MINUTES OF THE ANGELINA COUNTY

MEDICAL SOCIETY

October 26, 1934

Lufkin, Texas

Angelina County Medical Society met in regular session.

Members present; Bledsoe, Treadwell, Hawkins, VanNuys and Sweatland of Lufkin, and Stewart of Huntington,

Under report of cases, Dr. Bledsoe continued report on his case of Poliomyalitis, no improvement.

Dr. Stewart reported a case of an infected finger with scattering of infection to other parts. Infection appeared to be located just under the epidermis, with bloody serum accumulation, diagnosis not made.

Dr. VanNuys reported a second pregnancy B. P. 190 Cystolic increased to 205 cystolic, with diastolic 85. Patient bloated, no convulsions. Gave Castor Oil Q. S. Quinine Given gr. X at 8 P. M., 10 P. M. and 12 P. M. Baby delivered at 7 A. M.

The meeting adjourned after discussion of various subjects of more or less importance.

Dr. J. W. Hawkins,
President.

A. E. Sweatland, M. D.
Sec. & Treas.

Lufkin, Texas

November 9, 1934

Angelina County Medical Society met in regular session.

Members present;

T. A. Taylor, Tenney, Denman, Childers, Bledsoe, Clark, Gandy, VanNuys, Treadwell, Tinkle and Sweatland of Lufkin and Dr. Stewart of Huntington.

President Dr. J. W. Hawkins being absent, vice President Dr. T. A. Taylor presided.

Minutes of previous meeting read and appreved.

Dr. J. C. VanNuys reported a case of pinta and brought his profert into court, which was examined by the society because of the rarity of the disease in this locality, it was very interesting.

Dr. Bledsoe was reminded of a discussion of such a disease at the last Medical Assembly of South Texas.

Dr. VanNuys' case a negro woman 40 years of age. The disease appears to be somewhat resistant to treatment but can be cured.

Dr. VanNuys read a discription of the disdase, which proved very interesting to all concerned.

Dr. C. B. Stewart presented a foetus with undeveloped head and abnormal spine. Probably a monstrosity. Unfortunately the Doctor was unable to secure the specimen for dissection by the society.

PAPAERS

Dr. L. P. Tenney presented a paper on ; "A Plea for more conservatism in the management of Normal Obstetrics"

Dr. J. C. VanNuys in the discussion of the paper, stated that if a Doctor did not have time to care for a case of labor during gestation and delivery, he should turn it over to some one who had. GET IN YOUR CAR AND COME BACK TO TOWN TO KEEP FROM BEING IN TO GREAT A HURRY.

Dr. Tinkle said he used Pituritin guardedly.

Dr. Treadwell commented favorably on the atitude of waiting.

Dr. Gandy said it was necessary to give relief in normal labor at times. Twenty hours should not be superceded in normal labor

Dr. Clark, said conditions changed the number of hours consumed. Reported a case going 70 hours, to advantage. Should keep close watch and in close touch with the patient and not allow them to go on to exhaustion.

Dr. Childers in discussing Dr. Tenney's paper stated that 5% of children are still born one and one half per cent die in the first week of life. Stress the necessity of examining women prior to labor to know whether she could bear a normal child.

Dr. Bledsoe commended Dr. Tenney's paper, that waiting and time and rest was usually all that was necessary in normal cases.

Dr. Tenney in closing stated that he appreciated the discussion of his paper and hoped that in normal labor cases it would have some application.

There being no further business, the meeting adjourned.

T. A. Taylor, Vice President A.E. Sweatland, Sec.& Treas.

Lufkin, Texas

Friday November 23, 1934

Regular meeting Angelina County Medical Society meeting called to order by Vice President T. A. Taylor.
Members present;-
Drs. T. A. Taylor, Bledsoe, Denman, Cannon, Wade, Childers VanNuys, of Lufkin, and Wilson of Diboll.

On motion of Dr. Bledsoe, Dr. VanNuys was appointed Secy. protem.
Minutes of previous meeting were read and approved.

Communication from Holman Taylor to Dr. E. J. Tucker, Secy., Liberty — Chambers County's Medical Society -- commending him on his effort to suppress counter prescribing by druggests and offering him any assistance within his power Told him to go to it.

A portion of a copy of the minutes of Tyler-Hardin Counties Medical Society dealing with application of Dr. Clements of Colmesneil for privilege to affiliate with Angelina County Medical Society, in which said affiliation with Angelina County Society was granted, was read.

Dr. Clements application for membership to The Angelina County Medical Society having been favorably passed on by the Board of Censors , a motion was made and seconded to receive, Dr. Clements into membership. Motion carried unanimously.

At this time no one having a case to report, papers were in order.
Dr. Wilson of Diboll read a splendid paper on "Hook Worm Disease" He said it was a disease attacking all ages.
A careful history was given.
Symptoms well presented.
Cycle of disease in attacking- from the time larvae entered the skin till full grown worms were developed in the Jejunum was given as 6 to 8 days.
In speaking of treatment Dr. Wilson said the old Classical treatment, Thymol, had been supplanted by Carbon Tetrachloride to which Oil of Chenopodium was added to eliminate the possible migration of round worms upward. That the Chenopodium would eliminate the round worms at the same time.
DISCUSSION-
Dr. Wade was called on to open discussion; Complimented the paper and said there was little to add.
Dr. Denman spoke of his experience with Hookworm disease while at Manning. Examination proved they nearly all had it. This was during the Rockefeller Foundation round-up in the South. The Nurse would examine them and give them the medicine. They would throw it away. Finally he became desperate and when they would consult him he would give them treatment and not tell them what it was for. The transfromation was remarkable.
The Dr. reported one case in particular. A girl 18 - looked like a girl 12 or 13 - No breast development, no monsveneris, had never menstruated. Looked like a clay model.
Hook Worm Treatment cleared up her trouble. In six months she menstruated. In a year she was developed to nearly normal. She is now married and the mother of five children.
Dr. Bledsoe said many cases are not recognized because mild and yet retard development in children and markedly decrease mental and physical efficiency in adults.
Said bad cases should be put to bed for their treatment and kept in bed for aftertreatment which he said should consist of Iron and Digitalis.
Dr. Cannon said there was little left to say and commended the paper.
Dr. VanNuys said he thought the paper was timely - It would remind us to look for Hook-Worm in puzzling cases of debility, and reported one of his most severe cases of 15 years ago and a mild case in a young girl recently.
Dr. Taylor reported his experience in this disease at Lufkin Land and Lumber Co.
Dr. Wilson in closing expressed his appreciation of the reception of his paper by members, present and said we should keep this disease in mind in obsucre cases of debility: it would often help us out.
Dr. Wilson before giving up the floor reported a case he saw in college of Bicornus uteris with pregnancy in each cornus also a bifurcation in the vagina which was operated on and corrected. When labor came on both babies were delivered - one by Poladis version, the other by high forceps. Both babies were vioble and the mother recovered.
Dr. Childers gave an interesting talk on what he saw and heard at The Meeting of the Southern Medical Association. Spoke of its magnitude and worthwhileness.

ARTHUR E. SWEATLAND, M. D.

Lufkin, Texas

Friday November23, 1934

Minutes of the Angelina County Medical Society, Continued.

Dr. Meyer, an Englishman, of England, told them of the result of State Medicine in England. Before beginning he said he was not talking for News Paper Publication. If there were reporters present to please take notice.

He said Favoriteism was prevalent.

The more favored ones made handsome salaries while others made scarcely a living and had no recourse.

He visited one center where one Doctor had charge of a hundred or more patients. When he questioned (not examined) one patient, he said he had a cold. " A Cold eh?" How many have colds, all stand up. All right go by the dispensary and call for No ---- He said that was a fair sample. Of course those confined to bed had more pains-taking examinations. This Doctor was getting 1,500 lbs a month $7290.00

He said when you get State Medicine the practice of medicine in your country will ruined.

T. A. Taylor, Vice Pres. J. C. VanNuys, Secy. Protem.

SALES OFFICE: TEXARKANA, TEXAS

Southern Pine Lumber Company

MANUFACTURERS OF
YELLOW PINE AND HARDWOOD

DIBOLL, TEXAS

Lufkin, Texas
December 14, 1934.

Minutes of regular meeting of Angelina County Medical Society- Dr. Taylor presiding ,

Minutes of previous meeting read and approved.

Application of Dr. A. E. Percy, Jeff Davis Hospital of Houston read, and referred to the Board Committee for consideration.

Paper and Case Report on Amebic Dysentery, by Dr Tinkle.

The Distribution, symptamotology, and pathology of Amebic Dysentery were well presented.

Case Report:

Patient 36 years of age - Groceryman.

First had diarrhea in June 1933, of three weeks duration, with no very active treatment , after which patient thought himself cured.

Now he is having 4 - 5 stools daily, several nightly, with passage of some blood. Also has considerable rectal tenesmus. Lost considerable weight and strength.

X-ray of teeth and sinuses negative.

Heart, lungs liver, and spleen negative on physical examination. Abdominal muscles tense. Reflexes normal. G. U. negative.

Hemoglobin -- 90%.

R. B. C. - 5 million plus.

Wassermann - postive 1 month ago, but since checked , and was negative.

Stool examination - Entameba Histolytica found.

TREATMENT

Emetine, Plus 12 Anayodin tablets daily for 10 days, then Carbasone for 10 days afterward.

Stool has been negative on four subsequent examinations.

DISCUSSION:

Opened by Dr. BLEDSOE: Amebiasis is more common than it is generally considered to be. Many debilitated patients with gastro-intestinal symptoms are sufferers of amebiasis, and should receive more consideration.

Dr. WADE: Suggests as an easy means of securing specimen for examination the insertion of a colon tube about 6 inches into rectum, and taking specimen from the tube for immediate examination

Dr. JACKSON: Enjoyed paper. Says 75% of cases occur in males because they are the most active, therefore are most often exposed. Also, that the greatest number of cases occur between 30 - 50 years of age.

Dr. TREADWELL:No discussion.

Dr. CLEMENTS: Told of a patient who was operated on for appendicitis, and later had intestinal obstruction, and on laparotomy a large mass was found in the transverse colon, which on examination was found to be an amebic mass.

Dr. VAN NUYS: Has treated a few cases diagnosed by exclusion. If cases fail to respond to all other treatment; treat for amebiasis. Treatment consisted of Emetine and Alcastra - Quinine is usually of some value also.

Dr. Gandy: Has found that emetine usually results

SALES OFFICE: TEXARKANA, TEXAS
Southern Pine Lumber Company
MANUFACTURERS OF
YELLOW PINE AND HARDWOOD
DIBOLL, TEXAS

in nausea for the patient, and they resent taking it.

Dr. CANNON: Has seen a few cases, and was able to get them well, but they fail to stay that way.

Dr. WILSON: The Wassermann reaction is found to be postive in about 15% of cases of amebic dysentery. In recent years there has been developed a complement fixation test for amebiasis that is just about as reliable as is the Wassermann test, according to the claims of the originator.

Dr. TINKLE (closing): The use of emetine has some danger attache d - apparently on the heart muscle, and for this reason it is best to start with very small doses - 1/4 - 1/2 grain. Carbosone is also fairly toxic.

Stools should be checked for a period of 6 months after cessation of treatment.

Prognosis is fair.

Dr. SWEATLAND reminded all members that the next regular meeting is for the election of officers for the coming year, and asked that everyone be present.

There was some discussion as to whether the Society should have a banquet on this occasion, and invite a guest speaker for the occasion , but was finally decided that the regular meeting be held, and possibly a banquet be held the first meeting in January, 1935. Motion for adjournment, made and seconded.

Dr. L. L. Taylor V Pres. J. G. Wilson

Lufkin, Texas

Friday Dec 28, 1

Angelina County Medical Society met in regular session.

Members present:
L. P. Tenney, J. H. Wade, E. T. Clark, D. M. Childers, T. A. Taylor
R. B. Bledsoe, and A. E. Sweatland of Lufkin, J. C. Clement of Colmesneil
C. L. Jackson and I. G. Wilson of Diboll.

Vice President, T. A. Taylor occupied the chair in the absence of President J. W. Hawkins.
Minutes of the previous meeting read and approved.

Communication from Dr. Burtner, president of South Texas Medical Assembly, asking for list of the officers and an outline for our scientific program for the next year was read and ordered to be sent to him.

Dr. T. A. Taylor reported a case of a boy six years of age to whom he was called at 5 A. M. The child was in convulsions, was cyanotic convulsions and lasted for one and a half hours. Was taken to hospital, given morphine, warm epsom baths, salines as purge and in three or four days apparently recovered. One side seemed to be more convulsive than the other.

There was a general discussion, every one taking part and the consensus of opinion was that the condition was produced from toxaemia.

Dr. Jackson reported an interesting case of a boy sixteen years of age complaining of a pain in the inner side of his heel, with no evidence of trauma and little, if any swelling, later had pain in the shoulder of like character. In about two days there was fluctuation and the skin was incised with emition of much pus. The boy had a sore throat and was not up to pr in general health.

Dr. Jackson first considered it to be inflamatory rheumatism. This was generally discussed and was believed by the society generally to be a general Septicaemia.

Attention was called to the meeting to be held in Beaumont, January 3, at 2o'clock P. M. in the interest of health regulation in the State Legislature Civic Organizations, Parent Teachers Association, Child Welfare Organizations were invited to attend. It was to be hoped that a large attendance would be there.

This being our annual meeting night the Society proceeded to the election of officers for the year 1935.
The following were elected:

Dr. Bledsoe nominated Dr. O. P. Gandy for president. Dr. Gandy was unanimously elected.
Dr. E. T. Clark nominated Dr. C. L. Jackson for Vice president. Dr. Jackson was unanimously elected.
Dr. D. M. Childers nominated Dr. L. P. Tenney for Secretary& Treasurer and he was unanimously elected to succeed Dr. A. E. Sweatland, who had held the office for six years.
Dr. Chas. B Stewart Censor for 3 years
Dr. A. E. Percy was elected a member of Angelina County Medical Society by acclamation.

There being no farther business, the meeting adjourned.

Dr. T. A. Taylor,
Vice President .

Feby - 8 - 1935

Angelina Co. Med. Society met on above date, at 7 P.M. at the Angelina Hotel, and partook of a Luncheon, banquet.

Members present, Drs. D.F. Gandy, Thos. D.M. Childers, J.C. VanNuys, P.C. Clements, Dr. & M. L.E. Swafford, Dr. & Mrs. E.J. Clark & Mrs. L.D. Fairchild, Dr. & Mrs. J.H. Wade, Dr. & Mrs. L.H. Duncan, Dr. & Mrs. L.L. Tinkle, Dr. & Mrs. L.P. Jennings, and the following visiting doctors: Dr. Standorff & Herndon of the U.S. C.C.C. Drs. Harris & Harry of Galveston.

After the banquet Dr. Harris addressed the Society in a very thorough & interesting talk on "The Relationship between the Menopause and Nervous & Mental Symptoms". This paper was discussed by Drs. Gandy, Clark, Swafford, Herndon & Standorff, and was much appreciated by all.

Dr. Wm. Harry read a paper on the "Clinical Study of the Anemias". This was discussed by a number of the members.

The Society was much pleased to have these visitors with us, and do regret ——

No further business, meeting adjourned.

L.P. Jennings
Secty.

March 8, 1935

Angelina Co. Med. Society met on above date. Minutes of previous meeting were read and approved. Drs. Bledsole, Denman, Gandy, Denman, Clements and Cannon of Lufkin were present, and Drs. Jackson & Clement from Diboll. The Wagner bill was discussed. Cooperation of this society with the State Med. Society was asked for by members of the society. Dr. Bledsole suggested that Drs. Cannon, Denman & Swafford be appointed as a committee to take care of this matter. They were so appointed as the Legislative Committee

by the president, Dr. Gandy.

A case of hysterical sneezing was reported by Dr. Jackson of Diboll. The case was discussed by all the members present and all agreed that the diagnosis was probably correct. A T.A. was done following the 2nd severe attack of sneezing. Both attacks necessitated hospitalization.

Dr. Clements reported a case of hysteria where catheterization was necessary to prevent rupture of the urinary bladder. Apomorphine relieved the case.

Meeting adjourned.

March 22. 1935

Minutes of previous meeting read. Those present: Drs Swafford, Wilson, Bledsoe, Jackson, Wade, Wilson, Treadwell, Clark, Denman, Stewart Clements, Van Nuys, Gandy, Clemans,

Motion that the society renounce the additional fees for paying witness fees for coming to read papers in front of State medical association.

Motion to pay $50 to South Texas medical society. seconded. carried.

Financial support sought for Hospital in a previous meeting by nominating Drs M. Mullen, Gary Trevathen, and Dr. Hawkins (Mr Mullen later as a committee)

Papers read by Dr Mayson and Dr Wilson on Diagnosis and treatment of Gall Bladder disease. Discussed by Dr. Denman Dr. Van Nuys, Clements, Gandy, Bledsoe, Jackson, Dr. Mayson closing: X'ray: when G.B. dont show - feels this is Wilson Morgan. Emotional nervous disease often identical with G.B. disease. Pain and distention connected with sympathetic nervous system related with Glands of internal secretions. Mental disturbances often present digestive symptoms. Association of G.B with

Angelina County Medical Society met in regular session.

Members present:

Drs. Sweatland, Bledsoe, Jackson, Wade, Gandy, VanNuys, Clements and Drs. Wilson and Mixon of Beaumont. Denman.

Motion made that the Society renounce the payment of additional expenditures of money for the State Medical Association for having doctors to come from out of the state to read medical papers, this was seconded and carried.

Motion made, seconded and carried to pay .50 to the South Texas Medical Association for general expense expenditure.

Dr. Mixon of Beaumont read a paper upon Diagnosis and Treatment of Gall Bladder Diseases and Dr. Wilson also of Beaumont gave Dr. Mann's paper on the surgical treatment thereof. These papers were discussed by Drs. Denman, VanNuys, Clements, Gandy Bledsoe, and Jackson and Wayne Taylor.

The Society selected Dr. Wayne Taylor as secretary of the Angelina County Medical Society to succeed Dr. L. P. Tenney whom resigned.

Motion made and carried for the Angelina County Medical Society to meet with members of the local C. W. A. board for a discussion of matters pertaining to Medical relief.

WAYNE TAYLOR, M. D.
TAYLOR-WOODS BUILDING
LUFKIN, TEXAS

March 26, 1935
Lufkin, Texas

Call meeting of the Angelina County Medical Society.

Those present at a special call meeting of the Angelina County Medical Society for a discussion concerning Medical relief in this county were as follows: Mr. W. R. McMullen Mr. C. N. Humason and Drs. Clements, Jackson, Wade, Glass, VanNuys, Bledsoe, Hunter, Childers, Stewart, Treadwell, Gandy and Clement, T. A. Taylor and Wayne Taylor. Denman

The C. W. A. board members asked that the Angelina County Medical Society appoint a board to determine the necessity of certain emergency cases to see whether operations were necessary.

Mr. McMullen stated that Angelina County was one of the three counties in Texas running extremely high for medical fees.

Dr. Bledsoe stated that a large number of cases came to Angelina County from neighboring counties for Medical relief.

Mr. Humason stated that the cost for perscriptions was too high.

It was agreed that the Society would take up the matter of appointing a Medical board to determine the operative needs of emergency cases at the next meeting.

April 12, 1935

CENSORS
D. M. CHILDERS, M. D.
E. T. CLARK, M. D.

The Angelina County Medical Society met in regular session on April 12.

Members present were Drs. Gandy, VanNuys, Cannon, T. A. Taylor, Jackson, Denman, P. C. Clements, J. C. Clement, Stewart and Wayne Taylor.

Dr. Taylor introduced a resolution in regard to an appointment of a Medical board to pass upon certain medical treatments such as operations etc. and certain medical needs. Dr. P. C. Clements seconded this motion and it was carried by the society which is attached hereto.

Dr. Denman introduced a motion for the Medical Society to have a social meeting once a month, subject to the discretion of the entertainment committee. It was the wishes of the Society that a social meeting be had once each month.

Dr. P. C. Clements gave us a paper entitled "Postpartum Care". It was very instructive to all present. The important items of the paper that seemed to be of paramount importance are as follows: 1. That conditions and diseases peculiar to women are directly the result of child-bearing. 2. A great number of maternal death are due to hemorrhage, 11%. 3. Means were given to control hemmorhages. 4. The proper care of the engorged breast. 5. Important measures to promote involution of the uterus.

In the discussion of this paper Dr. Stewart brought out that it was necessary to stay at least one hour after delivery. Dr. Denman recommends anturtian(s) for bleeding.

Dr. Clements brought in closing that breast abcesses were most often caused by brusing.

Dr. Jackson gave us a report on the Dallas Southern Clinical Conference. The important points of this conference is as follows: 1. Absence of Placenta Previa. New diagnostic aid was pointed out with following technique as follows: Inject 40cc. of Sod. iodide in the urinary bladder, and take an A. P. x-ray picture with the patient in an erect posture. If the head of the baby came almost in contact with the urinary bladder as shown by the x-ray, then no placenta previa is present. 2. Caeserian section advocated only in central placenta previa. 3. In the discussion of operative treatment of placenta previa his advice is to leave the clotted blood in the abdominal cavity because it serves as would a transfusion to the patient. 4. The adequate combatting of shock by blood transfusions and other general measures was mentioned by him. 5. In his comments on pneumonia stated 95% of lobar pneumonia is caused by pneumococcus type 1,2 & 3 in about 15% of the cases. 6. It was

In introducing this resolution I move, Mr. President, that a committee of three be nominated and elected by the Angelina County Medical Society to act in an advisory way as above stated with the Relief office. I further move that a copy of this resolution be spread upon the minutes of our Society and a copy sent to our Relief office and also a copy sent to the State Medical Advisory Board and to the Texas Relief Commission, Austin, Texas.

The following committee was elected to serve as Advisory board; Dr. R. B. Bledsoe, Dr. P. C. Clements of Lufkinaand Dr. W. B. Stewart of Huntington, It was also further recommended that this committee be paid the regular compensation fee for service rendered by authority of the local Relief officer.

Angelina County Medical Society met in a regular session April 26, 1935.

Those present were Drs. Clements of Diboll, Jackson of Diboll, Sweatland, Gandy, VanNuys, Wade, T. A. Taylor, Stewart, Clark, Bledsoe, Denman and Wayne Taylor.

Dr. Lewie, nephew of Dr. Travis of Jacksonville, whom was expected to read a paper was unable to be present at the meeting because of heavy rains in his section.

Dr. Wayne Taylor gave a paper on Mental Illness in which general features of the psychoses and neuroses were presented.

Dr. Wade gave a paper on How The Layman Should Look at the Cancer Problem. The relation of trauma to the cause of cancer was emphasized also the need of education of the public for early diagnosis and scientific treatment. Dr. Denamn opened the discussion, emphasising the necessity of early diagnosis and the types of treatment. It was suggested that Dr. Wade's paper be reconstructed and be published for what benefit it might give to the laity.

Dr. Sweatland discussed the importance of being capable of diagnosising cancer at the operating table from their gross characteristics.

There being no further business the meeting was adjourned.

April 12, 1935

At a regular meeting of the Angelina County Medical Society the following resolution was introduced and unanimously adopted.

Whereas, the local Relief office has asked the Angelina County Medical Society to appoint an Advisory committee to work with the Relief office in an advisory capacity in regard to services rendered by the members of the Angelina County Medical Society pertaining to the necessary service in medical Relief cases.

From time to time there may come up disputes in accounts and the necessity of service to be rendered Relief roll cases, between the Relief office and any individual member of the Society. And further, in any case where there may be a dispute as to the kind of service to be rendered. The Relief office may consult with the advisory board in determining an adjustment of the proper medical care necessary to be rendered. In cases where a member feels that he has been imporperly treated by the Relief office he may appeal his case to the County Advisory board.

It will be the duty of the board to take the matter up with the Relief office or if necessary the Advisory Board may report the case to the State Relief Commission or the State Medical Advisory board. This resolution is introduced in accordance with rules and regulations governing contracts between the County Medical Society and the local Relief office which states, that there should be a committee appointed from the Society involoved to werve as mediators in disputed accounts and in an advisory capacity with the local Relief administrators.

The Relief office is to call on this Advisory committee only in cases where they may wish further information in regard to the advisement of operations and various kinds of medical care. It will be the duty of this Advisory board to investigate such special cases and give their opinion, in an advisory capacity, to the Relief office. This is necessary only when they are called upon to do so by the Relief office.

It will not be necessary for a doctor to have the approval of the Advisory board before an operation or before any special treatment is undertaken. He should ask the Relief office for authority and then if there is any question in the mind of the Relief office of such treatment the Advisory board may be asked by the Relief office to giv give their opinion in any such treatment or medical care. This advisory board may meet once a month with the Relief office to go over the work and to bring about the closest cooperation between the Relief office and the Angelina Medical Society.

In introducing this resolution I move, Mr. President, that a committee of three be nominated and elected by the Angelina County Medical Society to act in an advisory way as above stated with the Relief office. I further move that a copy of this resolution be spread upon the minutes of our Society and a copy sent to our Relief office and also a copy sent to the State Medical Advisory Board and to the Texas Relief Commission, Austin, Texas.

The following committee was elected to serve as Advisory board; Dr. R. B. Bledsoe, Dr. P. C. Clements of Lufkinaand Dr. W. B. Stewart of Huntington, It was also further recommended that this committee be paid the regular compensation fee for service rendered by authority of the local Relief officer.

The Angelina County Medical Society met on May 10th.

Members present were:
Drs. Sweatland, Bledsoe, T. A. Taylor, Jackson, Denman, Gandy, Treadwell, Clark, Cannon, Tinkle, Clement, Stewart and Wayne Taylor,

Dr. Sweatland read a very interesting paper entitled "Medical Economics" which brought out the very important subject of the future disposition of this question. The past and present economical situation of medicine was very cleverly compared. Some of the highlights of the paper were; a brief discourse on compulsory sickness insurance, medical care for the indigent, county medical society service adjustment and collection bureaus and the medical service plan adopted by the Wayne County Medical Society.

Dr. T. A. Taylor made a motion that the president appoint a committee to investigate the medical economical situation in Angelina County. & report back to society.
Dr. Bledsoe gave an interesting paper entitled "The Human Cell and Its Relation to Health". In this paper some most interesting functions of the different cells was brought to the attention, also diseases of the blood forming organs were compentently discussed with two case reports.

The following members of the Angelina County Medical Society met in special session on May 18 to confer with Mr. Humason, oone of the local C. W. A. administrators, in regard to the payment of medical fees for the month of June. Those present were: Drs. Clark, T. A. Taylor, Clements, VanNuys, Sweatland, Denman, Gandy, Childers and Mr. Humason

Mr. Humason stated that there was no allotment sufficient to take care of the medical fees at this time. The amount of money appropriated by the State for this month is less than half of the amount appropriated last month.

Dr. Sweatland made a motion which was seconded and carried that the members of the Society render their services for the indigent during the month of June free of charge.

There being no further business the meeting adjourned.

September 14, 1935

The Angelina County Medical Society met in regular session on September 13.

Members present were Drs: Clement, Clements, Robert Taylor, Sweatland, VanNuys, Bledsoe, Clark, Gandy and Wayne Taylor.

Correspondence was read in regard to the medical economic situation. Letters were read from the Anderson-Houston Counties Medical Society and the Williamson-Burnet-Llano Counties Medical Society stating their objections to the present fee plan for the relief of the indigent.

Dr. Bledsoe stated that we should get more than .50 for office examinations and should get one half of the usual fee charged for other services rendered.

Dr. Sweatland stated that the present plan was disagreeable to every physician in the state. We had first adopted the small fee plan in view of the emergencies that existed.

Dr. Clark stated that we should not do any more examinations for .50. It was the general sense of the Society that this small fee be no longer adhered to.

A motion was made by Dr. Clark that the Society dispense of all previous charges for relief work and go on record for $1.00 for office examinations and half of the usual charges for any other services. Dr. Clark also recommended that each member of the Medical Society, the local Relief office and all the Society secretaries in the tenth district be notified of the action taken by this Society. This motion was seconded by Dr. Sweatland and unanimously carried by the Angelina County Medical Society.

The economic committee composed of Drs: Clark, Sweatland and T. A. Taylor were to make a report of their recommendations for this situation in Angelina County in view of the fact that the Council on Medical Economics of the State medical Association is meeting at Austin on September 16th of which Dr. Sweatland will attend and bring back with him

There was call meeting of the Angelina County Medical Society held on September 17th.

Those present were: Drs. Stewart, Sweatland, Childers, VanNuys, Denamn, Cannon, Wayne Taylor and T. A. Taylor.

The reason for the meeting was the notice to the Secretary and the President by Mr. J. J. Hutchinson, District Relief Supervisor to the effect that the Texas Relief Commission and the local Relief agency must abide by the contract for medical fees originally proposed and agreed upon by the Texas Relief Commission and Texas State Medical Society.

Mr. Hutchinson stated that he could not issue disbursing orders for any higher fees than are now in effect.

As set down in our letter (the letter of the Angelina County Medical Society) to the local Case Worker in Charge is the sense of the Society and is the resolution adopted by the Society for fees charged in Relief work.

There was a regular meeting of the Angelina County Medical Society on September 27th. The meeting was called to order by Dr. Stewart, Acting President. Dr. P. C. Clements, acting secretary.

Those present were Drs: Sweatland, Bledsoe, Stewart, T. A. Taylor, Clement & P. C. Clements. There being no program Dr. Bledsoe moved that Dr. Sweatland report on his trip to Austin and the new Economics meeting he attended there which motion was seconded and carried.

Dr. Sweatland read a letter from Dr. Sealey, president of the Board of Councillors, in reference to the Medical Economics program. This letter directed that each Councillor appoint a committee in his district to formulate a schedule of fees for P. W. A. work to be submitted to the State Compensation officer for approval by the Federal Compensation officer.

Dr. Bledsoe moved that the Society instruct the County Economics committee to work out and submit for the society's approval a fee bill and any other items necessary to solve the economics problems of this Society. This motion was seconded by Dr. Clement and carried.

Dr. Bledsoe moved that Dr. T. A. Taylor be elected to meet with the District economics committee at the Angelina Hotel next Tuesday and act for this Society. Tjis motion was seconded by Dr. Sweatland and carried.

There followed a general discussion of economic problems. The meeting adjourned on Dr. T. A. Taylor's motion.

Dr. Jack H. Wade
New Orleans, La.
October 11th, 1935.

MINUTES OF THE ANGELINA COUNTY MEDICAL SOCIETY MEETING OF OCTOBER 11th, 1935.

The meeting was called to order by Dr. Bledsoe, who was acting as President, and Dr. Wade acting as Secretary.

The members present were: Doctors Sweatland, J. C. Clements, Stewart, Bledsoe and Wade.

Dr. Sweatland discussed the meeting of Councillors at the Angelina Hotel which was well attended, and reported the meeting quite successful. A motion was made to invite the Nacogdoches Medical Society Members to meet with our society on October 24th (Thursday). There was also some discussion of several Houston Doctors who were to be present at this joint meeting.

The fee bill of the P. W. A. work was to be worked out and copies sent to each member of the society in the near future, according to Dr. Sweatland.

Paper by Dr. Bledsoe (Case Report). Age 31, one child 11 years of age, family history negative, past history negative. Dr. Bleddoe stated this case was one dealing with a very definite endocrine disturbance, principally with a pituitary dysfunction and also ovarian disturbances.

Subjective symptoms: Vertigo, numbness, insomnia, melancholy, headaches and hypotention. Diagnosis: Quite suspicious of a thyroid and superadrenal disease alongbwith the other endocrine disturbances. Skin was showered with papular elevations with melanotic appearance. Has a definite train of symptoms of ovarian thyroid and pituitary gland dysfunction. There was also a definite frigidity.

T. A. TAYLOR, M. D.
TAYLOR-WOODS BUILDING
LUFKIN, TEXAS

November 21, 1935

There was a regular meeting of the Angelina County Medical Society in connection with the Nacogdoches County Medical Society on October 25th. Those present were: Drs. R. B. Bledsoe, E. T. Clark, P. C. Clements, O. M. Dillon, O. P. Gandy, AA. E. Sweatland, L. T. Tinkle, J. C. VanNuys, J. H. Wade, W. B. Treadwell, Wayne Taylor & Robert Taylor of Lufkin; Dr. C. B. Stewart of Huntington, Dr. J. C. Clements of Diboll, Thos. Clarence Smith, Frances Henry Tucker, Albert Langston Nelson, and McKinney of Nacogdoches and Drs. Alvis E. Greer, J. Harold Turner and E. W. Bertner of Houston.

Dr. Alvis E. Greer gave a paper entitled, "Observations on the Anemias." Dr. Greer emphasized the value of routine blood examination and classification: deficient production, increased destruction and blood loss. He also brought the fact that liver is of no value in secondary anemia. Dr. L. T. Tinkle discussed the paper. Dr. T. A. Taylor enquired about nervous phenomena and the B. P. of pernicious anemia. Dr. Sweatland emphasized over fluid administration at times. Dr. Bledsoe reported a case of anemia with dyspnea. Closing: Importance of diagnosis by observation, physical examination and use of .

Dr. J. Harolde Turner gave a paper on the "Management of Retention of Urine in the Male", which was discussed by Dr. L. H. Denman. Dr. Turner brought out the importance of less trauma in urethral work, value of supra pubic, start with trochar containing cathater. Dr. Turner stated that urethal irrigation was of no value. He also mentioned the value of the filiform guide and the use of an indwelling filiform in prostatic abcesses. The poor progress of

Dr. Wade asked why bladders should not be irrigated. Dr. Step. Tucker reported a case with pus on irrigation. Dr. Sweatland discussed carcinoma of the prostate. Dr. Tinkle reported a case of carcinoma.

Closing: Importance of less trauma & irrigation of no value, also the value of working from above down.

Dr. Bertner spoke of the value of the Postgraduate Medical Assembly. There being no further business the meeting adjourned.

November 21, 1935

CENSORS
D. M. CHILDERS, M. D.
E. T. CLARK, M. D.

There was a regular meeting of the Angelina County Medical Society on Friday, November 8th. These present were Drs. Sweatland, Cannon, Van Nuys, Denman, Robert Taylor, T. A. Taylor, Stewart, Forrest, Gandy and Clement.

There was further discussion of the local medical economic situation. Dr. T. A. Taylor expressed the view that a medical economics plan for the county would be of great benefit and called our attention to the poor credit, means of collecting and the classification of cases on basis of pay and non-pay. It was purposed that a secretary be paid by the Society to handle the mechanical features of this work.

Dr. Sweatland discussed the medical economics plan stating that it would be of untold value to each and every doctor in this county.

Dr. Cannon doubts its value since some such plan has been tried in the past which was unsatisfactory. Dr. Denman and Dr. Gandy doubt the value of such a plan.

It was decreed by the Society to have the Winthrop Chemical Company bring their motion picture forward at a future date for illustrations of Novocain Anesthesia in Obstetricts.

There was no further business, the meeting adjourned.
