is pulled off chain for yard. The chains then carry the dry kiln stock (across fire space) to Drop Sorter, over the kiln cars, for easy piling. This is a most economical arrangement.
