The Lufkin Courier

AND ADVERTISER

VOL. 17—NO. 50 LUFKIN, ANGELINA COUNTY, TEXAS, FRIDAY, October 5 1928 $1.00 PER YEAR

When This

BANK

Invites you to open a SAVING account, it is a request for you to take the action that has been the foundation of financial success for many.

Many lose a life-time savings by keeping money in the home, when by depositing it in banks, it is always safe and ready for them.

Capital, Surplus and Profits over $200,000.00

LUFKIN NATIONAL BANK

LUFKIN, TEXAS

Back to thee Case!

The night of the 15h. Ezra Moss to whom we'd leased our plant & buildin untill Dec. 31 with an op-

option of buying the plant, or leasing all for 3 years, or purchasing all, with his wife, and children and the young woman with them, after p acking Saturday and nignt loaded and left while the dew was on the grass. We are out 9 days trying to get our type back in cases, & straighten up the office. We miss over $50,00 worth of new type forJobs on Job Press, about $40,00 worth of Job stock, used & unpaid for, with many other little things to numerous to mention; besides part of our ease money for August and all for Sept. He left 3 old sheet iron galleys, for The West Printing Co for which he took of $12,00 worth of a No. borrowed Brass Galleys.

He also left oweing them (West) for the Lino-mettel and setting 238 names, without any paid up date & not a line, or any subscription data, or other-wise.— We are not liable for his frauds. but, we send The Lufkin Courier and Advertizer up to December. 31, 1929 to all his dupes who will remit, or hand us Fifty cents, by or before Oct. 31.

A Part of this MONEY will be used as a reward for the arrest and conviction of members of a gang of swindlers. Co Atty. Finley can assure you WE have the Evidence to CONVICT, as he has seen letters we found which they inadvertently had left in the office.

As to the trade Advertiseing and Job Work Certificates: we are not responsible; and as we had no part in the management, knew nothing about them untill the last week:— and will not accept them at all.

We thot contests were honest:— When Will West was comeing here from Livingston, The Lufkin News put on one; giving away two cars and other prizes for votes.

These grafters are no worse than those who buy on credit, and when able, refuse to pay for it!

All whov'e known me will not beleve that I'd participate in such a dishonest scheme.

Mr. West and we have iiled complaints. We believe that if those who bought Certificate will employ a good Atty., that Coleman will refund the cash rather than face the Federal courts.

Saturday eve Captain C. A. Rush

Was burried with Masonic honors in Glendale, after Elders Nutt and Cole had conducted funeral service at his home on N. 3d.

He died about 7:p.m. Saturday after being confined to his bed by a paralyitic stroke in April, 1927 after returning from the Tampa, Florida Confederate Reunion.

Ha would have been 90 in Oct.

He was a native of Ala., coming to Anderson Co. Tex. then to Nacogdoches, later to Homer, where he enlisted and served thru the war.

Walt Spears and Ben Nerren of Lufkin, with Dr. Bill Lindsey, who was older but very feeble when we met him at our Little Rock. Ark., Reunion last May. are the only known survivors of his mess, Co. and Regiment.

After the war on his return he clerked at old Homer, the County seat tor Dr. W. W. Manning, later marry the Dr's daughter, and became his partner in business.

One son Willie survives him, he moved to Lufkin about 1885.

After moving here his wife died.

He served as Co. Treaeurer for 6 successive terms, and was greatly esteemed by all citizens.

BIG BUSINESS FIRM OFFERS EMPLOYMENT—-WE have a place for several ambitious men in your locality to introduce and sell Herberlines Big Line of Farm and household necessitief direct to the farm trade—quick sales —big profits—low prices—every home a prospective buyer—permanent and profitable work. Must have car. Write to day for free catalogue. Dpt. 2281.

G. C. HERBERLING Compauy, Bloomington, Ill.

Ezra Moss Got the Long Dist-Phone Co. for about $22,00, and many others will long remember his brief sojorn in Lufkin.

666

Cures Chills and Fever, Intermittent, Remittent and Billious fever due to malaria

It kills the germs.

For best men and boys shoes. fruit trees and shrubery. See me or BEST All Wool Suits at CHEAP PRICE. C. A. Ricks Lufkin, Texas.

PLANTS FOR SALE.—Cabage as fine as yon ever saw, 500 $1,00-1,000 $1,75 prepaid. Box 135. A. S. Croom, Lufkin, Texas

VISIT THT FAIR, 9 to 13

WITH THIS ISSUE WE

Commence VOL. 1 NO. 1 OF THE LUFKIN COURIER & ADVERSER. By reading Col 1 this page, you'll see our offer of 50c. to those swindled by Ezra Moss and the Coleman Co. (Inc.) fn Jackson, Miss, to each of whom we mail a copy this week, after which we will only send those remitting; holding the names on the mailing galleys untill Oct. 31, when we'll return the metal to the West Printing Co. to whom it belongs: and close the matoer as we have no records here

At present we are not certain yet whether 'twill be a weekly or semi-monthly or a monthly; but we are sure of this:—We need, and will ap preaeite what is due us right now.

Our type is so badly mixed that 'tis hard to set it, and our 3 month from the case has slowed us down.

SUNDA EVE MR.

. . (Doc) Connor was buried in the Ryan Cemetary, near Burke.

He was near 29 and a son of Mrs. G. H. Connor of near Burke, who with his brothers Millard, Gilmer, Nugent, Corbet, Hubbard, Sam Geo & Lee survive him. An immense crowp was present. In a dispute ar Diboll mill, which resulted in a fight, his skull was fractured badly by a piece of lumber by Charlie Russell. He was rushed to hospital unconcious, where he died Friday night at 12. Russell was jailed to await examining trial.

SUNDAY 10 TO 11:30

THE SACRED HARP CONVENTION'S

MEMORIAL SERVICE WAS very touching and impressive, and the many beautifull tributes to the departed drew many tears.

DECEASED MEMBERS

Judge E. L. Atkinson

Jim B. McConnico

Mrs. C. A. Ricks

Before dissmissing, Mr. R. J. Behannon, kindly but firmly stated that he believed there was plenty of food for the immense crowd, but he hoped that the home folk would hold back until sure that the visitors were saited—that no one would be permitted to cary off to cars.

Cheif of Polece, Ralph Chancy said, 'Twas a fine orderly crowd."

There were about 500 visitors & singers from La. & other Co's and all enjoyed their visit here.

Sunday Mr. Tommie McClendon and family, Mrs. K. D. and Miss Agnes Gann and Mr. & Mrs. Lee Deggs attende Doc Connors funeral.

Sunday eve at Redland church Charles Kerr, about 17, only son of Mrs. Champ Keer while riding tandem on a Motor-Cycle had his leg crushed so badly by a Ford car hub that it was amputated.

Early Sunday morning Mr. Earnest Rutland died suddenly at his home at Diboll, and was buried id Glendale Monday.

Sunday Mrs. Daisey Kelley died at the hospital, where she'd been after a trip, said to have Phneumonia, then took home, then brought back. Prepareing her for burial 2 and other wounds were found, and Anderson Lovelady was jailed on a charge of murder.

LIST OF GRAND JURY FOR OCT TERM

W. H. Agee, Diboll. Sam Shofner, Manuel Westmoreland R 3. and E. T. Cowart R2. Huntington. S. R. Parker, E Q. Bates R3, Will Hambrick, R5, W. F. Peavy, R1, and A. Cudlip Lufkin.

T. L. Parker, Zrvalla. H B. Weatherford, Manning. J. A, Ryan, Burke. and Mulligan Smith, Keltys.

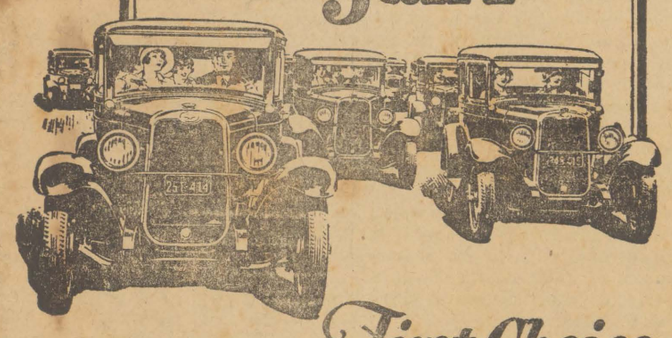

Monday Mr. & Mrs. Lee Allen & Miss Myrle Ivey of R. 3. A. of Rusk, Tex. moved in the two rear rooms of The Courier-Advertizer building.. He is a steam or Gas Engineer, with recomendations.

Monday a Mr. Henry Sheppard was killed abyve the Angelina riv'r bridge in Nacogdoches Co. by tree falling on him.

EVERY BODY ELSE IS COMING-U-KUM-2

Sunday mrs. Jess Knight and children visited her parents, Mr. and Mrs. F. L Harvell.

Monday Mrs. Jess Knight is visiting her parents, Mr. and Mrs. F. L Harvell. Miss Daisy Innerarrity si visiting her aunt Mrs. Charlie Forrest. Mr. Wilbur Carrel spent Sat. night with Mr. Earl Alexander at Rocky Springs. Mr. and Mrs. S M Spivey attended prayer meeting at Boll Hill Sunday eve.

There will be a Box Supper at Salem School-house the niget of the 12th, every body come:-bring ome one with you; the proceedsgo for the benefit of the schoof.

Miss Corean Squyres is leaving to live in Houston awhile.

Mr. Sank H. was bome Sunday with Mr. & Mrs. P, W. Havard.

Every-body come out to Sunday school, new littrature is here.

SALEM NEWS

Health is very good, several from here attended the Pine Grove fifth Sunday meeting.

FARM LEADERS BOLT HOOVER

Dyer of Indiana, and Reed of Minnesota, Declare for Smith.

RASKOB ADDRESSES FARMERS

Democratic Chairman Stresses Need for Program Which Will Bring Farm Prosperity—Urges Tariff Equality.

Further evidence that sentiment for Governor Smith is sweeping the Middle West is contained in the announcement that J. F. Reed, for seven years president of the Minnesota Farm Bureau federation, and John Napier Dyer of Vincennes, Indiana, director in the American Farm Bureau federation, will support the Democratic candidate for President.

Both Reed and Dyer have been lifelong Republicans. Each has issued a statement setting forth that the Republican party has turned a deaf ear to American agriculture and that the championship of the cause of the farmer by Governor Smith now compels true friends of agriculture to enlist in the Democratic forces.

Meanwhile, John J. Raskob, Chairman of the Democratic National Committee, was asserting the urgent need for a national policy giving the farmer prosperity and tariff equality.

"The greatest insurance for our future prosperity," said Mr. Raskob, "will depend on our ability to increase the purchasing power of the farmer. That can be done only through giving the farmer tariff protection, thus putting him on an equality with industry and enabling him to pay the high wages for farm labor which he is compelled to pay in competition with industry."

Cycle of Prosperity

Putting our farms on a profitable earning basis, Mr. Raskob pointed out, would give the farm population, "which constitutes 30 per cent of our total population, tremendously increased purchasing power. Now purchasing power means consumption and consumption requires production—production requires labor and labor employed again means purchasing power and thus the cycle of prosperity is completed."

Feeling that the Farm Bureau federation should be non-partisan, Mr. Reed has resigned from his position as president of the Minnesota bureau to adopt the course of supporting Governor Smith to which he says he is compelled by the present issue between the Republicans and Democrats.

"Both the platform and the candidate of the Republican party," says Mr. Reed, "withhold from agriculture any promise of an adequate remedy for existing conditions, confining their agricultural pledge to vague generalities which in no way define nor suggest nor promise the remedy long sought by American agriculture—'Control and orderly marketing of crop surpluses with adequate provision for the distribution of the costs upon the marketed units of the crops benefited.'

Honesty Compels Endorsement

"The platform of the Democratic party and the pronouncement of its candidate upon the question of agricultural equality embraces so definitely and clearly the principles held vital to any adequate farm relief plan by myself and the farmers of the state generally, that candor and honesty compels me to endorse the platform and the candidate of the Democratic party."

After reciting the failure of the Republican party to keep its pledges to agriculture, and the repudiation of the farmer's cause by Herbert Hoover, Mr. Dyer announces that he is quitting the Republican party, "disgusted with its lack of honor in the repudiation of its solemn pledges to the American farmer, and I am aligning myself with the Democratic party, with faith in its leader."

Mr. Dyer, operator of a thousand-acre farm in Knox county, Indiana, also states that he is a dry and a Protestant. He is president of the Knox County Horticultural association, and is one of the leading fruit growers of the country.

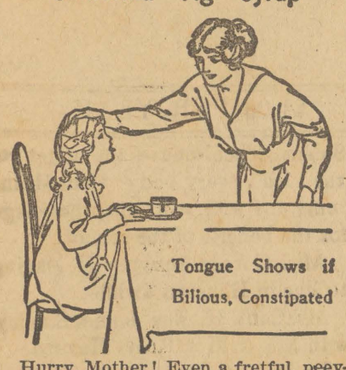

SURE OF SOUTH CAROLINA

Governor Smith is already assured of the largest votes ever cast for President in South Carolina. More than 180,000 persons have signed a pledge to support him in that State.

Room for Many Millions

Prof. H. L. Shantz of the University of Illinois recently told the National Academy of Sciences that the earth is capable of supporting 8,000,000,000 people if all the land is fully utilized. This, says Popular Science Magazine, would be nearly five times the present population of the world.

Salts Fine for Aching Kidneys

When Back Hurts Flush Your Kidneys as You Clean Your Bowels

Most folks forget that the kidneys, like the bowels, sometimes get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean and the moment you feel an ache or pain in the kidney region begin drinking lots of water. Also get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and is intended to flush clogged kidneys and help stimulate them to activity. It also helps neutralize the acids in the urine so they no longer irritate, thus helping to relieve bladder disorders.

Jad Salts is inexpensive; makes a delightful effervescent lithia water drink which everybody should take now and then to help keep their kidneys clean.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in trying to correct kidney trouble while it is only trouble.

CARBUNCLES and Boils—stopped quickly

Just spread on Carboil. Special ingredients quickly draw out core of worst boil or carbuncle. Lancing unnecessary. Prevents spreading. Get Carboil today from druggist. Or send 50¢ to Spurlock-Neal Co., Nashville, Tenn.

FIND SOUND WAVES THAT DEAL DEATH

California Scientists Conduct Successful Tests.

Berkeley, Calif.—Death dealing sound waves!

An experiment in this strange new field has been successfully carried out by three University of California scientists.

They demonstrated that high-frequency sound waves, emanating from a crystal vibrating at the rate of 750,000 times a second, will kill large protozoa.

So terrific and so instantaneous was the effect of the lethal sound waves, that the gill filaments of the protozoa were torn from their bodies.

Strange fields of conjecture for scientists of the future have thus been opened.

Tell of Work.

A. R. Olson, associate professor in the department of chemistry, one of the experimenters, pointed out that previous xperiments had been conducted in this same field; that he and his associates, F. O. Schmitt, research assistant, and C. H. Johnson, teaching fellow, have merely carried on the work to a higher degree of perfection.

Beneficial rather than destructive results are more the goal of the local scientists. Bloodless surgery has been accomplished by the same methods used to kill the microscopic organisms.

In carrying out the experiment, which was begun two years ago, they found it necessary to invent and to build much of their own apparatus. They perfected glass needles to carry the sound vibrations, the points of which were so fine as to be almost invisible.

This delicate instrument was necessary because all the experiments must needs be carried out under powerful microscopes. They were exploring in a world unknown to the naked eye.

First a drop containing the protozoa was placed on a microscopic slide and a glass cover laid over it. The slide was then laid over an oscillator dish.

Sensitive Needle.

The oscillator dish contained a crystal which was caused to vibrate by the passage of an electrical current through the liquid in which it was immersed.

In conducting the experiment with planarian worms, the glass needle was used. The large end of the needle was placed in the oscillator dish, and the point of the needle directed against the worm.

So delicate was this operation that the scientists used an extremely sensitive instrument, the micromanipulator, with which to guide the needle.

They discovered that when the needle point was placed against the worm, even though lightly, the vibrating point instantly burned the worm. If the shank of the vibrating point was placed across the worm, the body would be severed.

Other men have worked on this phenomenon of the effect of high frequency sound waves, it was explained, but none have developed the technique to such a high point. With the glass needle as perfected on the Berkeley campus it is possible to observe the effect of sound waves not only on each tiny cell, but even on parts of the cell.

Chinese Typewriter Perfected by American

New York.—A test of the comparative might of the pen and the sword in China, through the use of the modern, rapid-fire evolution of the pen, is now made possible by an American invention. This is a Chinese typewriter. The machine is based on the newly adopted Chinese alphabet, known as "Chu Yin Tzu Mu."

The Chinese language is ideographic—that is, it presents picture ideas, but the Chinese typewriter operates like its English cousins. Its keyboard has 48 characters, comprising all the phonetic symbols, 21 compound signs, Chinese numerals, tone marks, a symbol indicating emphasis, parentheses and a period.

The characters are set sidewise. To read such a sheet, it must be given a quarter turn after removal from the machine.

Bid on Vast Store of Bone-Made Fertilizer

Tacoma, Wash.—Millions of dollars' worth of seal and sea-lion bone deposits on the shores of the Pribilof islands in Bering sea, a vast store of government owned fertilizer available for practical use, is attracting local capital to bid for the privilege of recovering the product.

Although not fully nor officially surveyed, the accumulations of centuries form the largest bone deposits in the world, one of the piles being a mile long by half a mile wide and fully six feet deep. Action of ice and waves has formed the bones into huge drifts or windrows, while it is possible sand covers equally as large deposits as appear above the ground.

2,000 Cats on Pay Roll

Le Harve.—Two thousand pussy cats have been put on the municipal pay roll of Havre. Havre was over-run with rats, a year ago, many of them brought from all parts of the world by the hundreds of boats using the port. The municipality decided to rid the port of rats, and hired cats to do it.

POULTRY

PLAN TO FATTEN HOLIDAY TURKEYS

The marketing season for turkeys is from about the middle of November to the last of December.

Confining turkeys during the fattening season has not proved successful. They will eat heartily for two or three days, but after this they will lose their appetite and begin to lose flesh rapidly. Naturally, they are wild birds and thrive only when they have access to open range. During the summer and fall they find an abundance of feed on the average farm; however, it is advisable to give them a small feed at night for the purpose of bringing them home to roost. Grasshoppers and other insects, weeds and grass seeds, green vegetation, berries and grain picked up in the fields and about go to make up the turkey's daily ration, and when all these are plentiful they are in splendid condition when the fattening season arrives.

A satisfactory plan for fattening is to begin by feeding small grain night and morning, not enough at a time but that the birds will walk away still a little hungry, and gradually increase the quantity, adding some corn, until they are given all they will eat three times a day. Along at the close of the fattening season corn, supplemented with fresh sour milk, may constitute the full ration. New corn may be fed safely provided the turkeys are gradually accustomed to it, otherwise scours may result.

Various kinds of nuts are a natural fattening feed picked up by turkeys on the range. In parts of Texas many growers, properly situated, depend solely on acorns for fattening their turkeys, and when the mast is plentiful the birds are marketed in fairly good condition.

Use Lights in Poultry House During Winter

A series of cautions for the user of lights in the poultry house is found in the Ohio state poultry calendar. They are as follows:

Grade and pen pullets according to age, condition, and laying qualities, so that each group may be properly handled.

Excessive fall production makes it hard to keep the flock in heavy production during the winter.

Don't use lights to produce more than a 14-hour day. Excessive use of lights means overproduction, followed by a slump.

To avoid a spring molt, discontinue lights slowly in the spring.

Use lights on breeders only after January 1 to 15, in order to help them back into production.

Don't crowd production over 60 per cent, otherwise the flock will become thin and molt.

Be regular in management and use of lights.

Feed grain liberally when using lights.

Always have feed and water available when lights are on.

Do not turn lights off too early in the spring.

Do not stop feeding early and late in the day when lights are finally eliminated.

Early Layers Usually Heavy Egg Producers

Pullets that begin to lay early usually are the heaviest producers in the flock and for this reason it is an excellent practice to mark them so that they can be given due consideration for their performance next year when it comes time to cull the flock, it is pointed out by L. E. Card, of the University of Illinois. Pullets that are extremely late in starting to lay are always certain to be the least desirable birds to use as breeders. In breeding for higher egg production, individuals of this type should be kept out of the breeding pens.

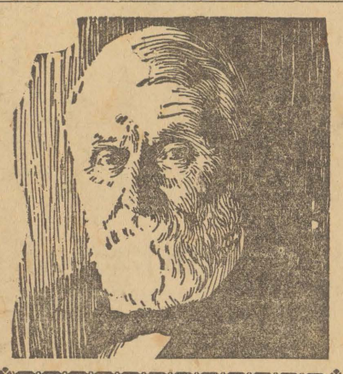

If the early-laying pullets are banded with numbered leg bands, all that is necessary is to make a record of the individual band numbers and the approximate date on which egg laying starts. Another equally satisfactory scheme is to use colored leg bands, in which case a different colored band should be used to mark the pullets that start laying in the different months.

Laying Hen Sings

A laying hen is usually a singing hen and happiness is encouraged by plenty of good oat or wheat straw on the floor. Practical poultrymen differ as to the respective merits of wheat, rye, and oat straw for litter. Each has been used without any noticeable differences as to wearing and sanitary qualities. Rye straw is somewhat stiff and oat straw breaks rather readily. The best advice is to use what is convenient and keep the house in good sanitary condition.

Cause of Fowl Typhoid

Thank your lucky stars if you've never met up with Eberthella sanguinarium. She's the germ that causes fowl typhoid, a most destructive disease. It acts much like fowl cholera, the birds becoming dull, droopy, with pale combs and a greenish or yellowish diarrhoea. Death usually isn't as rapid as with cholera. One mark of typhoid is that the liver enlarges and becomes a brownish or greenish color, while the kidneys look faded, as if cooked.

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming.

The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

Hot Oil Employed to Wipe Out Mosquitoes

Hot fuel oil, sprayed along the shores of the lakes in the Canal zone, is a most efficacious weapon against malaria-laden mosquitoes. This oil, a big factor in the fight which is culminating in certain abolition of the insect, has destroyed breeding places in the Pedro Miguel and Gatun lakes.

The method used to spray the oil necessitates the use of a rowboat carrying a tank containing 150 gallons of oil, and a crew of three men. One man rows, one works a hand pump and the other handles the spray nozzle. The hot oil is sprayed on the shore line as fast as the boat can be propelled. This surface filming has been found positive and complete.

Wind action and wavelets carry the oil into every nook and cranny, even to a considerable distance from the point of application. A rigid inspection follows every oiling to determine if it has been done thoroughly.

Elsewhere than in the lake areas, mosquito breeding is controlled chiefly by training of streams and by draining and filling.

Cat's Varied Diet

On a farm in Hinsdale, Mass., says the Boston Globe, lives a cat that is positively omnivorous. Like most other felines she eats meat, fish and milk, but her diet does not stop there, however. When the lady of the house was surprised to find bits of cucumber on the ground near the kitchen door, she watched the cat for a while. Finally she saw kitty go to the garden, break off a good-sized cucumber and carry it to the house, where she broke it open and ate it. Since that the cat's appetite has been tested with various other vegetables and it responds heartily.

Small Boy's Logic

Several gaudily colored steins arranged about the railing in a tea shop caught the eye of a five-year-old youngster breakfasting with his parents, sedate Hoosiers.

"Mom, buy me one of those things," the lad pleaded.

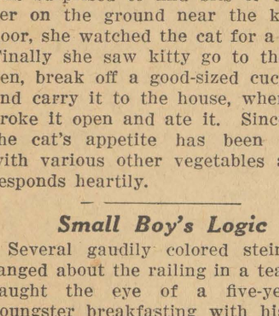

"Why, son, I can't; they're decorations," remonstrated the mother.

"Well, get me one for Decoration day then," rejoined the five-year-old, as his parents made wry faces and others within hearing distance laughed heartily.—Indianapolis News.

Repose for the Artists

"Are you going to have a great deal of music when you go speechmaking?"

"Not too much," answered Senator Sorghum. "The last time I went on tour I was made to feel that I was merely filling in time between the jazz band selections."

AMBASSADOR BRIDGE LARGEST IN WORLD

Huge Detroit-Canadian Span to Cost 20 Millions.

Detroit.—The Ambassador bridge, spanning the Detroit river between Detroit and the border cities of Canada, will be the largest suspension bridge in the world when it is completed next year at a cost of $20,000,000. The first physical contact between the two shores was celebrated with elaborate ceremonies recently when the two-mile bridge first reached Canadian soil.

The first spanning of the Detroit river was by means of a steel cable 1⅞ inches in diameter which was strung over the path to be taken by one of the two main supporting cables of the permanent bridge structure. The cable was lifted from the bed of the river, where it was placed a few days before, to the top of the two huge towers which will cary the burden of the finished international bridge.

Nineteen Inch Cables.

From this steel cable will be hung the working platforms from which the workmen will construct the 7,622 parallel and closely compacted steel wires which will form one of the two main bridge cables. The same operation will be followed in the construction of the other main 19 inch cable.

Because of the size and importance of the Ambassador bridge, dignitaries from both the border cities of Ontario and Detroit were present at the ceremonies. The mayors of Detroit and the Ontario border cities of Windsor, Sandwich, Ford, Riverside, La Salle, Tecumseh, and Walkerville officiated in the elaborate program. A squadron of airplanes dropped brilliantly lighted colored balloons on the river and along the shores.

The mayor of Detroit gave the order for the setting off of an aerial bomb, the signal for the raising of the cable from the river bed, while the mayor of Sandwich, Ont., gave a simllar signal on the Canadian shore. As the cable was raised into position on the towers rising 363 feet above the river, the flags of the United States and Canada appeared from the steel rope and from the tops of the towers.

When completed the Ambassador bridge will be approximately 7,400 feet in length. Adjoining the ends of the bridge structure proper will be two terminals, each roughly equivalent to a large city block in area. The main span between the towers will be 1,850 feet in length, or 100 feet longer than the Philadelphia-Camden bridge, which is at present the longest suspension bridge in the world. The bridge under construction over the Hudson river between upper Manhattan and the Palisades on the Jersey shore will dwarf them all when it has been completed.

The bridge will carry an unobstructed roadway 47 feet wide, with a capacity of five lanes of traffic, and an 8-foot sidewalk. The number of lanes of traffic used in any one direction may be varied to suit traffic conditions.

Plenty of Clearance.

Maj. Gen. Edgar Jadwin, chief of engineers, United States War department, ordered the clearance over high water in the river to be 135 feet near the shore and 152 feet for a short distance near the center of the span. This allows the passage of vessels with stacks, masts, or funnels 20 feet higher than any plying on the lakes and 60 feet higher than any present freighters. The approach grades are entirely acceptable for the best highway practice.

An idea of the magnitude of the bridge may be gained from the following statement of approximate quantities of different kinds of materials entering into its construction:

Structural steel and cable wire, 24,900 tons; concrete masonry, 25,000 cubic yards; cement, 40,000 barrels; roadway pavement, 60,000 square yards; sidewalk, 8,000 square yards; rivets driven, 2,000,000; terminal buildings, 540,000 cubic feet; maximum number of laborers simultaneously employed in field, 550.

Two Alligators Set Up Home Beneath Store

Oklahoma City, Okla.—Two alligators have established a permanent home beneath the downtown business building of Oscar Grace, proprietor of a local cleaning establishment, where they have led more or less hectic careers for the last year.

Grace has torn holes in the floor and has dug crevices in the foundation in an effort to reach the 'gators and restore them to a glass tank where he can enjoy their companionship. But so far, his only reward has been badly scratched hands and arms.

Rasping of their backs on the floor, he said, is "making a nervous wreck of me."

Rabbi's Flock Strays, So He Takes to Radio

Tours, France.—Radio is obliged to come to the rescue of religion in the large Jewish colony of Tours. M. Sommer, rabbi of Tours, finds that his parishioners no longer attend services, like the adherents of many other faiths.

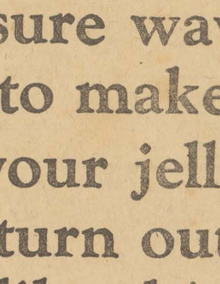

M. Sommer, who is ingenious and a believer in progress, intends to deliver his prayers by wireless. He has written an impassioned article advocating radio religion in a Jewish religious journal.

PEXEL the new sure way to make your jelly turn out like this

no more of this

YOU probably know what it means to have jelly that will not set. In the old days no one could be sure of results. But there's no risk now—Pexel always makes jelly jell as soon as it is cold.

Pexel is tasteless, colorless, odorless—a 100% pure-fruit product that provides only necessary elements for jelling. Makes continued boiling unnecessary. Repays one to three times the 30c it costs, saving fruit, sugar, flavor, time, fuel.

Get Pexel at your grocer's. Recipe booklet with complete recipes, accurate tables in each package. 30c. The Pexel Company, Chicago, Ill.

For example—with Pexel

4½ cups strawberry juice and 8 cups sugar make 11 glasses jelly.

4½ cups raspberry juice and 8 cups sugar make 11 glasses jelly.

6 cups currant juice and 10 cups sugar make 14 glasses of jelly.

4½ cups grape juice and 7 cups sugar make 10 glasses jelly.

new

Old Slang Phrase

The expression "he knows his onions," like a lot of other modern things, really is very old. It has been twisted a bit in getting to young America but the phrase has an ancient ancestor in France.

"Those are not his onions," is a phrase, slang but fairly well sanctioned by age, that means "that's not his business." The "onions," serving the same purpose as in American slang, have been enlivening the popular vocabulary for generations.

Men hunting North and South poles are at least not bored.

COMPLEXION IMPROVED . . . QUICKLY

Carter's Little Liver Pills

Purely Vegetable Laxative

move the bowels free from pain and unpleasant after effects. They relieve the system of constipation poisons which many times cause pimples. Remember they are a doctor's prescription and can be taken by the entire family. All Druggists 25c and 75c Red Packages.

"A Little Moon Magic"

By HELEN R. BARTON

(Copyright.)

OLD DOCTOR STEVENS looked up swiftly and eyed his keen, alert assistant, Doctor McKensie, as he said curtly: "The astringent, please, Miss Hatton." And his wise old eyes twinkled as he recalled that only yesterday morning it had been "Peter" and "Ruthie," instead of the formal Doctor and Miss! Verily something was amiss, but it was no time to speculate, with a patient snoring very much like nine asthmatic pigs and the urgent business at hand of seeing that Doctor Peter and Ruthie in their blind rage at each other did not make a slip and sew up an extra pair of scissors or a spare roll of gauze inside an anatomy already long-suffering from acute indigestion and appendicitis!

Doctor Stevens' eyes lost some of their twinkle when he noted that Ruthie's eyes were brimming behind the grotesque mask of gauze, and that Doctor Peter held his chin much too far out to be quite comfortable. So it was as bad as all that, he ruminated. Well, well; it was a doctor's business to heal broken bodies and minds, and he reckoned that that included broken hearts as well, so he started scheming shrewdly as he removed his big enveloping coverall and the hot, uncomfortable mask.

Doctor Peter came and went the following day to and from his office, and still maintained the stiff, formal, icily correct attitude toward his equally frigid, constrained, correct office nurse. And when old Doctor Stevens dropped in at five in the afternoon, to ask Peter to look after his calls while he spent the week-end fishing at his log cabin down Sleekport Harbor, on Craig island, neither Peter nor Ruthie relaxed enough to be more than barely civil to each other. But Doctor Stevens' acute ears caught a strangled sob as Peter went with him to the car to add a few questions and remarks about the cases he would handle.

And old Doctor Stevens had to repress with vigor a rousing desire to grasp Doctor Peter by his stiff, arrogant shoulders and shake a few dental fillings loose. Doctor Stevens had known Ruthie since she wore rompers, and he considered Peter his very own son, almost, for he had helped him buy out Doctor Helf's practice when that worthy practitioner left town to go to a larger city.

At seven, Peter was putting his desk to rights, when the telephone rang shrilly. And a moment later, he was listening to Ruth's frightened gasps: "Oh—are you sure? But of course we'll come right away—instantly!" And Peter forgot his stiff sudden pride and asked sharply: "What's the trouble? Somebody hurt?"

"Oh, Peter! Uncle Stevie slipped when he got out of his boat at Craig island, and his man's afraid he's broken a leg. He wants us both at once. Told the man to have us take the launch! Oh, hurry!"

A great June moon was climbing high in the heavens. The half-way mark had been covered when the launch began to cough and sputter and finally died entirely. Ruthie tore her gaze from the wide silver path of the moon and said: "Oh, Peter, what's happened?"

And Peter answered half under his breath: "Sounds like gas gone." He lifted the board that covered the gas inlet and was startled to see a tiny white piece of paper that, upon closer inspection, proved to be a prescription blank of Doctor Stevens'. On it was penciled: "What's a bogus broken leg when two broken hearts need mending? Prove that you're a good doctor or I'll leave you marooned in the middle of Sleekport harbor till morning! A little moon magic does wonders toward healing heart ailments. P. G. Stevens."

"What's the matter, Peter?" asked Ruthie sharply, and he answered in a muffled tone: "We're out of gas, dear; guess we'll have to drift!"

"Oh, Peter, darling, and dear old unkie's leg!"

"Well, worrying won't help him any! I don't think it's broken, anyway, because he'd know—he's been practicing over forty years, Ruth!" And much later: "Ruth, did you ever see such a moon! It makes you sorry and ashamed that you were ever petty or mean or small!"

"Ah, Peter, does it do that to you, too, dear? I'm such a stubborn little pig. I'd not blame you much if you never did forgive me."

"Well, I'm just as bad; I'm so darned jealous, that I just saw red when that pesky, bloated banker held your hand so long!"

Ruthie giggled. "Oh, Peter, and he was telling me how much like his own little daughter I was and he was trying to get me to promise to nurse her when that much-expected heir arrives! Why didn't you say it all and then there'd have been no unhappy quarrel! Sally Trevor had just been telling me how unfaithful doctors are. She's married to a dentist. And she said she never yet knew of a really happy married doctor."

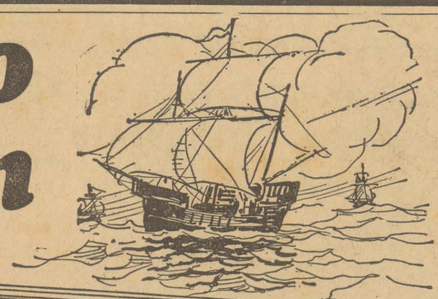

And, still later, "Sure I love you, Pete?"

"Uh—don't you? You c'd never kiss like that unless you loved the one you were kissing."

"Don't spoil this moon magic, darling; let's just drift—and dream!"

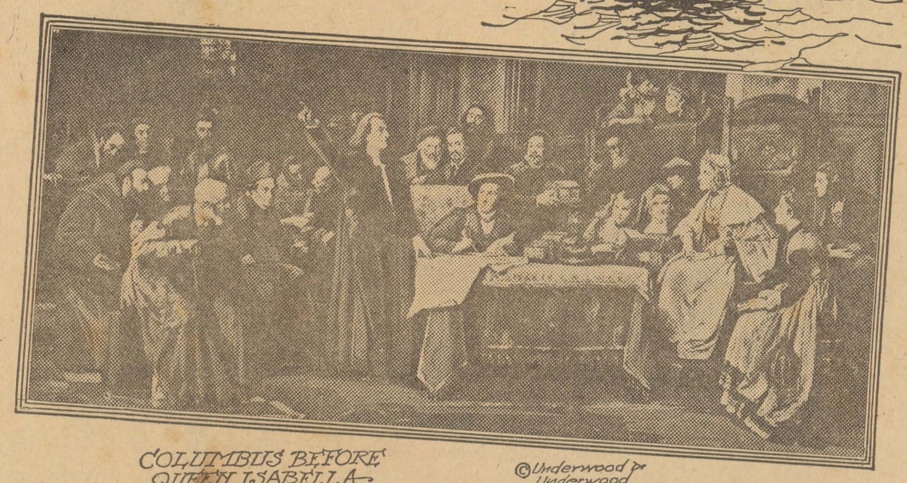

And Peter drew her closer into his arms, a strangely exalted look shining from his keen eyes as he watched the dripping magic of the summer moon!

America's Debt to a Spanish Queen

QUEEN ISABELLA

COLUMBUS BEFORE QUEEN ISABELLA.

QUEEN ISABELLA'S JEWELS

By ELMO SCOTT WATSON

AS COLUMBUS day approaches this year it finds a project under way for paying homage to the name and achievements of Christopher Columbus on a greater scale than has ever before been attempted. In the United States, as well as in other nations in the Western hemisphere, his fame has been perpetuated in the names of hundreds of cities, towns and public squares, monuments have been erected in his honor and the date of his discovery of the New World has been celebrated as an important date in history and a holiday. All of these, however, have been individual memorials.

Now the nations of the two Americas are planning to co-operate in honoring him and, under the auspices of the Pan-American Union, erect a $4,000,000 Christopher Columbus Memorial Lighthouse, a beacon for navigators of both the sea and the air, in the capital of Santo Domingo, the land which Columbus called Hispaniola. The Dominican republic already has set aside a 2,500-acre tract of waterfront land for a Pan-American park, in which the lighthouse is to be built and appropriated money as its share of the cost of the memorial. Legislation proposing similar appropriations have already been introduced in the United States, Cuba and several other countries and the first step, that of holding a competition in which the leading architects of the world have been invited to submit designs, toward realization of the memorial project already has been taken.

No one will deny the appropriateness of this form of a memorial to one of the most famous navigators of all time, and most Americans will applaud the idea of thus honoring once more the man whose courage in facing the terrors of the unknown set him upon that voyage which marks the beginning of American history. From our school days the story of Columbus has been a familiar one to us all and his name stands out in our memory as one of the great figures in the history of our nation. It should be remembered, however, that the discovery of America was not a strictly individual proposition and it does not detract any from the fame of Columbus to give proper credit to others who were concerned in it.

When a final reckoning of credit due is made, outstanding among the names of those who were associated with the Genoese sailor in his great undertaking is the name of a Spanish queen to whom America owes a debt of gratitude which has but scantily been repaid. For had it not been for Isabella of Castile, royal consort of Ferdinand of Aragon and queen of Spain, the voyage of Christopher Columbus might never have been undertaken. To most of us, depending upon our school histories for our information about events of those far-off times, Ferdinand and Isabella are little more than mere names and, except for their association with the name of Columbus, are but dim and shadowy figures in the pageant of American history. We know that after failing to interest the ruler of Portugal in his ambitious project to find a short route to the wealth of the Indies by sailing westward over the Atlantic, Columbus determined to lay his case before the rulers of Spain.

To an American historian, Washington Irving, we are indebted for a clear pen picture of these two monarchs, and especially of Queen Isabella, who were destined to have such an important role in the history of our nation. In his "Life and Voyages of Christopher Columbus" Irving writes:

The time when Columbus thus sought his fortunes at the court of Spain coincided with one of the most brilliant periods of the Spanish monarchy. The union of the kingdoms of Aragon and Castile by the marriage of Ferdinand and Isabella, had consolidated the Christian power in the peninsula, and put an end to those internal feuds which had so long distracted the country, and insured the domination of the Moslems. The whole force of united Spain was now exerted in the chivalrous enterprise of the Moorish conquest. The Moors, who had once spread over the whole country like an inundation, were now pent up within the mountain boundaries of the kingdom of Granada. The victorious armies of Ferdinand and Isabella were continually advancing, and pressing this fierce people within narrower limits. Under these sovereigns the various petty kingdoms of Spain began to feel and act as one nation, and to rise to eminence in arts as well as arms. Ferdinand and Isabella, it has been remarked, lived together not like man and wife, whose estates are common, under the orders of the husband, but like two monarchs strictly allied. They had separate claims to sovereignty, in virtue of their respective kingdoms; they had separate councils, and were often distant from each other in different parts of their empire, each exercising the royal authority. Yet they were so happily united by common views; common interests, and a great deference for each other, that this double administration never prevented a unity of purpose and of action. All acts of sovereignty were executed in both their names; all public writings were subscribed with both their signatures; their likenesses were stamped together on the public coin, and the royal seal displayed the united arms of Castile and Aragon.

Ferdinand was of middle stature, well proportioned, and hardy and active from athletic exercise. His carriage was free, erect and majestic. He had a clear, serene forehead, which appeared more lofty from his head being partly bald. His eyebrows were large and parted, and, like his hair, of a bright chestnut; his eyes were clear and animated; his complexion was somewhat ruddy, and scorched by the toils of war; his mouth moderate, well formed, and gracious in its expression; his teeth white, though small and irregular; his voice sharp; his speech quick and fluent. His genius was clear and comprehensive; his judgment grave and certain. He was simple in dress and diet, equable in his temper, devout in his religion, and so indefatigable in business that it was said he seemed to repose himself by working. He was a great observer and judge of men, and unparalleled in the science of the cabinet. Such is the picture given of him by the Spanish historians of his time.

While giving his picture, it may not be deemed impertinent to sketch the fortunes of a monarch whose policy had such an effect upon the history of Columbus and the destinies of the New World. Success attended all his measures. Though a younger son, he had ascended the throne of Aragon by inheritance; Castile he obtained by marriage; Granada and Naples by conquest; and he seized upon Navarre as appertaining to any one who could take possession of it, when Pope Julius II excommunicated its sovereigns, Juan and Catalina, and gave their throne to the first occupant. He sent his forces into Africa, and subjugated or reduced to vassalage, Tunis, Tripoli, Algiers, and most of the Barbary powers. A new world was also given to him, without cost, by the discoveries of Columbus, for the expense of the enterprise was borne exclusively by his consort Isabella. He had three objects at heart from the commencement of his reign, which he pursued with bigoted and persecuting zeal: the conquest of the Moors, the expulsion of the Jews, and the establishment of the Inquisition in his dominions.

Contemporary writers have been enthusiastic in their descriptions of Isabella, but time has sanctioned their eulogies. She is one of the purest and most beautiful characters in the pages of history. She was well formed, of the middle size, with great dignity and gracefulness of deportment, and a mingled gravity and sweetness of demeanor. Her complexion was fair; her hair auburn, inclining to red; her eyes were of a clear blue, with a benign expression, and there was a singular modesty in her countenance, gracing, as it did, a wonderful firmness of purpose and earnestness of spirit. Though strongly attached to her husband and studious of his fame, yet she always maintained her distinct rights as an allied prince. She exceeded him in beauty, in personal dignity, in acuteness of genius, and in grandeur of soul. Combining the active and resolute qualities of man with the softer charities of woman, she mingled in the warlike councils of her husband, engaged personally in his enterprises, and in some instances surpassed him in the firmness and intrepidity of her measures; while, being inspired with a truer idea of glory, she infused a more lofty and generous temper into his subtle and calculating policy.

It is in the civil history of their reign, however, that the character of Isabella shines most illustrious. Her fostering and maternal care was continually directed to reform the laws, and heal the ills engendered by a long course of internal wars. She loved her people, and while diligently seeking their good, she mitigated, as much as possible, the harsh measures of her husband, directed to the same end, but inflamed by a mistaken zeal. Thus, though almost bigoted in her piety, and perhaps too much under the influence of ghostly advisers, still she was hostile to every measure calculated to advance religion at the expense of humanity. She strenuously opposed the expulsion of the Jews and the establishment of the Inquisition, though, unfortunately for Spain, her repugnance was slowly vanquished by her confessors. She was always an advocate for clemency to the Moors, although she was the soul of the war against Granada. She considered that war essential to protect the Christian faith, and to relieve her subjects from fierce and formidable enemies. While all her public thoughts and acts were princely and august, her private habits were simple, frugal and unostentatious. In the intervals of state business she assembled round her the ablest men in literature and science, and directed herself by their counsels, in promoting letters and arts. Through her patronage, Salamanca rose to that height which it assumed among the learned institutions of the age. She promoted the distribution of honors and rewards for the promulgation of knowledge; she fostered the art of printing recently invented, and encouraged the establishment of presses in every part of the kingdom; books were admitted free of all duty, and more, we are told, were printed in Spain, at that early period of the art, than in the present literary age.

It is wonderful how much the destinies of countries depend at times upon the virtues of individuals, and how it is given to great spirits by combining, exciting, and directing the latent powers of a nation, to stamp it, as it were, with their own greatness. Such beings realize the idea of guardian angels, appointed by Heaven to watch over the destinies of empires. Such had been Prince Henry for the kingdom of Portugal; and such was now for Spain the illustrious Isabella.

Columbus appeared before Ferdinand and Isabella early in 1486 and after giving his project a hearing they referred it to the queen's confessor, Hernando de Talavera, with instructions to summon a council for its consideration. This council was very deliberate in its actions and, after nearly five years, reported adversely for the ambitious sailor in 1490. But through the efforts of Juan Perez, guardian of the monastery of La Rŏbida, a former confessor to Queen Isabella, Columbus was given another hearing at court, and in January, 1492, another council was summoned to consider his plans.

Contrary as it may be to popular belief, the picture of Columbus as a humble suppliant before the Spanish rulers is not strictly an accurate one. Rather than that of a man asking favors, his attitude was that of a shrewd bargainer in which he demanded of Ferdinand and Isabella a patent of nobility, the admiralty of the ocean, the viceroyalty and government of all lands discovered on his proposed voyage, a commission of 10 per cent upon everything within the limits of his admiralty "which might be bought, exchanged, found or gained" and three caravels to cost approximately $6,000. Such were the rewards which he asked—"rewards which," according to a modern historian, "if granted, would raise him to a dizzy height, to a point of rank, power and riches next to that of the throne itself."

So it is not surprising, perhaps, that for the second time the council reported adversely upon his proposal and he was dismissed from the Spanish court and departed sorrowing for Cordova. And then the hand of a woman intervened in the destiny of Columbus and played its part in the future history of the American nation. Two leagues from Granada, he was overtaken by a royal constable who had been sent posthaste by Isabella with orders for his return. His every demand would be granted! Just what it was that influenced the Spanish queen to take this action has never been satisfactorily explained. There only remains the fact that she did so, even though Ferdinand resented the high price demanded by Columbus for his services and held aloof from agreeing to the bargain until Isabella won him over. According to one story which has come to be inseparably associated with the story of Columbus, the queen in order to win Ferdinand's consent offered her jewels as security for money for the enterprise. Although some historians have characterized this incident as "one of those bits of pure romance that so often creep into the historical narrative and lend fictitious color to it," others give it enough credence to justify the belief that there may be some measure of truth in it.

It is interesting to note that within the past few years there have been offered for sale in this country by a syndicate of jewelers in New Jersey the very gems, it is said, which Queen Isabella pawned to finance Columbus' expedition, and records supporting their authenticity were produced. These jewels consist of 280 stones, weighing 500 carats. In addition to the breast-piece with its seven large drops, weighing 400 carats (the largest weighs 54 carats) there are five other diamonds and the whole set of jewels is valued at $500,000.

Whether or not these stories are true, however, is more or less incidental. The principal fact is that the persistence of the Genoese sailor through many discouragements and backsets, was finally rewarded, his fleet of three little ships set out from Palos, Spain, on August 3, 1492, and, despite the fears of a mutinous crew, "sailed on and on and on" until one October morning four hundred and thirty-six years ago Columbus and his men saw for the first time the shores of the New World. That is the event which we Americans are celebrating again on October 12 and, considering the important part which she had in making that possible, it should be a date not only for honoring Christopher Columbus but for holding in grateful remembrance the Spanish queen, Isabella of Castile, to whom America owes an everlasting debt.

HE LOOKED up from the letter he was reading with a frown of irritation, but at the sight of her standing there timidly at his side, he jumped up awkwardly, his chair making a grating sound as he pushed it back, his handkerchief falling to the floor from where it had lain forgotten on his knee.

"My name's Sam Smith, homely but handy like my face," he laughed embarrassed as he stooped to recover the handkerchief.

"Now that was a fool thing to say," he reflected wretchedly. What made him introduce himself anyway? Heaven knows anybody who could see could read the name plate on his desk: Samuel Smith, Head Bookkeeper.

The more he thought about all his blunders the more embarrassed he became and the more helpless. "Isn't she tiny!" he thought. "And pretty! Doesn't look as if she could be even any kin to us great big awkward men."

"I'm Grace Donahue," she told him, looking up at him with a diffident expression in her huge brown eyes, "and I—I—heard you wanted another bookkeeper."

"Oh, yes'm. Can you keep books?"

And that was another fool thing to say, he realized too late. If she couldn't, of course, she wouldn't be applying for the job.

"I never have," she answered, "but I've just finished the course at high school and here's my certificate."

She unfolded it and handed it to him, watching his face as he read.

"Want me?" she asked when he had finished.

"Why, yes ma'am. I 'phoned the high school this morning. I'm sure you can do the work all right. I'll take you out and show you everything."

Together they went into the long, cheery room with its rows of high desks and stools and immediately all eyes were surreptitiously focused on the little figure standing beside Smith.

"Gee, what a knockout!" thought the men. "Watch me get the first date."

"Innocent baby doll stuff's her line. Bet she makes the men do all her work," reflected the girls as they went back to their figures.

And without a word, all the women in the room had immediately banded together, against her, and every man against all the other men. The conflict was in the air and the only person who had not even permitted himself to think of Grace in any personal way was Sam Smith. He knew the competition would be lively among the other men in the office and that he with that terribly awkward manner of his in the presence of girls, and his rugged, homely face, wouldn't even have a look in. But he'd stand by her, by George, and see that she got a square deal and that nobody bothered her. She was too innocent and sweet to fight for a living out in the business world, he reflected.

Within a week Grace was besieged with invitations. Most of these she accepted with her soft little smile, but after a while Sam was surprised to notice that she no longer left the building on her way to lunch with one or another of her admirers, nor did anyone drop into step beside her on her way home in the late afternoons. He was puzzled and often wondered about it, but it was weeks before he got up the courage to ask her why.

"You been giving all the fellows the cold shoulder lately, haven't you?" he asked, when she came to his desk one day for advice about some work. Then Grace did a most astonishing thing. She dropped her head and two big tears rolled down her cheeks before she turned and fled without a word of explanation. What had he done to hurt her so! In a panic of remorse he rushed down the hall after her. Then she looked back, saw him coming and instead of escaping into the girls' cloak room nearby, whence pursuit would be impossible, as he had expected her to do, she turned and threw herself into his arms.

"Oh, honey, honey, little pet, what's the matter?" he asked, holding her as gently as he could. "Don't cry, dear. Don't cry. It just breaks my heart to see you unhappy."

"I—I—I don't like them," she said hotly. "They all want to pet, then they drop me because I won't let them, but I do want to go places and have a good time and have a beau like other girls."

For a tense second he was breathlessly still, then summing up all his courage, he plunged.

"I'll promise not to pet, if you'd consider me as a—beau."

"But—but I want you to pet," she flung at him desperately. "And you won't even look at me. That's what hurts me the most—never once asked me for a date or anything!"

"Am I living or dead?" he asked in a daze of incoherence as he stooped and reverently kissed her soft, curly hair.

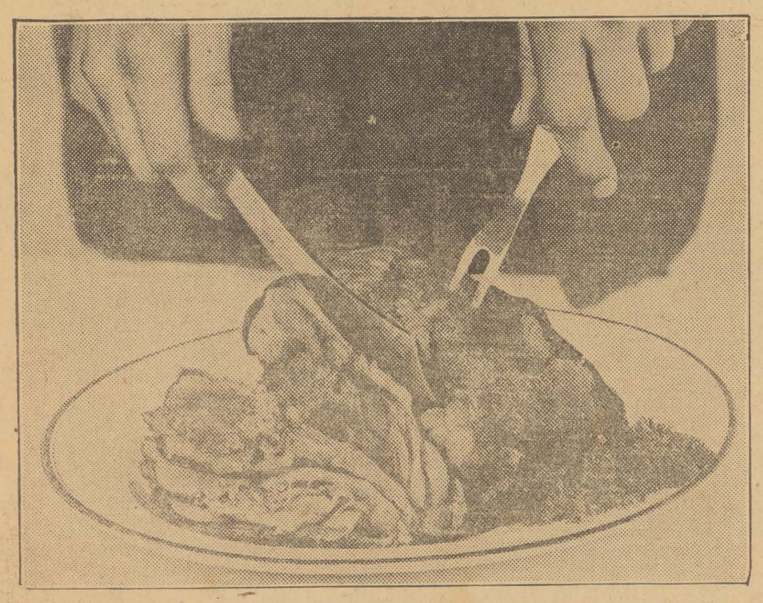

After that Sam lived in a world peopled by thousands of Graces. Grace smiling, Grace pouting, Grace condescending to be kissed, then as swiftly giving him an impulsive, ecstatic kiss in return, Grace laughing happily.

And Cupid smiled as he wrote down in his Book of Wiles:

"It is sometimes better technique not to pursue a pretty girl."

TENDER ROAST STUFFED SHOULDER OF LAMB

Carving Stuffed Shoulder of Lamb.

(Prepared by the United States Department of Agriculture.)

Many people think the meat of a shoulder of lamb is just as tender and quite as delicious in flavor as the leg or any other part. The shoulder is not so easy to carve as the leg, owing to the irregular shape and central position of the shoulder blade. This difficulty about carving is easily met, says the bureau of home economics. Select a shoulder of lamb weighing from three to four pounds. Have the butcher remove all the bones, as well as the fell, or outer papery covering of skin. The bones may be saved for making soup. The shoulder may then be stuffed, and either left flat or rolled. The flat shoulder, as illustrated, is easier to sew up than the rolled, and the pocket holds twice as much stuffing. Either of these completely boned stuffed shoulders can be carved straight through in attractive slices of part meat and part stuffing.

Wipe the meat with a damp cloth. Sprinkle the inside of the pocket with salt and pepper, pile the hot stuffing in lightly, and sew the edges together. Rub salt, pepper, and flour over the outside. If the shoulder has only a very thin fat covering, lay several strips of bacon over the top. Place the roast on a rack in an open pan without water. Sear for 30 minutes in a hot oven (480 degrees Fahrenheit). If bacon is laid over the roast, shorten the time of searing so as to avoid overbrowning. Reduce the temperature of the oven to 300 degrees Fahrenheit, and cook the meat at this temperature until tender. From 2½ to 3 hours will be required to cook a medium-sized stuffed shoulder at these oven temperatures. Serve hot with brown gravy.

Mint or Watercress Stuffing.

3 cups fine, dry bread crumbs.
½ cup fresh mint leaves, or 1½ cups finely cut watercress, leaves and stems.
6 tbs. butter
3 tbs. chopped celery
1½ tbs. chopped onion
¾ tsp. salt
⅛ tsp. pepper

Melt one-half of the butter in a skillet and add the onion and celery. Cook for two minutes and add the mint leaves or the finely cut cress and the other seasonings. Push this mixture to one side of the skillet and in the empty part melt the remaining butter and stir in the bread crumbs. When they have absorbed the butter, mix all the ingredients together. When using watercress allow the liquid which cooks out to evaporate before the buttered bread crumbs are added.

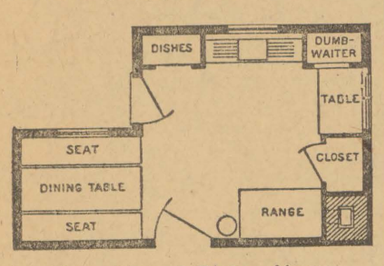

DINING ALCOVE HAS MANY USES

Nook in Kitchen Provides Place for Comfort.

(Prepared by the United States Department of Agriculture.)

Do you have a comfortable spot in your kitchen where you can sit down for some of your tasks? We hear much in connection with modern housekeeping about saving energy by sitting at one's work, and there is no doubt but that a high stool at the sink or ironing board is often a great help and back saver. There are many other kinds of work done in the kitchen, too, for which one might be seated if there was an inviting corner and comfortable working surfaces handy—shelling peas, stringing beans, picking over fruit for canning, even peeling potatoes and apples or capping berries, although these foods may afterwards have to be washed at the sink. One of the great advantages of a "breakfast alcove" or "dining recess" or whatever you like to call such a nook off the kitchen is that it provides just this sort of place for working in comfort. The top of the table is easily protected by paper or oilcloth if the work makes dirt. For many of these tasks two people join forces at times, and there is not room for both at the sink, but here a sociable half-hour can be made of an otherwise uninteresting task.

A place for keeping track of household expenses, particularly foods and kitchen supplies, is almost a necessity, and in such an alcove there is comfort, quiet, and order, and the records can be attended to in those intervals that occur while something is cooking, when there is not enough time to warrant going to another part of the house to sit. Meals can be planned here, too, with one eye on the leftovers in the refrigerator and the other on the grocery order. A small shelf

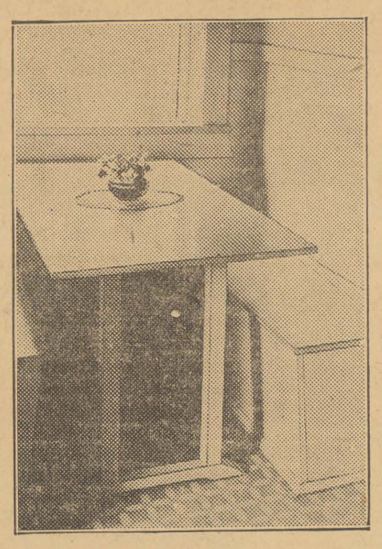

Floor Plan of Dining Alcove.

for cookbooks and records might be arranged at one side of such an alcove. Outside the window, a box filled with evergreens or flowering plants would add charm, just as does a bowl of flowers on the table.

In a small house the alcove sometimes serves every purpose of a regular dining room. In others it partly occupies the position formerly given up to a "butler's pantry," between the dining room and kitchen, where it is especially useful for hurried breakfasts and the housekeeper's solitary lunch. At dinner time, and on occasions when there are additional persons to serve, it is very convenient for spreading out salad or dessert plates to be filled, or otherwise to take the place of a serving center.

The floor plan, which is from Farmers' Bulletin 1513-F. "Convenient Kitchens," shows one way of arranging an alcove so that it is well situated in relation to other features of the kitchen. The window may be placed at the side or at one end of the alcove as in the other picture. If possible, alcoves should be located so as to face away from, rather than toward, the sink and stove. If the window frames a pleasant view rather than a wall, meals and work will be more enjoyable in the alcove.

The illustration shows an alcove which was part of the kitchen im-

Dining Alcove With Homemade Benches and Table.

provement in a Massachusetts farm home, carried out during a kitchen contest directed by extension workers. The table and benches were built by a member of the family. The benches have hinged tops so that they can be used for storage. The table in this instance is not hinged, but a tilting table is often arranged to permit easier cleaning of the alcove. This little nook seats four persons comfortably, but could have been made roomy enough for six or even more.

The bulletin on convenient kitchens may be obtained free from the United States Department of Agriculture.

Prolong Life of Hosiery if Rinsed in Cold Water

Most women know that silk stockings will wear much longer if washed, or at least rinsed in cold water, after each wearing. There is an acid in perspiration that rots fabric. Moreover, there is another reason, and it applies to all kinds of hosiery, even men's heavy socks. Indeed, it applies specially to them. Scientists have studied the effect of wear upon stockings with the aid of microscopes, and explain in that because the foot presses unevenly upon its covering, threads are stretched apart in places where the pressure is hardest, and with every day's wear, farther and farther, until so weakened that a break results, unless washing intervenes. Washing or rinsing readjusts the fibers, releasing the strain, as well as removing the corrosive acid. If this is done while the strain is yet slight, the stockings remain practically as good as new, and may be kept so for a surprisingly long time. Experience has proven this to be true.

VELVET GOWNS FOR EVENING; BORDERED WOOLENS POPULAR

GORGEOUS EVENING GOWN

QUALITY of the most exquisite, color of subtle beauty, simplicity of utmost sophistication, these three graces unite to the glory of the beauteous evening frocks which are fashioned of the new delicately sheer and transparent velvets.

Though to all appearance formal velvet modes bespeak simplicity, in reality they represent most sophisticated styling. In fashioning them so conspicuously free from superembellishment the designer employs that "art which conceals art." The lovely gown in the picture is of this sort. It is so charmingly unaffected and yet its superiority is recognized at a glance.

With that touch which only genius gives, the skirt acquires a fluent fullness which at the same time contrives to preserve a slender silhouette. The one-side dip of the hemline and the fitted hipline are also adroitly featured. A motif worked in tiny pearls and rhinestones is positioned at the left hipline where it holds the fullness of the side drape in perfect pose.

So much depends on color choice, this season, for there is genuine class distinction in tones and tints. There are the new off-whites, for instance, they are just enough away from ordinary white, to give an air of supreme refinement. Eggshell is one among many new tints which are adorable. French women are quite taken with baby blue for evening wear. The velvet of which the classic gown in the picture is fashioned is in this choice color.

Some very unusual effects are being achieved in modern velvet. An enchanting new velvet for the evening frock is in a vanilla tone with an illusive flower print which is only revealed in certain lights. For sumptuous evening wraps velvet with an introduction of metal design is much employed.

Velvet ensembles for evening present a new and fascinating theme. A banana colored transparent velvet dress and wrap with a cream-tinted fox collar makes a pretty picture and in any other of the fashionable tones and tints it would be equally as effective. Most of the wraps are styled in cape fashion. Perhaps the newest cape modes are those which stress the simple circular style with gorgeous fur collars. However, fanciful velvet creations which are shirred and draped are also prominent in the formal style picture.

Among formal wraps, velvet shawls are a subject of much interest. For these huge squares of sheer velvet are bordered with hand-knotted fringe. They are gorgeously handpainted, both in modernistic patterning or with colorful floral motifs. These elaborate evening fantasies are in white and pastel shades, also black. Frequently the hand-painted designs are outlined with metal thread stitchery which is extremely effective.

It is an exceedingly designful season so far as fabrics are concerned. If patterned effects are not achieved in one way then they are in another. That is, the motif may be woven into the very woof and warp of a material or it may be painted or embroidered, or a method which is outstanding is that of working insets and seamings of various cloths in a way to produce startling modernistic design.

Among registrants in the vogue for patterned effects, are many novelty woolen weaves with fancy interwoven borders. These colorful borders inspire a pretty play of imagination on the part of the stylist, whose mission it is to use them in a trimming way.

Coats, in particular, are styled of handsome bordered woolens this season. A swagger coat of rayon and wool bordered cloaking is worn by the seated figure in the picture. It is one of those unfurred models which is distinctly patrician and which so appeals to women of discriminating taste. It has this virtue, too. It sounds a new note, being so colorfully and so fancifully self-bordered.

A very clever model, also, is the coat shown to the left. Using the striped portion at the underarm seams has a tendency to give a slenderized silhouette. The bordered part likewise forms verw attractive tuxedo revers down the front of the coat.

Many of the new woolens have very elaborate wide borders, which are colorfully interwoven perhaps in geometric patterning or as is sometimes the case in ombre colorings which blend from light to dark.

Sports coats especially are made of these bordered woolens, some of which show very wide effects elaborated with tapestry designs, the top of the fabric being in tweed effects or showing all-over jacquard patternings.

For dress trimmings handsome borders are accomplished by seaming stripes of the material together, using several colors. Very attractive jersey and light-weight woolens are being made up in this way. Then, too, for dressier frocks borders are accomplished by seaming ribbons of various colors together.

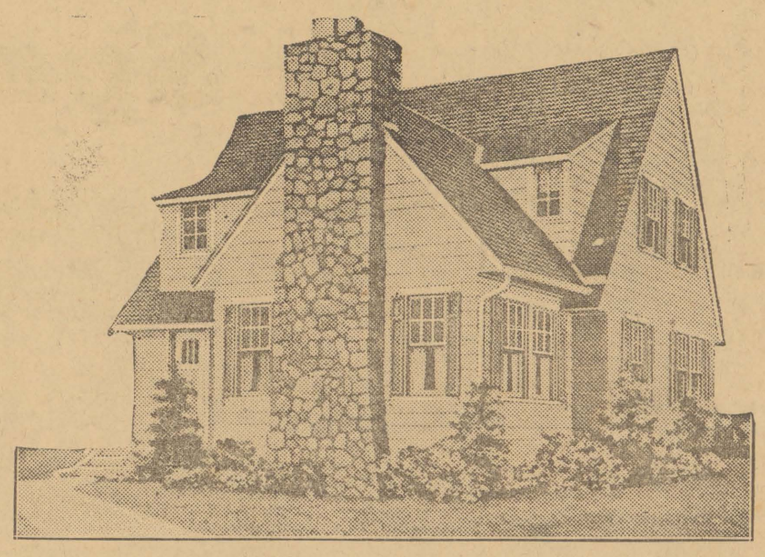

JULIA BOTTOMLEY.

TWO AUTUMN COATS

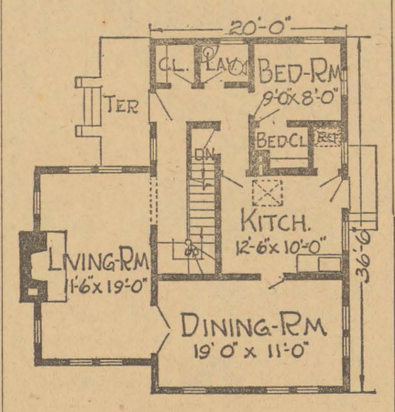

Boulder Chimney and Wide Siding Add Beauty to Seven-Room Home

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

The use of boulders, or field stone, in home construction has become quite popular of recent years and when properly used it adds greatly to the charm of the home. Such boulders are most commonly seen in connection with brick construction, as ornament, but are equally appropriate for the frame house, especially with wide siding or shingled walls. With frame construction they may be used

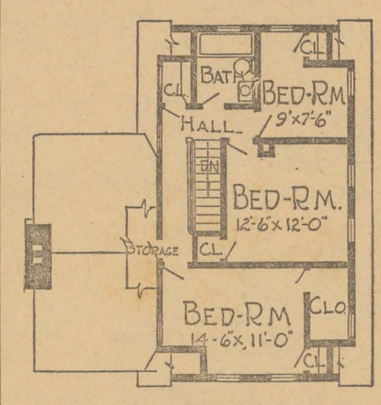

First Floor Plan.

effectively either in foundation or chimney, as in the home illustrated here.

This little home is simple, but especially pleasing in appearance, largely because of the broken roof lines and boulder chimney. The whole design is well balanced even to the placement of windows which is rather a problem in view of the unusual floor plan.

This floor plan shows a house of seven rooms, bath and extra lavatory, a surprising amount of space for a

Second Floor Plan

home which appears quite small from the outside. The arrangement of these rooms is one which can well be studied, not only because it is unusual, but because it is remarkably convenient.

The living room projects from the rest of the building at the front. It is connected with the entrance hall and the dining room, an arched opening being used at the former doorway. This entrance hall is long and narrow and is shaped like a letter "L." It also gives access to the stairs, a first-floor bedroom and the kitchen. Off of it are the extra lavatory and a large coat closet.

The first-floor bedroom, though small, is provided with a bed closet which greatly increases its useful space. Upstairs there are three more bedrooms and bath, a linen closet in the hall and storage space above the living room all arranged, in relation to the hallway, in much the same manner as the first floor rooms.

Choose Proper Location for Your Refrigerator

There is no other article of kitchen equipment more important than the refrigerator. Upon its efficiency depends the success or failure of the meal.

And it is the most important factor in the preservation of nutritive value, the vitamine content of the various foods which comprise the meal. For this reason the refrigerator merits serious consideration in every matter that may effect its proper functioning.

One of these conditions, of course, is the location. If the refrigerator is placed too near the stove, for instance, it is very difficult to maintain the proper temperature, and inevitably calls for a large ice consumption.

A room in which extremes of temperature prevail is also a poor place, or where the sun shines on it for a long period of time, or where there is excessive moisture in the air.

All of these things should be taken into consideration, as they seriously affect preservation and produce very unsatisfactory results.

On the other hand, some thought should be taken on the convenience of arrangement.

It is well to have it as close as possible to the back door, so that the iceman can reach it easily and as close to the work table as possible, in order to save steps.

But, first of all, aim for the location which insures the greatest efficiency; a place of moderate temperature, normal atmospheric conditions, and where the same amount of circulation prevails constantly. Then place it as conveniently as possible.

Brass Piping Feature of Well Planned Home

Brass piping in all water lines is an effective agent in the establishment of that psychological correctness now being emphasized in home design. Authorities point out that it insures against two major factors which militate against proper enjoyment of home benefits, one suffered by the woman, the other by the man of the household.

There is considerable perturbation when the woman sees cherished hangings, decorations and furnishings ruined by water leaks, and when the man is confronted with repair bills made high because inaccessible water pipes must be torn out and replaced.

Wood Lath in Multiple

Wood lath formed into units of eight and reinforced at the center are now available as a time-saving material which is claimed to be much stronger than ordinary wood lath.

One-Panel Type Doors Combine Color, Beauty

Substantial workmanship and graceful design are combined in a one-panel door widely distributed for home construction in this country in which several unusual patented features are utilized to prevent warping and shrinking.

The "door within a door" construction is utilized in the manufacture of both hardwood and softwood doors of the one-panel type, veneered with species of woods which successfully take any decorative application.

The importance of the expanse represented by doors in interior decoration is being more widely recognized by specialists in the art with the general introduction of rather brilliantly colored interiors.

Attractive colors are well set off by the graceful design of the one-panel door, in which the proportions of the panel, molding, stiles and rails are carefully worked out to artistically fill the space, or mass, which the door represents. The close-grained wood of this door is well adapted to any process of painting, enameling or staining.

Door Checks Are Useful Part of Home Hardware

Door checks are a useful addition to the hardware of the house. They eliminate banging and prevent double-swinging doors, such as those between dining room and pantry, from passing the center.

Such a door swinging freely without a check is frequently a source of accident and injury. Other places where door checks serve a good purpose are the screen doors to prevent banging, the butler's pantry door to expedite quiet service, mirror-door closets to prevent slamming and the possible breakage of glass and front and rear doors to eliminate drafts.

Door checks may be had in two types, one attached to the top of the door and the other sunk in the floor. Both may be bought with the adjustable feature which permits the door to be held in a desired position until released by hand or foot, according to the location of the check.

Drawer trimmings in built-in closets and cabinets are worth consideration. If pulls are used they should allow enough space for the hand.

Harmony in Floorings

Harmony in the interior decoration of the home depends to a great extent upon the flooring. Until recently people gave little or no thought to this really important feature in home building and decorating.

Foolish Communist

Representative Albert Johnson said to a Washington reporter the other day:

"It's an ill wind that blows nobody any good, and the Sacco-Vanzetti business is going to clean the United States of Communists forever.

"'What is a Communist?' a lady asked me in Hoquiam.

"'A Communist,' said I, 'is a man who looks down on those above him.'"

The Rosiclare mine in the southern part of Illinois is the largest fluorspar mine in the United States and possibly in the world.

"WORTH WEIGHT IN GOLD"

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sanative Wash. The medicines that will do for me what the Vegetable Compound and Sanative Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound."—MRS. CHARLES MORGAN, R. F. D. 1, Tully, N. Y.

Headache?

Instead of dangerous heart depressants take safe, mild and purely vegetable NATURE'S REMEDY and get rid of the bowel poisons that cause the trouble. Nothing like NR for biliousness, sick headaches, and constipation. Acts pleasantly. Never gripes.

Make the test tonight—

NR TO-NIGHT TOMORROW ALRIGHT

At Druggists—only 25c

HIS AMBITION

"Ambition," said Norbert Quinn, "is a funny thing. My friend, Christopher Morley, prince of fantasy and Twentieth century Elizabethan, confided that he wished that he could draw and also that he could write successful plays.

"Quite in contrast is my little friend. William, who is saving up money to buy an airplane. 'It's quite a worthy motive,' I told him. 'You are quite an ambitious boy.'

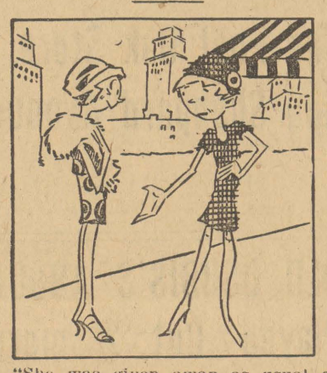

"'You bet I am!' William agreed, and added, 'You see, I want to fly over Bobby Willet's yard and drop down bricks on him.'"—Los Angeles Times.

Got Him, Anyway

The Accused—Judge, it ain't no crime to be poor. Beside, I work mighty hard sometimes findin' jobs for my wife.

The Judge—You're right. It is no crime to be poor, but it is to run an employment agency without a license. Twenty-five and costs.

FOUND SHE'D BEEN SOLD

"She was given away as usual at her wedding, I suppose?"

"Oh, yes, but recently found she'd been sold."

Self-Perfecting

"Practice maketh perfect,"
The proverb so doth teach—
Especially if we practice
The fine things that we preach.

Gooseflesh Barred

An old Southern planter was discussing the hereafter with one of the colored servants. "Sam," he said, "if you die first, I want you to come back and tell me what it's like over there. If I die first, I'll come back and tell you what it's like."

"Dat suits me, Massa," replied the old negro, "but if you dies first, Ah wants you to promise me dat you'll come back in de daytime."

That's Essential

"Yesterday you were not at the office, saying you were ill, and I saw you on the street."

"Yes. I was going for the doctor."—Buen Humor, Madrid.

KNEW FOOL'S GOLD

Reggie—I have no trouble, Miss Sharpe, in telling fool's gold.

Miss S.—Oh, I'm sure you can tell how much money you have, Mr. Sapp.

Obscure Contributor

The fish that's landed as a prize,
For admiration comes to view;
But has no chance to realize
The honors that to him are due.

A Lesson in Geography

"The world is round, isn't it?"

"Supposed to be, yes."

"Well, if I wanted to go east I could eventually get there by going west, couldn't I?"

"Say, what are you, a taxi driver?"—Successful Farming.

The Aftermath

"Mrs. Smith seems to have got over the death of her first husband."

"Yes, but her second husband hasn't."—Nagel's Lustige Welt, Berlin.

The Great Inducement

Blanche—Sad about Mrs. Sanford biting her tongue off, wasn't it?

Florence—Yes, but there was compensation even in this misfortune.

Blanche—How so?

Florence—Her husband stays home evenings now.

Great Day for Them

"Bill's a bit of an egotist, isn't he?"

"Egotist! Say, when that fellow has a birthday he wishes his friends many happy returns of the day."

Rid of Constipation, Improved Both Health and Looks

"I suffered from stomach and bowel trouble for a number of years. I finally got so bad that I had no life or energy left, and felt that there was no help for me. I was completely worn out all the time, had a distressed, haggard look on my face. My mind was dull, my eyes blurred, and I was unable to take an interest in anything.

"I commenced using Milks Emulsion in May. It occurred to me that the best way to let you see the wonderful improvement Milks Emulsion had made in my health and appearance, would be to send you the picture that I happened to have taken a few weeks before I started using your Milks Emulsion, and to have another picture taken now, and send both to you.

"I am still taking your Milks Emulsion and improving each day. I know I would have been in my grave had it not been for your Emulsion. I love to take it. It is so pleasant and agreeable.

"I only weighed 108 pounds when I began to use Milks Emulsion, and now I weigh 138 pounds. It has cleared up my complexion, made my eyes bright and a difference in my looks, as you will see by the two pictures. I don't look like the same woman. To my mind it is Nature's beautifier.

"I try to get everyone that I meet to take Milks Emulsion as it is the most wonderful medicine in the world." Yours truly, MISS SARAH KATE KNIGHT, 722 Anderson St., Bristol, Tenn.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

Had to Come Again

Pedro Martinez, twenty-four, "no spik much Englis," but he knows how to make love. Pedro went to see Police Judge Wade Moore at Pittsburg, Calif., with Francisca Garcia, Francisca had just arrived from Mexico and Pedro made the judge understand they wished to be married. Pedro proudly displayed his license, obtained earlier in the day from the county clerk, and prepared to say "I do." Before the judge tied the knot he scrutinized the license and discovered that it permitted Pedro to fish in California.

STOP THAT ITCHING

Use Blue Star Soap, then apply Blue Star Remedy for Eczema, itch, tetter, ringworm, poison oak, dandruff, children's sores, cracked hands, sore feet and most forms of itching skin diseases. It kills germs, stops itching, usually restoring the skin to health. Soap, 25c; Blue Star Remedy, $1.00. Ask your druggist.—Adv.

Sailing Vessels Passing

Full-rigged sailing vessels, once the pride of Sweden's ocean commerce, are being driven from the trade lanes by steam and motorships. Only six of the old wind-jammers are in service and not one of the brigs is carrying cargoes where in 1905 there were 230 full-rigged ships and 60 brigs flying the Swedish colors.

WELCOMES SON REARED BY MAIL

Mother Sees Boy for First Time in 49 Years.

New Orleans, La.—Separated 49 years by the wide gulf of Atlantic, a mother and the son she reared by mail now ar reunited.

Mrs. Mary Ann Tiernan Moonan has seen her son, George A. Moonan, Dublin barrister, for the first time since he was seven years old.

Although related by the closest of blood bonds, they met virtually as strangers.

The man barely remembered the mother who had left him with relatives in Ireland when she left that country to visit her father and mother, who had migrated to New Orleans.

Moonan's mother never returned. She kept constantly in touch and directed his rearing by mail. On numerous occasions she planned to go back to her native land, but as time sped on, the old ties weakened and the new ties strengthened.

It was tomorrow for her and tomorrow never came. But now this slender woman of eighty-two is planning to sail for Ireland under the protecting arm of her fifty-six-year-old son.

She would not come to him so he came to her. The mother had turned deaf ears to his cabled and written pleas to return to her native shores so Moonan came to plead his case in person.

With the picture of her relatives waiting to receive her in old Ireland she capitulated, packed her belongings and is ready for the journay.

"Old scenes, old songs, old friends again," is the thought that is carrying Mrs. Moonan over the ocean.

Sea's Salt Plant Yields Six Billion Tons a Year

Leningrad, U. S. S. R.—Six billion tons of the commercially useful chemical, Glauber's salt, is made available each year by a natural evaporation plant on the eastern shore of the Caspian sea.

This outdoor chemical factory, built by the sea and operated by the sun, is the shallow, narrow-mouthed Gulf of Kara-Bougaz.

Through its connecting strait, which is only about 800 feet wide, the heavily salted waters of the Caspian flow in a steady torrent, for the higher rate of evaporation in the shallow gulf keeps its level about a foot lower than that of the main body.

During the summer the temperature of the water is high enough to keep all the salts in solution, but in winter the water temperature drops to a few degrees above freezing, and according to the well-known laws of solution the least soluble minerals crystallize out first.

In this case the Glauber's salt is the only one that comes out; the others, principally common salt, sodium sulphate and magnesium chloride, remain in solution.

The Glauber's salt crystals settle on the bottom and are washed ashore by the waves. When they dry they are picked up by the wind and carried still farther from the water.

Navy Plane Scoops Up Gold in Nicaragua Mine

Washington.—Mining gold with an airplane is the most bizarre of all tales yet to come to the Navy department here from the marines in Nicaragua. Captain Howard, marine corps pilot, made a forced landing with an amphibian plane—so goes the story—in the jungle area near the La Puz mine and his pontoon scooped up earth heavily laden with gold.

Corporal Cole, observer aboard the plane, panned out $100 worth of yellow metal with ease, says the Managua report. The marooned aviators were rescued by other planes the following day and were returned safely to Managua—with the gold as evidence.

Scale Mount Baker

Fort Portal, Uganda, Africa.—The Chicago Geographical society expedition to the Mountains of the Moon planted the American, British and Explorers' club flag on the summit of Mount Baker, August 26. The climb and descent was attended by great hardship, the party having to contend with snow storms most of the way.

Bees Hold Business Section Two Hours

Westwood, N. J.—This town suspended business for two hours when a swarm of bees took possession of the principal corner, Westwood and Center avenues.

The first intimation came when Dr. F. C. Young hopped into his car, and hopped right out again. He waited a while, but the bees refused to abandon his machine, and he had to resort to a taxicab. Stores closed doors and windows, and the bees tried particularly hard to enter the Waller department store. Furtive individuals darted down the streets, but most of them were stung.

Finally an unidentified citizen, experienced in the ways of bees, brought a hive, mosquito netting and smokepot, and soon had the swarm captured.

10 minutes ago-

How many people you know end their colds with Bayer Aspirin! And how often you've heard of its prompt relief of sore throat or tonsilitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Entered as second-slass mailat the Lufkin, Texas Post Office under the act of March, 3, 1879.

FOR PRESIDENT!

Gov. Alfred E. Smith

REPUBLICANS ARE SUPPORTING SMITH

Many Prominent Men Throughout Nation Break Life-Long Party Ties.

Hundreds of life-long Republicans, many of them of national prominence, are swelling each day the vast army of voters who believe that it is the duty of every thinking American to support Governor Smith.

Among the most recent of leading Republicans who have publicly repudiated the Republican candidate is Rudolph Spreckels, widely known banker and business man of San Francisco, owner of huge sugar plantations in Hawaii, and formerly a close friend and adviser of President Roosevelt.

Another influential Republican to declare for Smith is Spencer Penrose of Colorado, mining engineer and brother of the late Senator Boise Penrose, Republican leader in Pennsylvania.

Prominent Financial Figures

One Republican of considerable consequence who has just declared for Governor Smith is W. B. Hibbs of Virginia, president of W. B. Hibbs and Co., bankers, of Washington, D. C.

Two prominent New Jersey Republicans, John J. Stamler, president of the Broad and Market National Bank and Trust Co., of Newark, and Uzal H. McCarter, president of the Fidelity Union Trust Co., of Newark, announced last week that they will support Governor Smith.

Another Republican banker to join the campaign to elect the Democratic candidate is De Lancey Kountz, Chairman of the Board of Devoe and Raynolds Co., of New York.

Western Farm Leaders

Frank W. Murphy, chairman of the Legislative Committee of the Corn Belt Federation of Farm Organizations, and a member of the Minnesota delegation to the Republican Convention, has renounced allegiance to his party and repudiated Hoover as "an enemy of the farmer."

Other farm leaders to bolt the Republican party were Governor Adam McMullen, Republican Executive of Nebraska, and L. F. Shuttleworth, of Indianapolis, former head of the purchasing committee of the Indiana Federation of Farm Bureaus.

"YOUTH ENDANGERED"

PHILADELPHIA.—James F. Lucas, vice president of the Lucas Paint and Brush Company of Philadelphia, a well-known Republican for fifty years, has announced that he is "opposed to hypocrisy" and, accordingly, opposed to the election of Herbert Hoover. He added:

"I shall vote for Governor Smith because I believe his election would end conditions which are endangering the future of the younger generation."

DANIELS REBUKES STRATON

RALEIGH, N. C.—Rebuking Dr. John Roach Straton for expressing the belief that "my old friend," Josephus Daniels, would bolt the Democratic party, the former Secretary of the Navy has again emphatically declared, in a letter to the New York pastor, that he will support Governor Smith. Mr. Daniels wrote:

"I believe I can serve the cause of prohibition and temperance better by remaining in my party than by supporting Mr. Hoover, who sat in the Cabinet with Harding with all the corruption and with Coolidge with all the favoritism—the two administrations, which, by flagrant failure to enforce the law or to give it legal and moral support, have done more to harm prohibition than its open foes."

W. C. T. U. WORKER FOR SMITH

KNOXVILLE, Tenn.—Mrs. Lucy Reed, member of the W. C. T. U. for thirty years and an active prohibition worker, is an ardent supporter of Governor Smith. As a genuine Dry she dislikes the illegal "wetness" of the Republican party, she says; and she adds that Governor Smith "is honest and will enforce the laws."

RASKOB URGES WOMEN TO VOTE

Points Out Gov. Smith's Welfare Record, His Legislation in Behalf of Women.

ALL HAVE RIGHT TO BALLOT

(This is the second of a series of campaign discussions by John J. Raskob, chairman of the Democratic National Committee.)

By JOHN J. RASKOB

Never before has a campaign presented issues of such vital importance to the wives and mothers of the nation. The American home should be represented in full voting strength at the polls.

The nation in normal times makes tremendous demands upon the American woman. In times of stress the country calls upon its womanhood to risk a surrender of future happiness.

American womanhood can protect the home against unworthy officials by choosing worthy ones on election day.

The woman's viewpoint has become essential to the peaceful prosperity of the nation. This viewpoint can only be translated into national action by the exercise on the part of the women of their voting right. In the 1920 election only 37 per cent of the popular vote was registered by the women. More than half of the women of voting age refrained from casting their ballots.

A particular appeal is being directed by both parties to the women for their votes. The Democrats are basing their appeal on the social welfare record of Governor Alfred E. Smith, the Presidential nominee. His accomplishments in behalf of women in industry, in the fields and in the homes, the mothers and future mothers of our people, testify to his sincere regard for the home.

The Republican campaign among the women consists largely of subtle, whispered suggestions concerning social and religious distinctions.

Foreign-Born Women

The foreign-born woman married to an American citizen from whom America has the right to make all demands for services in time of peace and war, must not be deprived of her vote due to lack of information as to her rights. The laws of the country affect her home to the same extent as any other.

There are over one million foreign-born women who are entitled to vote. It has been brought to my attention that election boards in some sections of the country are refusing to register such women on the ground that they are not citizens.

It should be understood that any woman, who, prior to September 22, 1922, married a citizen is a citizen of the United States by the very fact of her marriage. Further, any foreign-born woman who became a citizen of the United States by marriage retains her citizenship though divorced or separated from her husband, as long as she resides in the United States.

Election officials should be fully acquainted with the laws in relation to citizenship, and those who have barred foreign-born citizens from registering on that ground have committed a grievous wrong.

Offers Aid

The Democratic National Committee is prepared to answer all questions on this topic and attention will be given to each individual case so that the foreign-born women will be fully informed of their rights. I will welcome letters addressed to me personally by women who have been denied registration and I will see that such cases are completely answered by the lawyers' committee of the Democratic National Committee.

The voting right is one of the highest privileges of citizenship, and no woman should have any sense of embarrassment about registering and voting. The vote came to our women after one of the greatest political crusades in the history of the world. The vote has a value to every woman. Properly cast, it means a better home protected by a better government. It is at the same time a high civic duty and an important privilege. To vote is elevating, not degrading. Do not be ashamed or afraid to vote. Let your home express itself in the affairs of the nation.

See that you are on the Registration List so that you will be eligible to vote on Election Day.

GOV. SMITH VISITING WESTERN CITIES

Citizens of seventeen cities between New York and Helena, Montana, will have had a close-up view of Governor Alfred E. Smith, at the conclusion of his present campaign tour through the West.

The Governor's schedule calls for speeches at Omaha, Oklahoma City, Denver, Helena, Minneapolis and Milwaukee. His itinerary is as follows:

Sept. 17, Chicago; Sept. 18, Omaha; Sept. 20, Oklahoma City; Sept. 21, Newton and Dodge City; Sept. 22, La Junta and Denver; Sept. 23, Cheyenne; Sept. 24, Billings, Butte and Helena; Sept. 26, Bismarck and Fargo; Sept. 27, Minneapolis and St. Paul; Sept. 29, Milwaukee; Oct. 1, Rochester, N. Y.

Governor Smith's speeches will be broadcast over a hook-up of radio stations reaching from coast to coast.

What Is a Democrat?

By HON. ROBERT L. OWEN
(Former Senator from Oklahoma)

One who believes in freedom of speech, in freedom of the press, in freedom of religion, in the equal rights to every person to life, liberty and to the pursuit of happiness, and who believes in the principles of the Constitution of the United States properly interpreted.

* * *

He opposes all attempts of self-seeking interests to control the operations of the Government to private advantage at the expense of the public. * * *

A Democrat may be a Catholic or Protestant, Jew or Gentile, of any race whatever, and a Democrat may either favor the Volstead Act or oppose the Volstead Act. He is liberal as opposed to ultra-conservatism. From the Congressional Record.

GOV. SMITH IS BETTER FITTED TO HEAD NATION

Eminent Republican Banker Calls Him Master of Science of Government.

HOOVER LACKS DIPLOMACY AND COURAGE, HE SAYS

Jerome Davis Greene, Rockefeller Associate, One of Many Frominent Figures Who Repudiates Party's Candidate.

Describing Governor Smith as probably the greatest living master of the science of governmental reorganization, Jerome Davis Greene, the banker who is associated with John D. Rockefeller in the management of the vast Rockefeller business and philanthropic interests, has declared in a letter to the Editor of the New York Times that he will support the Democratic candidate.

Mr. Greene, a Republican and Congregationalist, is a director in many great corporations and an officer and member of many scientific organizations. In his letter, which was not solicited by the newspaper nor by any political organization, he comments that Hoover's supporters urge his election on the ground of his administrative ability. That, he asserts, is an obvious fallacy.

Pointing out that whatever success Hoover achieved as a food administrator was due, not to courage or diplomacy, but to the almost autocratic power with which he had been invested, Mr. Green continues:

"The candid and gallant stand which Governor Smith has taken upon the subject of prohibition by Federal enactment as an instrument of social reform, and the outstanding importance of the issue thus presented, has somewhat obscured in the public mind his legitimate claim to preference over Mr. Hoover in respect to the one qualification which is urged, with perhaps more emphasis and greater sincerity than any other, in support of Mr. Hoover.

Science of Government

"Many, especially those who live outside of the State of New York, are perhaps unaware of the fact, known to all students of recent advances in the science of governmental organization in this country, that there is probably no man in public life more familiar with the theory and recent improved practice of that science than the present Governor of the State of New York.

"Governor Smith has made a record of which the people of his State are justly proud. Moreover, it is a record made by an avowed political partisan who has subordinated his political partisanship in those matters to the higher call of loyal citizenship and enlightened statesmanship. In so doing, he has more than once found himself a willing and welcome collaborator with like-minded men whose political partisanship was hostile to his own.

"If all this be of Tammany, let us have more of it."

Philanthropist Supports Governor

Another eminent financial figure who has added his name to the long list of leading Republicans to declare for Governor Smith, is E. S. Harkness, capitalist and philanthropist, and one of the largest holders of railroad securities in America. Sending a $10,000 contribution to the Smith campaign fund, Mr. Harkness wrote:

"Any nation that can produce a real leader is to be congratulated and I cannot but feel that Governor Smith has demonstrated to the people of this country that he possesses rare qualities of leadership."

Among other wealthy and prominent Republicans who have recently bolted their party to support Smith, are Charles W. Clark, mine owner, and son of the late Senator William A. Clark of Montana, who has voted the Republican ticket since 1896; Haley Fiske, president of the Metropolitan Life Insurance Co., who is actively identified with the affairs of the Protestant Episcopal Church, and Thomas Gerald Condon, railroad builder with vast holdings in the coal and iron regions.

FARMERS IGNORE HOOVER

Corn Belt Leaders Refuse to Confer With Republican Candidate

ST. PAUL, Minn.—Declaring that any farmer who supported Herbert Hoover would be "a traitor to the cause of agriculture," A. W. Ricker, Secretary of the Corn Belt Federation of Farmers, pointed out, in a statement issued here, that not a single recognized farm leader had accepted the Republican candidate's invitation to meet him and "talk over the situation." He said:

"We have good reason for not wanting Mr. Hoover. We know him and his methods. We have been up against his stubborn opposition for eight years."

When Herbert Hoover says that he also has been personally attacked, he probably refers to the things the Republican candidate for Vice President said about him before the Kansas City convention.

RUNNING MATE of Governor Smith in the Presidential campaign, Senator Joseph T. Robinson of Arkansas, is heading a drive by 250 well-known speakers to elect the Democratic ticket.

Freemason Who Opposes Smith Betrays Order

A Freemason is disloyal to his order and betrays it if he opposes the election of a Catholic to the Presidency on religious grounds, according to Supreme Court Justice Townsend Scudder, former Grand Master of Masons in New York State.

In a letter to William Ritchie, Jr., a fellow Mason of Omaha, Nebraska, and chairman of the Smith-for-President clubs in that state, who had telegraphed that some Masons were refusing to support Smith, Justice Scudder wrote:

"There is no connection between my Freemasonry, the Governor's Catholicism and my advocacy of his election as President. Freemasonry has no concern with any man's religion other than to exact of its members belief in God and moral lives. Governor Smith is a God fearing man, a churchman and lives a moral life.

"It follows then that a Freemason is disloyal to his order and betrays it who opposes Governor Smith's election solely because the Governor is a Catholic, and such an one is also disloyal to our country because he applies a religious test as a qualification for office which the constitution of the United States forbids.

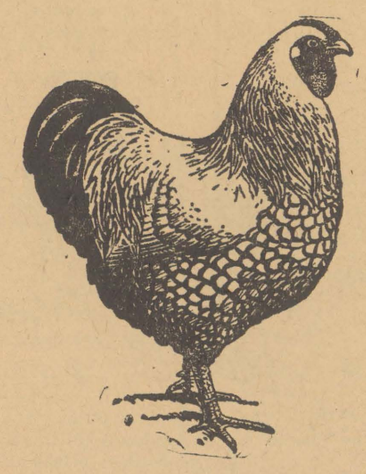

"Governor Smith to my mind typifies the spirit and genius of America. His life and attainments are, and ever will be an inspiration to our youth. I support him for the Presidency for the very reasons which impelled my forbears to support Abraham Lincoln."

Justice Scudder is a former member of Congress and has served as a member of the Supreme Court bench of New York State almost continually since 1907.

M. E. BISHOPS REBUKED

RICHMOND, Va.—Severely rebuking four Methodist Episcopal bishops for "attempting to use the Church organization to promote the election of Herbert Hoover," 139 "members and supporters" of that Church passed a resolution here condemning the "organized assault which is being made upon the Democratic organization of every Southern State."

Among the signers of the statement were Henry C. Stuart, former Governor of Virginia, and Representative George C. Peery of Virginia.

Car Load Wanted

P. H. BOWERS WANTS TO BUY YOUR CHICKENS-Ducks-Geese and Turkeys bad enough to PAY you more than any-body.

Prices are good this week!

Be sure and see ME FIRST!

I have moved my Poultry market to The Post Oak Store, Corner of S. Third St. and Sheppard Avenue. Lufkin, Texas.

OLD DOBBIS'S ABOUT Played Out:-2 more issues end Volume 17 since Sep. 1911.

Monday, we sounded out a few merchants who herrtofore advertised with us, and some decided if we would't pay for others folley that they'd ont patronise us. We will continue, after the 12th as a Semi-or a Monthly.

To those who want Shrubberry or Fruit Trees if you will see me at my office or in town, I'll give you one fourth off Catalog Prices,

SPEAKERS INVADE WEST AND SOUTH

Senator Robinson to Lead Noted Men and Women in Campaign Launched This Week.

A nation-wide speaking campaign in behalf of the candidacy of Governor Smith will be launched this week by 250 well-known men and women, it was announced by Senator Millard E. Tydings of Maryland, Chairman of the Speakers' Bureau of the Democratic National Committee.

Senator Joseph T. Robinson, candidate for Vice-President, will make a long tour through the Southwest, up the Pacific coast and back through the Northwest. His itinerary follows:

Springfield, Mo., Sept. 27; Kansas City, 28; Columbia, 29; Wichita, Kans., Oct. 1; Tulsa, Okla., 2; Muskogee, 3; Chickasha, 4; Clovis, N. Mex., 5; Roswell, 6; Phoenix, Ariz., 8; Los Angeles, Cal., 9; San Francisco, 10; Reno, Nev., 11; Portland, Ore., 13; Seattle, Wash., 15; Ogden, Utah, 16; Casper, Wyo., 17; Cheyenne, 18; Hastings, Neb., 19; Lincoln, 20; Sioux City, Ia., 22; Sioux Falls, S. D., 23, and Fargo, N. D., Oct. 24.

Southern Senators

Here are some of the other speakers and their schedules:

Senator Lawrence D. Tyson of Tennessee: North Carolina, Sept. 24, 25, 26; West Virginia, Sept. 27, 28, 29; Kentucky, Oct. 1, 2, 3.

Senator Sam G. Bratton of New Mexico: Missouri, Sept. 24, 25, 26; Oklahoma, Sept. 27, 28, 29.

Senator Morris Sheppard of Texas: Tennessee, Oct. 1, 2; North Carolina, Oct. 3, 4; Virginia, Oct. 5, 6; Kentucky, Oct. 8, 9, 10; Indiana, Oct. 11, 12, 13; Nebraska, Oct. 15, 16, 17; Kansas, Oct. 19, 20; Oklahoma, Oct. 22, 23, 24, 25; New Mexico, Oct. 26, and Arizona, Oct. 27.

Former Senator James Hamilton Lewis of Illinois: Indiana, Sept. 24, 25, 26; Kentucky, Sept. 27, 28, 29; Tennessee, Oct. 1, 2; Missouri, Oct. 3, 4, and Nebraska, Oct. 5, 6.

Vote For Smith Is Worth $50 An Acre to Farmer, Says Republican Banker

KANKAKEE, Ill.—"Fifty dollars per acre for your vote!"

That slogan in big black type is appearing in local newspapers at the head of full page advertisements which are being paid for by F. G. Snow, local farmer and banker.

Mr. Snow, one of the leading Republicans in the community, points out that farm lands on the average are worth $50 less an acre than they were seven years ago and calls upon all Republicans to repudiate Hoover and the Coolidge policies. He said:

"Though I have always been a strong Republican, I would be a second Benedict Arnold to the people who patronize my bank if I supported my party's Presidential nominee this year. The prayer of the farmer today is not for rain but for the election of 'Al' Smith

"As the head of a large bank in the farming district I daily come into contact with numerous farmers who face ruinous conditions. The advertisement is my contribution to defeat Herbert Hoover, the farmer's archenemy and the very man who was responsible for maintaining the fixed prices on wheat and hogs, to the disadvantage of the farmer, during the war.

"I have had many requests from Indiana, Iowa, Tennessee, Kansas, South Dakota, Nebraska and Montana for permission to reprint it." In the advertisement, Mr. Snow said:

"Mr. Farmer, in pre-War days every acre of good land was worth from $25 to $75 more per acre than it is worth today, and for what reason? Farmers are now paying a tariff-protected price for nearly everything they buy, and because of a small surplus, are compelled to sell what they produce at prices unprotected by the tariff, for their tariff is absolutely ineffective because of a small surplus.

"Nearly four years ago Mr. Coolidge was elected President on a platform containing a strong farmer-aid plank. Since his election he has done nothing to relieve the depressed agricultural conditions, but has twice vetoed a farm-aid McNary-Haugen bill which was backed by a united agriculture and twice approved by Congress.

"I do not care whether you are Catholic or Protestant, wet or dry, the fact remains that the steady confiscation of farm lands is still going on to an alarming extent. I claim that a vote against Hoover is a vote for a $50 average increase in the price of the farmer's land, and a chance to return to prosperity for the tenant farmer as well."
