VOLUME 14 — HUNTINGTON, TEXAS, MARCH 17, 1942 — No. 7

Junior Class Play To Be Presented On March 27

The Junior Class play, titled The Improper Henry Propper, which will be presented in the high school auditorum on March 27, promises to be the best comedy ever given in Huntington. One critic went so far as to say "When a funnier play is to be staged, it will be written!"

The cast of 11 characters has been selected and rehearsals are under way. Players include Gene Stewart, Linuel Hamilton, Edwin Ivy, Lorene Tatum, Margreet McMullen, Nancy Davis, Aleine Snowden, Yvonne Harvill, Jean Burris, Joseph Lowery and Billie Cowart.

Mrs. Cloud and Mr. Page, who are coaching the play, state that it has a most unusual plot which is woven around the misfortunes of a young man who, eloping, finds himself married to the lady he hoped would be his mother-in-law, a veritable tiger of a woman!

If you want to forget the troubles of a war-ridden world for an evening—don't fail to see The Improper Henry Propper on March 27.

Guest Speaker

R. C. MUSSLEWHITE

R. C. Musslewhite, Lufkin, prominent member of the Texas Bar, will be principal speaker at the high school dedication ceremony tonight.

Joe LaRue Seeks County Judgeship

Joe LaRue, commissioner of precinct 3 for the past four years, has authorized this announcement of his candidacy for the office of county judge in the July primary election.

"I feel that my four years continuous service as county commissionr, during which time I studied the functions of our county government and the procedure necessary to its proper and efficient administration, fully qualifies me for the office of county judge," Mr. LaRue stated. He pointed to his accomplishments during his tenure as county commissioner and said that he had always worked for the best interest of the entire county.

"If elected," Mr. LaRue further stated, "I will devote my full time and wholehearted efforts in planning and working for a better Angelina county, one that is financially sound, harmonious in all of its departments, and a credit to Texas."

Mr. LaRue invites inquiry into his record, in both private and public life, as a basis of support by the electorate of the county and adds that if elected he will show his appreciation by honest and efficient service.

Younger Set Is Entertained At Party-Dance

The Huntington younger set was entertained with a party and dance Friday evening in the home of Mr. and Mrs. R. A. Stewart.

Those who enjoyed the evening's entertainment were Lavern Kirkland, Naomi Kirkland, Darwin Hudnall, Edwin Ivy, Doris Gibbs, Yvonne Harvill, Margreet McMullen, John Herrington, Dagma Ferguson, Jean Burris, Renee Yeates, Billy Jim Lewis, Jeanette Kirkland. R. B. Nerren, Melvin Earl Staurt, Earl Thompson, Lorene Tatum, Birdie Margaret Cloud, Medford Cowart, Nona Forrest, Jimmie Ferguson, Gene Stewart, the host and hostess.

Red Devils Wind Up Banner Year By Defeating Hard-Hitting Wells Quint in Friday Night Thriller

Huntington Wins District for First Time In School's History; Take Piney Wood Pennant for Third Consecutive Year

Coach R. F. Huff's Huntington Red Devils closed one of their most successful seasons with a hard fought 43-41 victory over the Wells Pirates at Wells last Friday night which won for them the championship of the Piney Woods League for the third straight year. For the last three years the Red Devils have met the Wells team for this championship in a playoff and have come out on top each year. Star of this victory over Wells was Harry Hubbard, Jr., who kept the meshes hot as he poured in 26 points and played a fine defensive game off the backboards.

The Red Devils were defeated only three times in the conference with the strongest teams in East Texas. These three defeats were: Lanesville, by one point;; and Wells in two games by 4 and 9 point margins. Other teams outside the conference to defeat the local team were the state champion Jeff Davis Panthers of Houston, who defeated them in the Houston Tournament after the Devils had defeated Sidney Lanier in an upset victory. This defeat was the worst the local team suffered the whole season but this team was the best in the state and they went on to capture the tournament. The Livingston Lions were victorious over the Red Devils in a two game series and the Elkhart Elks won from the Devils in the Bi-district playoff.

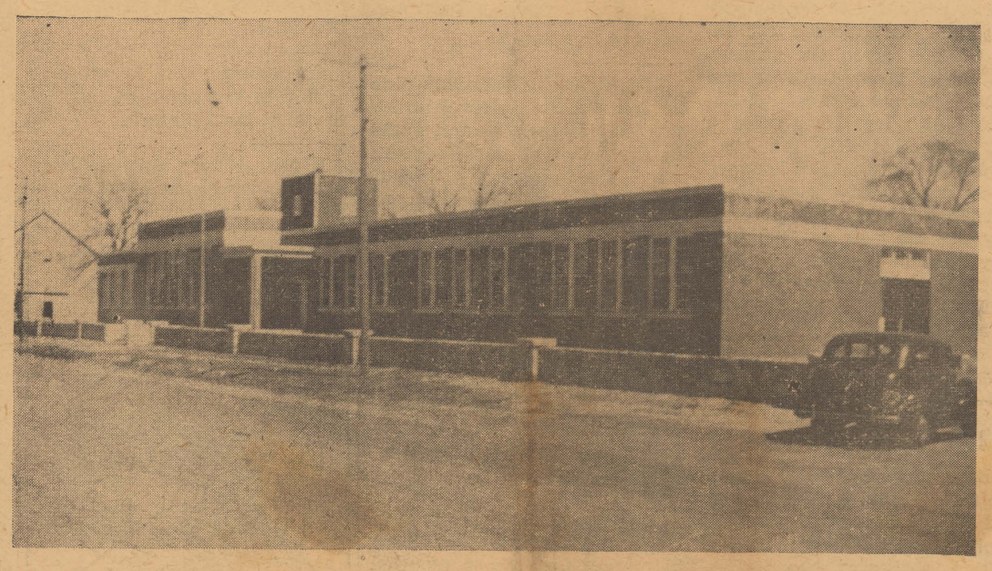

The fine Huntington squad in 32 games compiled a total of 1060 points for an average of 33 points per game while limiting the opposing teams to 798 points or an average of 25 points per game. Of the total points made by the Red Devils, 178 were made by free throws or an average of 6 per game.

Opposing teams were able to make but 136 which was an average of 4 per game. These statistics show that this year's team was the best all-round team to represent Huntington High School in many years and is the first time in the history of the school that a basketball team has won the district. Eight players will receive gold basketballs for winning this honor. These boys are: Linwood Marshall, Lavern Kirkland, R. B. Nerren, Harry Hubbard, Jr., John Gates, Sidney Wade, Earl Thompson, and Gene Stewart.

All through the season the well coached five has played a consistent brand of ball and at the last of the season reached their peak. They were victorious over the best of the teams in this part of the state in the Nacogdoches Tournament which they won for the first time. Three players of the Huntington five were selected on the all-tournament team. These were

Remember Pearl Harbor	Group of H. S. Girls
Patriotic Address	R. C. Musslewhite
Any Bonds Today?	H. S. Band
Sale of Bonds-Stamps	Richman Lewin
Organization of Victory Defense Council	J. H. Kannenberg
Benediction	Rev. F. D. Coppin

The History of Huntington School

A four-month school term was taught in Huntington in 1900 by R. N. McMullen and Jodie Moore. School was held in a combination church-school building near the present site of Mrs. Renfro's home. Huntington Common School District was created the next year in compliance with a petition from a group of public spirited citizens. The Commissioners' Court order was dated April 4, 1901, and the District was numbered "5". Mr. McMullen and Miss Moore again taught the school which had 51 students on the census roll.

Huntington Common School District seems to have assumed the Number "59" before the act of the Commissioners' Court and this number was used on official records for several years thereafter. This may have been brought about by the fact that there was in existence, prior to 1900, a school at the present site of Little Hope which was known as Gann Ridge District No. 5. According to the records, Huntington Common School District used numbers 5 and 59 one year.

Growth in numbers of students and expansion seemed slow for the next few years. Miss Jodie Moore and Mr. J. W. Bond taught the school in 1902. Miss Moore seems to have taught five months and Mr. Bond four. The school was moved the next year to the present site of the Sinclair Service Station. It was a two-story, two-room building. Mr. J. W. Stegall taught upstairs and Mr R. N. McMullen in the lower room. Another teacher was added in 1904 and an enrollment of 150 pupils was recorded. Mr. G. R. Thompson, Mr. J. W. Stegall, and Miss Emma Spruell composed the faculty. Messrs. L. N. Yeates, J. Y. Foster, and R. S. Byrd were listed as the board of trustees.

The per capita apportionment received a boost in 1905 to reach a high of $5.25, and the County Available Fund showed a revenue of $.25 per pupil. The school records showed a gain of six students. Mr. G. R. Thompson, Miss Emma Spruell, and Miss Jimmie Ellis taught the school. Gann Ridge District No. 5 made its appearance on the records for the first time since 1898. J. F. Robinson taught a three-months school for J. M. Marshall, G. D. Russell, and A. A. Dorris as trustees. The record of Huntington No. 59, and Gann Ridge No. 5 appeared on the same page of the record in the County Superintendent's office which indicated that they may have been considered the same district.

Principal

ERNEST BALCH

Superintendent

J. H. KANNENBERG

The scholastic census roll took a spectacular leap in 1906 and registered 227 students. It is said that Mr. J. M. Cochran taught in the Methodist Church building in order to take care of the increased numbers. He was assisted by Miss Emma Spruell and Mr. G. J. Evey that year. No change was made in the school board until the next year when Dr. G. B. Wood succeeded Mr. R. S. Byrd. It was in this year (1907) that Huntington Common School District's number was changed to C. S. D. No. 41. The white scholastics showed a decline this year from 227 to 185, but a negro teacher was employed for the first time, which indicates that several white families moved away and negroes began to settle in this vicinity. T. Harris was named teacher of the Colored School.

There was a further decline in the number of white students the next year. Their records showed 150 white and 28 negro scolastics in 1908. A complete new faculty was employed for the first time since the creation of the district. Chester Collins was elected principal. He was assisted by J. L. Lester, and J. M. Burns. J. W. Roberts was listed as one of the teachers, but his vouchers were dated from May to August which indicated that he might have taught a summer school. J. C. Herrington and R. P. McKewen succeeeded Dr. Wood and Mr. J. Y. Foster as trustees.

Beginning with the year 1909, the Huntington School began a period of consistent growth and improvement. The faculty was

Under the direction of I. P. Renfro, the Huntington School System boasts one of the outstanding Rural High School bands of East Texas.

Representative Lock Commends Huntington Citizenry On The Completion of New School Plant

Importance of Education in the World Of Today Pointed Out; "Huntington Keeping Faith With Its Young People" Says Legislator

The people of the Huntington Rural High School district are to be commended for their efforts in setting up their fine school program. Education should be stressed today as never before. Many of the advancements that have been made in the past are being torn down today. Bridges, buildings, dams and other engineering feats that required years of labor and millions of dollars to construct are being destroyed in an hour's time. Economic and social problems that puzzle the master minds of the world have arisen. It is imperative that we have educated and enlightened minds to deal with these problems. Huntington is certainly keeping faith with its young people.

As a member of the Joint Legislative Advisory Committee that supervises the expenditure of the school money, it has been a pleasure to watch your school grow from a crowded and heavily indebted condition to your present status.

Now you have one of the finest plants in the State, which you obtained at no extra expense to the tax payers.

Your school is in excellent financial condition. The State has recognized your efforts and this year we have approved Huntington for a larger grant of State Aid than you have ever received before. On numerous occasions your set-up has been used as a model and other schools in different parts of the State have been asked to follow your example. This is probably the most notable advancement that has been made in Huntington's history and every person who had a part in the program has a just reason for being proud to see this goal realized.

Hello World

Mr. and Mrs. J. A. Price of of Lala Hill announce the birth of a 9-pound son on March 11. The baby has been named Lloyd Turner.

Mr. and Mrs. Grady Carlisle, Rocky Hill, announce the arrival of a boy on March 13. The baby weighed 10 pounds and has been named Billy Wayne.

Born to Mr. and Mrs. Woody Marze, Lufkin, on March 11, a baby boy weighing 7¾ pounds.

CARROLL BROTHERS HOME ON FURLOUGH

Sgt. Wayne L. Carroll of Duncan Field, Texas and Kenneth M. Carroll of Fort Sam Houston spent the past week here with their parents, Mr. and Mrs. W. L. Carroll.

Tap Says

You know, when we get to plowing, hoeing, hammering and fixing (if you haven't the tools for all this, you can get 'em at my place) and get to thinking about Pearl Harbor and Hickam Field, we can have the time of our lives imagining that we are plowing the Japs under, that we are hoeing the yellow rascals down like crab grass, or "beaning" 'em with the hammer every time we hit the nail on the head. I started to say that we can cure the spring fever by imagining that an air raid alarm has sounded, but I doubt this; it would probably take a siren and a few cannon firecrackers to cope with this ailment. I don't have any sirens and firecrackers in stock, but I do have everything you need in the hardware line—even have Dairyland ice cream waiting to refresh you. And you needn't leave my place with your feet hurting, for I have a good assortment of Star Brand Shoes that fit and, what is more, they'll last you. Come and see me!

Sam Butler Graham Former Huntington H. S. Grad Honored

Sam B. Graham, brother of Mrs. G. C. Carroll and graduate of Huntington High School in the class of 1912, was elected president of Texas State Teachers association Saturday at the close of a three-day convention at Beaumont. Galveston, his present home city, was awarded the 1943 convention of the organization.

Mr. Graham is now serving as superintendent of the Galveston city schools and for a number of years has taken a prominent part in the educational activities of Texas.

The friends of Butler Graham (as he is known here in his old home community and throughout Angelina County) will rejoice with him in his success.

Clarence Sheffield Promoted to Captain

Clarence Sheffield, son of Mr. and Mrs. Doug Sheffield, and one of the first selectees to be inducted from Huntington, has been advanced to the rank of captain, according to word received here this week.

Clarence entered army service in March of 1941 and was sent to the officers' training school in Monmouth, N. J. Following three months training there, he was made an instructor. Three months later he was advanced to a first lieutenant in the signal corps and retained this rating until made a captain last week.

Mr. Sheffield's many friends here will be happy to learn of his rapid advancement and we even suspect that there'll be no few "I told you so's!"

Welcome!

MILTON CARRELL

On behalf of the entire citizenry of Huntington, I extend a hearty welcome to all who attend the ceremony in connection with the dedication of our new high school building.

A portion of the program will be devoted to the sale of Defense Bonds and Stamps, in order that we may not, even for one evening, forget that we are engaged in a great war the result of which, perhaps, will determine the destiny of our America for hundreds of years to come; and it is our hope that each will come prepared to do his full share toward making this sale of Bonds and Stamps the kind of success that Huntington and surrounding communities like to make of their undertakings.

We are proud of our new school plant, and trust you will come and celebrate with us tonight.

—Milton Carrell
Mayor of Huntington

Big Variety of Entertainment Offered By Dailey Brothers Three Ring Circus Which Shows Here Saturday March 21

Trained wild and domestic animals will compete with scores of human actors when Dailey Brothers circus gives two exhibitions here Saturday.

Strictly speaking, the circus this year comprises four units, each of which could be considered a complete show in itself. The Dailey Brothers show has long been recognized as having one of the cleanest and most inspiring forms of entertainments on the road, and, after all, there is something about a circus that naturally thrills the old and young alike.

Perhaps one of the most outstanding features with the show this year is dainty little Norma Pearl—prodigy of the circus world. Only eleven years old, Norma Pearl is already a beautiful and accomplished performer and never fails to thrill the crowds with her feats and gracefulness. The life of this little lady reads like fiction. Unknown to her own family, who are proprietors of Dailey Brothers Circus, she played circus parts and practiced in secret at every opportunity on the circus lots and on school playgrounds, until one day she insisted that she be permitted to appear publicly. She was humored with little thought given the request, but she "brought down the house" with her first performance and has been rated a star since that time.

Norma takes care of her own wardrobe and has unusual confidence in her ability to perform any act she sets as her goal. Any children or parents wishing to meet Norma Pearl may do so following the afternoon performance. Her hobby is playing at circus acts and caring for her Pekinese dog, Circus Kid.

Mickey Kerr Likes Army Life

(EDITOR'S NOTE: The following letter from Mickey Kerr, former employe of the News, is printed in the belief that his friends here will enjoy hearing from him.)

Camp Roberts, Calif.,
March 15, 1942

ANGELINA COUNTY NEWS,
Huntington, Texas.

Dear Cloud:

Am receiving the paper and enjoy it immensely. You're certainly making a real sheet out of it!

By the way, you can tell your readers that the name of W. J. Townsend is reaching some distant points. I picked up a San Jose, California, paper yesterday and while looking it over I noticed an article concerning the wearing of suitable apparel by Texas girls working as carhops. The Texas Liquor Control Board and W. J.'s name, especially, hit me pretty hard. (You know I never have gotten over Jim's refusal to let me be his official "tester" after he got that job!)

Well, the army and your's truly are getting along mighty fine. We never argue—they have two ways of doing things here, the army way and the right way, and when you do it the army way, it's right!

Camp Roberts, as you probably know, is the largest replacement training center in the United States. It is beautifully situated in a large valley surrounded by mountains that stretch away into distance. There is a large service club and four theatres in the area in addition to the barracks, parade grounds, etc.

A recruit spends thirteen weeks here and is then placed in a combat unit. I have hopes of being only eight weeks as I have made application for the officer's training school at Ft. Benning, Ga., and it is understood that I have been accepted. In the event this falls through, however, I will be placed in a combat unit—no telling where!

If you happen to see Gordon Scaff, John Dennis, or any other of my old pals, give 'em my regards, and tell 'em all to go heavy on those Defense Bonds and stamps—I'd hate to get caught in a tight place and run out of ammunition!

Well, here's hoping I see you again sometime. Meanwhile,

Best regards,
(signed) Mickey Kerr

CANVAS BIDS HEAVY

Some idea of the current demands on cotton industry by the war may be obtained from the fact that recently the Army asked that the cotton textile mills submit bids on 200,000,000 yards of cotton canvas. Ordinarily these mills which specialize in production of canvas would produce this amount in the space of a year. Bids, however, called for delivery before June.

Navy Calls For Men to Serve In Construction Work

Houston, Texas, March 17—According to information just received from Lieutenant Commander, H. J. Duncan, CEC USNR, examining officer of applcants for enlistment in the Naval Reserve Construction Regiment, this Recruiting District will enlist 983 men with experience in 65 trades and vocations in the immediate future.

Commander Duncan will visit the Navy Recruiting Station at Houston for three days, Monday, Tuesday and Wednesday, March 23, 24, 25, for the purpose of interviewing applicants for enlistment in the Construction Regiment, Commander Wood stated, and all men who wish to qualify for these positions should apply immediately to the nearest U. S. Navy Recruiting Station or sub-station for application forms. Expenses while in Houston are paid for by the Navy, Commander Wood pointed out. Those who qualify and enlist are placed on inactive duty and returned to their homes at government expense in order to permit them to close out their personal affairs before being called to active duty, he explained.

Petty officer ratings with generous pay and allowances are available now for men who can qualify as having had previous experience in construction work such as auto repairing, blacksmithing, carpentering, concrete working, coppersmithing, drilling, electric installation, mechanics (shop and station), painting, pipefitting, steelworking, telephone line work and instrument installation, general laboring and many others, the commander informed.

The age limit for men in this class is 17 to 50 and they must pass general and physical requirements for enlistment in the Naval Reserve before they are acceptable in the Construction Regiment. The only waivers from regular physical requirements in the Construction Regiment, the announcement continued, is color perception and loss of teeth replaced by satisfactory dentures.

(EDITOR'S NOTE: Local men who wish to serve their country by enlisting in the Construction Regiment of the Naval Reserve are advised to apply at the U. S. Navy Recruiting Substation for this territory, located in the P. O. Bldg., Lufkin, Roy T. Blackburn, Recruiter in Charge, has advised the Angelina County News.)

Angelina County Child Welfare Board

W. M. Glenn—Chairman

Monthly Report

The monthly meeting of the Angelina County Child Welfare Board was held Wednesday, March 11th, 1942 at the City Hall, Lufkin.

The monthly report given by Mrs. E. G. Murray. Reg N. follows:

Orthopedic, 10 cases; Surgical, 2 cases; Medical, 10 cases; Dental, 1 case; Optical, 7 cases.

All optical cases requiring glasses are furnished same through the courtesy of the Lufkin Lions Club.

Patients receiving hospitalization, 7 cases; Food furnished, 1 family; Milk furnished, 2 families; Medicine furnished, 5 cases; Clothing furnished, 1 family; Shoes furnished, 2 families; Surgical dressings supplied, 56 dressings.

Number of calls made during February, 102.

Billions for Allied victory . . . or for tribute to dictators? There is only one answer: Buy U. S. Defense Bonds and Stamps.

Conquer We Must

From Buffalo Courier-Express

The United States of America needs a war slogan.

We need a rallying cry to make every one of us a part of the fighting forces of this Nation.

There have been slogans for the war so far: Keep 'Em Flying—Remember Pearl Harbor—Remember Manila.

Keep 'Em Flying is all right, but it is a mechanical and let-George-do-it sort of slogan. It puts the war at arm's length and throws the work on somebody else.

Remember Pearl Harbor sprang from a treacherous attack we can never forget. But Pearl Harbor was two months ago. The war has gone on from there; There are new things to remember, new losses to avenge.

Remember Manila is in the same category.

Something more is needed. Something to make us one with the American boy who grips a rifle butt in Batan while he awaits a Jap to fill his sights. A slogan to join us with the sentry who stamps his feet in Iceland, with the watcher who eyes the skies of Ireland, with our troops in far places everywhere, with the Navy at sea, with the airmen on high.

The last verse of the National Anthem of the United States of America reads as follows:

Oh! thus be it ever, when freemen shall stand
Between their loved homes and war's desolation;
Blest with victory and peace,
May the heaven-rescued land
Praise the Power that made and preserved us a nation.
And CONQUER WE MUST, when our cause it is just,
And this be our motto, "In God is our trust."
And the star-spangled banner in triumph shall wave
O'er the land of the free and the home of the brave.

Conquer We Must! There's our slogan.

Are your tires wearing out and your car getting old? Conquer We Must!

Are you worrying about sugar rationing, about rationing in general, and higher prices? Conquer We Must!

Does the income tax burden seem too heavy to carry- Conquer We Must!

Has your boy gone off to the Army, or Navy, and from camp to "somewhere in the battle zone"? Conquer We Must!

Is the war going against us, and are our troops hard pressed? Conquer We Must!

There's our slogan, coming from the National Anthem.

We have a job to do. Nothing must stop us. Nothing can stop us.

CONGRATULATIONS . . .

The citizenship of the Huntington Rural High School District and their trustees are to be congratulated on the successful completion of their ambitious building program. An adequate physical plant is necessary for a successful school program. Today as never before the people of Angelina County should realize the necessity of universal free education, properly directed and supervised, in which the ideals of the democratic way of life can be explained and the children of our nation can learn to appreciate the blessings of the American Way of Life by contrast with that of the other nations of the world.

Tom F. Coleman, Jr.

COUNTY ATTORNEY

Objectives of the Huntington Rural High School District

To carry out the philosophy of the American secondary schools as set forth by noted American educators, the Huntington Rural High School District seeks to attain the following objectives:

1. To create and maintain an environment which will insure the good health of the pupil and instill in him good health habits which will carry over into his adult life.
2. To guide the pupil to an understanding of underlying events which have brought about present-day social problems in order that he may be better informed about the workings of our democracy, its possibilities in the future.
3. To prepare the pupil of Huntington Rural High School District for the American way of life by instilling in him the democratic principles of tolerance, initiative, fellowship, friendliness, cooperation sportsmanship, self-control, open-mindedness, obedience to law, respect for the rights of others and for individual ability.
4. To help the pupil appreciate other than his own.
5. To instill in the pupil a spirit of loyalty to home, to school, to state, and to help him to become a desirable, efficient member of his present home as well as the home he may build for himself.
6. To instill in the pupil a respect for individual and public property.
7. To develop the aesthetic nature of the pupil so that he will appreciate the beauty of his school and neighborhood and so that he will draw out their creative powers.
8. To surround the boys and girls of Huntington Rural High School District with an environment that will draw out their creative powers.
9. To teach the pupil to be a good speaker, an accurate reader, a clear writer, as well as an intelligent listener and observer.
10. To help the pupil learn how much to study and to train him to think independently and to make decisions.

cent stamps can be purchased at the school at all times. By having stamps for sale at the school a more or less competitive spirit among the pupils is created, turning some of the erstwhile Yoo-Yoo or candy money into defense stamps.

Physical Education

This year we have tried to adhere to the State Department's program of Health Education. All of the students have supervised play periods regularly and have abundant playground equipment. The boys' playground baseball team has not lost a match game this year, neither has the girls' volley ball team. The boys' basket ball team has played in one tournament at Moffett, but was eliminated in the first round by Moffett Junior High. Last week they defeated the Huntington grammar schol team by a score of 15 to 4. There is no place where one can come nearer the development of the Morrison philosophy of Education (success, self-respect and happiness) than on a well supervised playground.

School Newspaper

For the past two years, our school has sponsored a school newspaper (The Echo). This paper has been published every six weeks and has been enjoyed by students and community alike.

Amateur Program

The amateur program which was sponsored by the Rocky Hill school at our new auditorium February 25 was a huge success. We wish to thank the people who took part in our program, which contributed much to its success.

School Improvements

The following school improvements and purchases have been made to our school this year, all of which have been accomplished without the aid of one penny of school funds: construction of a school auditorium, $180.00; purchase of a school radio, $30.00; basket ball suits, $13.02; construction of a basket ball court, $10.00; world globe, $2.50, and one volley ball, $4.25. The purchases enumerated have been made possible through the sale of advertising, school paper, candy, gum, etc., and through prizes won at The Texas Forest Festival. We now have on hand in our auditorium fund $35.00, and if any of you readers have a second hand piano for sale please get in touch with me.

School Auditorium

One of the major achievements of Rocky Hill school during 1941 and 1942 is an auditorium, with a seating capacity of three hundred to four hundred people. The stage is equipped with an act curtain and valance which was bought by soliciting ads from the merchants of Huntington and Lufkin. The stage is also equipped with cycroma which was made from drapes the school already owned. The work of constructing the stage and the proscenium was done by our N. Y. A. boys and myself. The "house" of our auditorium was made by eliminating the petition of two rooms, and this likewise was accomplished without outside labor.

Before the school year is over, we hope to equip our auditorium with a piano and with seats.

Rocky Hill School Is Rounding Out Full Program

By T. Paul White

At the beginning of the term we outlined a complete schedule of activities for the year, but with the declaration of war our plans were changed somewhat and National Defense has been placed at the head of our list of "Musts."

We find that from 100 to 500 pounds of scrap iron can be found around every home. By gathering this scrap iron, we put it in the hands of the Government. The children then take the money and buy defense stamps, which completes the deal of helping the U. S. in two ways.

Students at our school who have bought stamps are:

Casey Jones, Dawn Glenn, Bill Don Phillips, Bettie Joe Burns, Jessie B. Jones, Jessie Craig, Delbert Waller, Danny Ruth Nichols, David Kenneth Rogers, Clennon Moncrief, Marilyn Mayes, Franklin Arnold, Billie Joe Rash, CVonn Moncrief, Charles Ray Anderson, Harold Malnar, Wadous Morehead, Charleen Cassells, La Mar Tinsley, Dorothy N. Little, W. C. Treadaway, Jimmer Pinner, James Veteto, Lou Jean Matthews, Hilda Franklin, Wyvonne Due, Harley Golden, Glena Fay Golden, Auddie Lee Denman, Wilma Phillips, Jack Lyons, Sue Tinsley, Eoise Phillips, G. W. Morehead, Charlene Veteto, Marie Craig, Maurice Thomas, Ozell Nicholl, Billie Jones, Johnnie McAdams, Edison Pinner, G. W. Traweek, Charles N. Driver, James Rayburn Wash, Lordell, Ballard, Elma Lee Moncrief, Kenneth Franklin, Margaret Williams, Doris Helen Little, Edward Oates, Ottis Oates, Travis Doyle Morehead, Bennie Anderson, Kenneth Treadaway, Edgar Thomas, Mamie Arnold, Bobbie Rogers, Billie Ray Kimmey and J. D. Pinner.

By the end of this month, we are positive that our school will be on the 100 percent Honor Roll in the purchasing of stamps and bonds. Ten and twenty-five

A Pleasure Indeed!

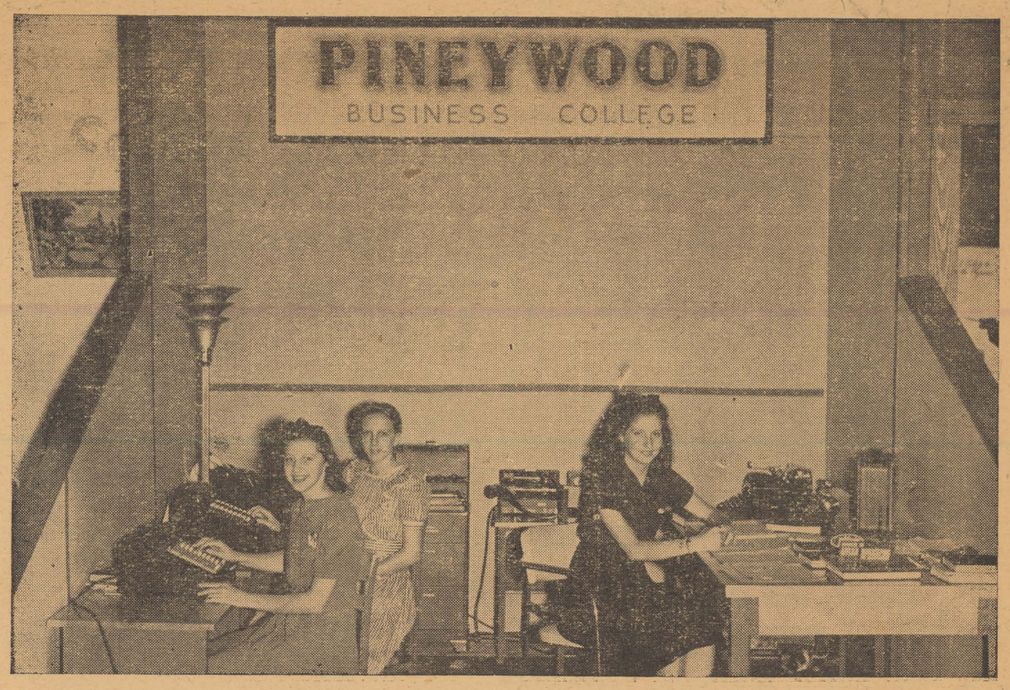

Knowing so well the endless effort and tireless energy required to Build and Maintain an efficient and creditable School, the officials and faculty of Pineywood Business College gladly pause to pay deserving tribute to one of the outstanding schools in a state noted for its fine Institutions of Learning . . .

The students and faculty of the Huntington Rural High School District have a standing invitation to visit our college . . . We consider it a privilege to explain the advantages PINEYWOOD offers . . .

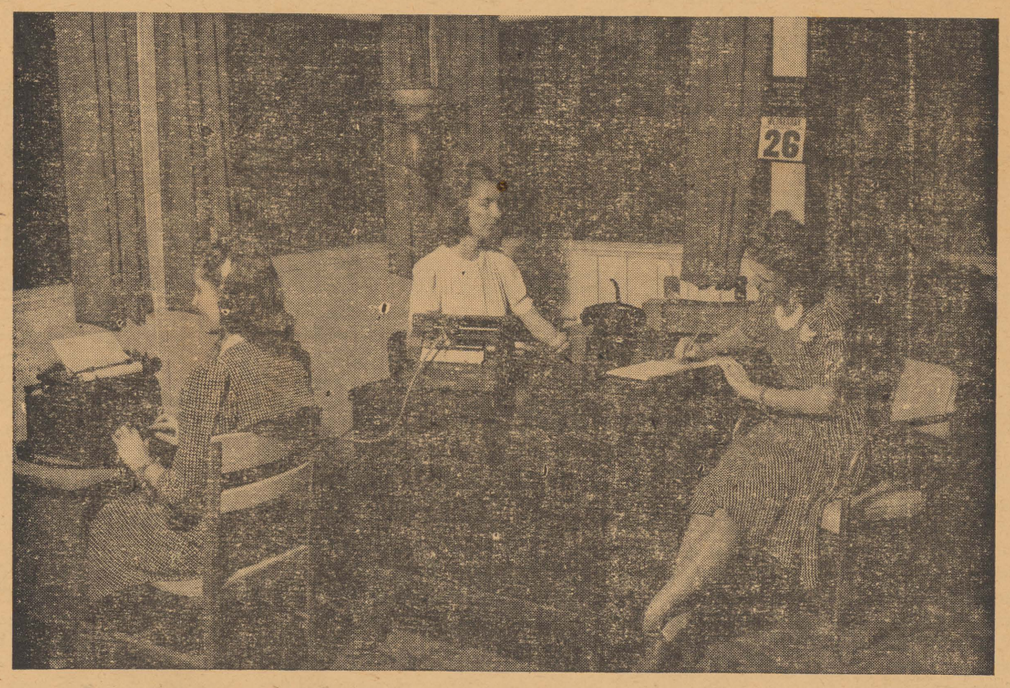

President of Pineywood Business College

G. P. SCOGGINS

COLLEGE BOOTH AT TEXAS FOREST FESTIVAL—Pictured here in the Pineywood Business College booth at the Texas Forest Festival, are Misses Hortense Walker, Ruby Smelley and Bernice Blakeway. Upon graduation, these young ladies accepted the following positions: Miss Walker, bookkeeper and stenographer at the Angelina County hospital; Miss Smelley, secretary to the Pineywood Business College; Miss Blakeway, secretary to the Texas Forest Festival.

ONLY MOST MODERN EQUIPMENT USED BY PINEYWOOD—In this partial view of the Pineywood Business College office are pictured Miss Lucille Winston, who, upon graduation, accepted a position with the Texas State Employment Bureau in Galveston; Miss Pearl Moore, who, when graduated, was selected as secretary to the Social Security Board, Washington, D. C.; and Miss Ruby Smelley who accepted employment as secretary to the college.

Secretary-Treasurer of Pineywood Business College

BEN P. SCOGGINS

PARTIAL VIEW OF SHORTHAND DEPARTMENT—Of the twenty-five students attending this class at time picture was made, all have graduated and accepted splendid positions.

PINEYWOOD'S TYPING DEPARTMENT—A partial view of which is shown above, will accomodate twenty-five students. Of the twenty-five attending this class at time picture was made, twenty-four have graduated and received employment.

ACCOUNTING DEPARTMENT—Forty students are pictured in this partial view of Pineywood's outstanding accounting department, instructors are shown in the background. All students shown in the picture are now reaping the benefits of their excellent training.

Our Compliments

We've been in Angelina County quite a while—longer than any other bank, in fact—and have watched . . . and aided as much as possible . . . the county's development. Yes, lots of changes have been made during the time we've been here—and most of them have been for the better.

But no single phase of development has afforded us more genuine pride and pleasure than the progress made by our institutions of learning.

This is but one of many reasons, however, that we are happy to congratulate the citizens of Huntington on the occasion of the dedication of their new high school plant.

Home Ec Department of Huntington Rural High School Has Made Rapid Advancement Since Organized

The Homemaking class of the Huntington school system was organized in 1936 with an enrollment of 40 students. One credit, clothing, was acquired the first year.

Another credit, cooking, was obtained the following year, thus giving two affiliated credits in H. E.

In the summer of 1937, one-half credit in summer project work was granted.

The department was completely affiliated in 1941, at which time a credit in third year homemaking was secured.

1941 was the outstanding year for the homemakers. They had an enrollment of 90 students, the largest in its history. Among the accomplishments of the group during 1941 were the nursery school, as a summer project; attendance at two area meets; presentation of a play; serving two banquets and staging the annual Mother and Daughter tea.

With the exception of Lufkin, Huntington has the best equipped Homemaking laboratory in the county.

Twenty-four students can be accomodated in the clothing and food divisions.

The class has an active Future Homemaker's Club which is affiliated with the state organization. Club pins were received by the girls for the first time this year.

It is impossible to evaluate the advantages offered students taking this course. Among graduates of the class, several are now teaching the subject in various schools.

The department has a class-A rating and is one of the leading organizations in all school activities. The teacher and students of this group are certainly to be commended on the wonderful progress they have made.

Remember Pearl Harbor! Remember it every pay day! Buy U. S. Defense Savings Bonds and Stamps.

R. E. Gillespie Plants Timber As A Crop

Another major crop has been added to the list of R. E. Gillespie, who operates a farm just north of Shawnee Switch in Angelina County.

"Cotton and corn acreage still will be heavy," Mr. Gillespie says, "but from here on I'm going to grow another important crop—timber. Of course, I've had this timber for some time, but until lately I hadn't thought about it as a crop. I'd thought about it more like a little money laid by for a trip some day. But now I know how fast those pine trees are growing, how much volume I've got per acre, and how much I can expect if I keep out the weeds, disease, and such pests as fire. And that way of looking at timber sure makes handling it more interesting."

Mr. Gillespie, who is a co-operator in the Angelina Forest Farming Project, has recently sold timber from 92 acres. The pine trees were marked selectively for cutting and only a fourth of the merchantable volume was sold at this time. The owner had other offers and had considered a sale which would have removed everything down to 10 inches diameter at the stump—or even less.

He is highly pleased, however, regarding his decision to sell by actual tally and harvest his crop selectively. He received almost as much money as if he had sold everything; but he only had to cut one-fourth of his his merchantable volume to get it. And that means that he has a good stand of high quality trees left for a bigger and better cut in a few years time.

"I never knew how fast timber growth could be speeded up by good cutting practice," Mr. Gillespie admitted. "I did know that fire was bad for timber and always tried to keep it out of the woods. But it wasn't until I joined up with the Forest Farming project and Project Forester Heers had made a cruise and growth study in my timber, that I really knew I had nearly 200,000 board feet on that 92-acre tract. I didn't know either, that my timber would grow at the rate of better than 300 board feet per acre per year, if I improved the stand by selling 25 percent of the oldest and poorest trees, thinned them in spots, and got rid of some old worthless "wolf" trees.

"That 300 board feet of growth, at $8.00 a thousand, figures to be $2.40 annual income per acre without much labor expended. With the trees I have left and by following a simple plan of management, that annual growth will increase. All of this makes my woodlot look more like a crop every day."

Under the plan and operation of the Angelina Forest Farming project, farmers of the county are being shown how to realize larger incomes from their woodlands. The services of a trained forester are offered without charge through the cooperation of the Texas Forest Service of A. & M. College with the U. S. Forest Service. The services of the Extension Service and the Soil Conservation Service technicians are available for assistance in other farm problems. Interested farmers should make application to Erwin A. Heers, Project Forester, Texas Forest Service, Lufkin; or to O. C. LaGrone, County Agricultural Agent, Post Office Bldg., Lufkin.

Since the project started last year, applications have been accepted from 24 farmers, timber surveys and plans have been completed for 12 of these totaling several thousand acres of timber land. Selective marketing of timber has been completed on 7 farms, and some planting of idle acres has been done on three.

Cooperating farmers in this part of the county, other than Mr. Gillespie, are : G. C. Carrell, Edward V. Short, J. J. Colwell, John Goodman, Lee W. Denman, T. A. Summers, O. A. Dorman and Gary Eaves.

Who's Who in Huntington High Selected by Faculty Members

A meeting of the high school faculty was called Friday to select the outstanding senior students of the year. Names of those selected will be included in the annual "Who's Who Among High School Students in Texas," which is published by Baylor University.

Students receiving this honor are judged on leadership, scholarship, character, sportsmanship and extra-curricular activities. Those chosen were Birdie Margaret Cloud, Miriam Cowart, Nelda Earle Cruse, Doris Helen Kimmey, Marjorie Poland, Charles Kannenberg, John Wesley Gates, Vetma Crain, Sulon Page and Carl Youngblood.

A brief biography of each will appear in "Who's Who?"

10,000,000 BALES

During the year 1941, the cotton textile industry consumed about 10,000,000 bales of cotton and produced the astounding total of twelve billion yards of cloth. This figure has never been approached during the entire 150 years of the industry's existence in America.

Local Happenings

Mrs. Clara Shofner spent last week in the home of her daughter, Mrs. Earl Davis, Lufkin. While there she attended the Methodist ladies' annual convention at the First Methodist church.

Miss Cornelia Wyatt spent the week end with her parents in Attoyac.

Mrs. Rebecca Sue Brooks and children of Bryan are guests in the home of her parents, Mr. and Mrs. Ross Jones.

Health Talks Over KRBA Each Sunday 1:00 P. M. Tune In!

To All Who Had a Hand in the building of the New Huntington School Plant—Our Congratulations for a Good Job, Well Done!

The officials, management and employees of The Angeline County Lumber Company and affiliated concerns have always firmly believed that our schools and churches play an invaluable part in cementing the foundation of our democratic form of government. We have always supported any sound movement for the advancement and the free and unhampered enjoyment of these indispensable institutions throughout East Texas.

For many years, we have been large employers of labor in this section of the state. Our employes have in turn used money we have paid them for purchasing homes, paying taxes, supporting schools and churches; paying the doctor, the lawyer and other professional men; for making purchases from the grocer, clothing store, jewelry store, feed store, laundry, cleaner, filling station, garage, furniture store and every other business, making it possible for these businesses to employ more men—and on and on in an endless chain anchored to our unwavering faith in the unlimited possibilities and future of East Texas in its entirety.

With these thoughts in mind, we repeat our congratulations to each and every person who had a part in forging the dreams of a new Huntington Rural High School plant into a reality. It is our sincere hope that as you dedicate this excellent plant tonight that it may be a dedication in truth and in fact to the highest and noblest service of American education and all that it embraces. And may your accomplishment ever be a source of joy and pride to each of you.

Angelina County Lumber Co
Keltys Texas

Angelina Lumber Yard
Lufkin Texas

The new Huntington high school building itself bespeaks more than I can say for the ambitious and enterprising persons whose unselfish efforts are due just credit for its realization, and I extend my hearty congratulations to every person who assisted in carrying the program through to completion.

I do not believe it would be out of place for me to take this occasion to thank the people throughout the territory served by this new school plant for the excellent cooperation they have always given the sheriff's department in enforcing the laws and thus making our county a better place in which to rear the children who will be the men and women of tomorrow. It is the training received in our schools and churches that results in a better and more law abiding and law enforcing citizenship.

My sincere felicitations to the Huntington school district and I trust that its program of dedication, patriotic rally and sale of defense bonds and stamps tonight may be an outstanding success.

Huntington FFA Exhibit at State Fair 1939

Brahman Cattle World's Oldest And Best Breed

(Continued from last week)

The investigations of Brahman cattle by the Texas Station have consisted first, of breeding, feeding, and slaughter tests of cattle bred, raised and fattened at Sub-stations 14 and 7; second, of feeding and salughter tests conducted in cooperation with the King Ranch at Kingsville, Texas, and with the Bureau of Animal Industry of the United States Department of Agriculture; and third, of visits with many of the United States Departments of Agriculture; and fourth, of visits with many breeders and field observations of the cattle in their pastures. This bulletin presents in detail the finding of the experiments conducted at Substations 14 and 7 of the Texas Station, together with general comments based on what was learned from the field observations and from the Kingsville experiments.

The experiments at Substation 14 began in 1920 with a herd of high-grade Hereford cows and a high-grade Brahman bull. The cows had about three to five topcrosses of pure Hereford blood. The Brahman bull was a three-quarter-blood Brahman loaned to the Station by the A. H. Pierce Estate, Pierce, Texas. The other one-fourth of its pedigree was grade Hereford. It was impossible for the Station to obtain absolutely pure-bred Brahman bulls at that time. Moreover the cattlemen who were using Brahman bulls for the production of market cattle also had to be content with grade bulls, most of which carried about three-fourts to seven-eighths of Brahman blood.

While the grade Brahman bull was being bred to half of the high grade Hereford cows, a registered Hereford bull was being bred to the rest of them. Beginning with the breeding season of 1923 the Hereford bull was replaced with another registered Hereford bull and the Brahman bull was replaced with a sixty-one sixty-fourths grade Brahman bull donated by the J. A. McFaddin Estate, McFaddin, Texas. Beginning with the breeding season of 1927 this second Brahman bull was replaced with another, (either a "seven-eighths" or a "fifteen-sixteenths" Brahman) given by the A. H. Pierce Estate.

The steer calves were all sent to Substation No. 7, near Spur, for fattening in feedlots. The heifer calves were kept in the pastures at Substation No. 14, until they were about 30 months old. Some of them were then added to the breeding herd and the others were sold to ranchmen, local butchers or traders as opportunity offered.

We have been informed by some of the persons who assisted in this breeding and feeding experiments that the Brahman bulls used were much of the leggy type as it was all completed before the type of beefy conformation had received much consideration. Beefy of today's type would no doubt make even greater records.....

The first-cross heifers, when kept for breeding, were always bred to Hereford bulls. Consequently they produced calves having a little less than one-fourth Brahman blood. Such calves are designated in this bulletin as "back-cross." The back-cross heifers were not kept for breeding.

The breeding of cows was maintained at a little more than 70 head. No back-cross calves were born until 1924. The bulls were turned out with approximately equal numbers of cows but the Hereford bull was the sire of the back-cross as well as of the high-grade Herefords.

Therefore there were more first-cross calves than back-crosses or Herefords after 1924, when the first-back-crosses were born.

The findings of these experiments will be presented in four natural and convenient divisions: Observations of the cattle on pasture, the performance of the steers in feedlots, findings from the marketing and slaughter of the steers, and studies of inheritance in these cattle.

(From "BREEDER-FEEDER")

(Continued Next Week)

Huntington Chapter Future Farmers of America

Briefly stated, the aim and object of the Future Farmer organization is to help Mr. Young American Farmer to help himhelf! Through participation in activities carried on by local, state, and national branches of the group it is expected that a member will learn more about the vocation of farming, develop his own capacities, cultivate an interest in his community, and get a more complete understanding of those national problems which involve the business of farming.

Future Farmers are taught to make money, to save and invest money, to work in cooperation with others, to take an unselfish interest in community life, to believe farming is a worthy occupation, and to engage in wholesome recreation.

There are four levels of membership or degrees in the organization. A boy advances from one degree to another upon his accomplishments in farming and the development of his own abilities, scholarship and leadership. To advance to the higher degrees, a boy must show an interest and a love for farming; he must demonstrate his ability to farm profitably and to work with others on an undertaking; he must be thrifty and accumulate some money or some property; he must make good grades in all his school work and take a leading part in rural recreation.

The first degree in the Future Farmers of America is known as Green Hand. Most any farm boy of good character who is studying vocational agriculture may become a Green Hand. Requirements for this degree are not so strict.

The second degree is the Junior Farmer. In order to advance to this bracket, there are certain things a boy must do that tend to develop him into a real farmer and citizen. This is the highest award of the local chapters.

The third degree is known as State Farmer (in all states except Georgia, where it is "Georgia Planter"), the highest honor that may be conferred by the state organization. A boy must be very outstanding to attain this degree. He must have saved at least $200.00 from his farming, carried on excellent farm work, been a leader in his own chapter and community, and must have made good grades on all high school subjects.

The fourth degree, American Farmer, is the capstone of attainment open to Future Farmers. This degree can be awarded only by the national organization. To receive this degree, a boy must have saved at least $500.00 in cash or in investments from his farming. He must have demonstrated in an outstanding manner his ability to cooperate with others, must be a leader among his fellows, must have shown distinctive ability as a farmer, and be a leader in his community.

Vocational agriculture was introduced in the Huntington Public School in 1933, under the supervision of D. O. Lockey, who was instrumental in organizing the local FFA chapter on January 10, 1934. Mr. Lockey served as advisor of the group until July 1, 1938, when he was replaced by the present advisor, G. G. LaRue.

The first chapter was composed of Roy Brown, Henry Caucey, Charlie B. Conner, Wayne Forrest, Hugh DeWoody, Rebecca Sue Jones, Charlie Lindsey, Palmer Ivy, J. B. Ivy, Curtis Ricks, Doyle Russell, J. C. Searcy, Guy (Docke) Sharpe, Nutran Weaver, Ruth Wilroy, R. P. McKewen, Franklin Wood, Doyle Kimmey, Tommy Cleveland, and Joe Wilroy.

The Huntington chapter has been exeremely active since its inception.

J. W. Barnes, Jr., served as first president of the group, 1934-35, at which time there were 40 members.

Hugh DeWoody served as president in 1935-36, when the chapter had a membership of 52.

Howard Gates was next in line, 1936-37 chapter, when a membership of 72 was reached.

Cecil Carrell became president of the 1937-38 chapter, when a membership of 72 was reached.

Kenneth Skipper was president in 1938-39, at which time the membership was 69.

Rayburn Hayes was president during 1939-40, when the membership reached an all time high of 75.

Medford Cowart was president of last year's chapter which had an active membership of 63.

C. A. Skipper, Jr., is president of the group this year, and the enrollment totals 46.

FFA Highlights For 1941-42

Two members had entries in livestock division of Beaumont Fair; FFA and FHT attended Fair in group. Entertained FHT with barbecue supper. Took top honors in County Forestry contest. Attended Houston Fat Stock Show and Rodeo. Terraced approximately 100 acres of land for farmers in this area. Vaccinated 85 head of swine, cattle and horses. Planted 9000 pine seedlings on old land. Entered into cooperative purchase of seeds for permanent pastures. Bought certified seed corn on cooperatives basis. Sponsored Huntington tradesday and Santa Claus visit. Collected money and materials for Christmas gifts to the needy of Huntington and surrounding communities.

Chapter Sweetheart

YVONNE HARVILL

Each year it is customary for FFA members to elect a chapter sweetheart. Lovely Miss Yvonne Harvill, daughter of Mr. and Mrs. Pat Harvill, has the distinction of being the first sweetheart in the history of the local organization to receive this honor two years in succession.

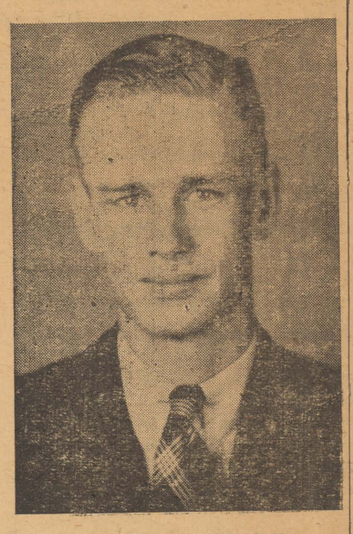

The swethearts are guests of honor at all FFA gatherings.

Relative of Rev. J. E. Dudley Goes Down With Cruiser

Mr. and Mrs. Rufus Dudley of Houston were officially notified Sunday that their son, Roland, age 20, was among those lost when the Cruiser Houston went down during the crucial naval battle off the Island of Java February 28.

The young man was a cousin and foster grandson of Rev. J. E. Dudley of this city.

Past President

MEDFORD COWART

Medford Cowart was the first boy in Angelina county to be advanced to the fourth and highest degree offered by the FFA —that of American Farmer.

Young Cowart had a splendid record of service in FFA work in addition to well planned project programs which enabled him to take his American Farmer degree.

FFA members elected him president of the local chapter for 1940-41. Medford is now employed by the Texas Foundries in Lufkin.

Local Happenings

John Herrington student at Lon Morris, Jacksonville, was a week end visitor in the home of his mother, Mrs. J. C. Herrington.

Miss Doris Gibbs of Shawnee Prairie entertained with a party at her home Thursday night. Quite a number young people from Huntington were present and all enjoyed a pleasant evening.

Spring training for the Huntington Red Devils will begin today. The boys as well as the coach are planning to have a better team than ever next year. Three first-string men will not be back next year, Lavern Kirkland, R. B. Nerren and Linwood Marshall.

Mrs. J. R. Steele returned Sunday from a week's visit in Nacogdoches with her daughter, Mrs. Bill Roberts, and Mr. Roberts.

Living To Serve

The Spirit of Democracy

BUILD is a magic word . . . There is nothing that affords man more joy and satisfaction than the consciousness of duty performed . . . the knowledge that he has created something . . . finished a task . . .

Now . . . that the job is done . . . we commend the entire citizenry of Huntington upon the occasion of the dedication of their new school plant—another monument to the UNITY that has played such an important role in making America the great nation it is today!

Through the years of our national existence, the willingness to forget personal and sectional welfare, the combining of all effort toward the common good, to the exclusion of selfish regard for the few, has come to epitomize the Spirit of Democracy . . .

The perpetuation of our freedom . . . the continuation of inalienable rights to all citizens . . . the enjoyment of the privileges of free and private industry . . . and the opportunity to pioneer new fields of endeavor —The Spirit of Democracy—depends immeasurably upon adequate school facilities and the efficiency of the public educational system of our country.

Yes, the new Huntington school plant is a credit to Angelina county and we congratulate all whose efforts contributed to its successful completion.

Angelina Hardwood Co.

School---

(Continued from front page)

headed by L. A. Whitton, whose assistants were J. J. Collins, Belle Allwine, and J. W. Roberts. There was no change in the school board indicated until 1911 when Dr. R. B. Forrest succeeded R. P. McKewen. It was during this time that the enrollment reached 168, and the faculty was composed of J. M. Massengill, Belle Allwine, May Russell, and B. C. Ivy. The principal's salary was raised to $85 per month and the assistants drew $55, $50, and $60 respectively.

The citizenry became especially school-minded in 1912 and a movement for better school conditions was staged. A bond election was called and $8,500 worth of bonds were voted to erect a two-story brick structure. These bonds were described as 40-year 5 percent bonds to be optional at the end of 20 years. The election carried by a vote of 48 to 0 which indicated that there was an obvious need for school accomodations. R. Lee Brown headed the schools with T. A. White, Ida Irene Mixon, and Irene Keeters assisting. There were 174 students listed on the school rolls. The District had a valuation of $279,090, which proved to be adequate for school support during this building program.

Huntington High School received a first-class rating by the County Board May 5, 1913. This was the first year of school in the new brick building. Teachers' salaries were on the incline and the term lengthened. The teachers were R. L. Brown, R. N. McMullen, J. M. Burnes, and Irene Sketters. L. C. McVay, John R. Hawkins, and E. M. Foster constituted the board of trustees. 1914 ushered in a new era for standard high schools. The County Board passed a regulation May 4, 1914, requiring a minimum term of seven months for all classified high schools in the County. Principal W. O. Boozer was given a contract at $100 per month. Vera Menefee received $65, Ada Petty, Eva Dickens, and J. M. Burnes $65, $60 and $50 respectfully. The school board was composed of L. C. McVay, John R. Hawkins, and W. D. Ivy.

A petition signed by S. W. Bullett and thirty-six other persons was presented to County Judge E. B. Robb, June 20, 1914, praying to determine if the residents of Huntington Common School District No. 41 should form an incorporation as an independent school district for free school purposes. Judge Robb ordered the election to be held at the school building in the town of Huntington July 18, 1914, and R. N. McMullen was appointed presiding officer. The judge further ordered that an election be held at the same time to elect seven trustees of Huntington Independent School District. This election carried, and the record keeping for the school District, was transferred from the County Superintendent's office to the local school boards. As fourteen year's school-board minutes are not available subsequent to this date, the history of this school will suffer a break in its transition during the remainder of this article.

The former high school building was made possible by the issuance of some $20,000 worth of bonds dated June 1, 1925. The County School Board minutes under date of November 22, 1926, disclose a favorable report of the State Department of Education Supervisor. W. D. Ivy as president of the County Board at that time. Huntington High School was rated first class, and lengthy commendations were inserted praising the school's progress in erecting a $17,000 high school building, spending $6,000 for equipment, $300 for library books and $250 for laboratory supplies. It was recognized that the school had the following credits: English 4 units, Spanish 2, History 3, Civics 1-2, Commercial Arithmetic 1-2, Vocational Agriculture 1, Physics 1, Algebra 2, Plane Geometry 1, Solid Geometry 1-2, and General Science 1. The School Board of Trustees in 1928 voted to add the eleventh grade of work to be effective during the ensuing year.

Bonded Indebtedness

Bonded indebtedness aggregated $24,400 in the year 1936 on Huntington Independent School District, and the maturities were so arranged that it made a hardship on the District to care for them as they came due; so the $4,400 of the 1913 and the $20,000 of the 1925 issues were refunded. This formed a refunding issue dated February 1, 1936. When the Rural High School District was created, Lala Hill had $550 worth of bonds outstanding, March 2, 1940, bonds in the amount of $15,000 were voted for the purpose of defraying the sponsor's part in the W. P. A. Building Program. Rocky Hill's bonded indebtedness at consolidation was $5,150 which, added to the above listed issues, will amount to approximately $44,350. The Huntington Rural High School Board has levied a 50c rate, which on the basis of present valuations will yield around $4,000 annually for sinking fund purposes. That will adequately care for liquidation of bonds and leave 50c of the tax dollar for maintenance purpoces.

Board of Seven Trustees

The Board of Trustees is composed of seven members of whom one was elected from each of seven of the eight school districts which compose the Rural High School District. They were: W. O. Gainer, of Lala Hill, President; Leon Yeates of Huntington, Secretary; John Boyett of Odell; Homer Reeves of Little Hope; W. E. Pittman of Retrieve; L. M. Forrest of Salem; and H. Harvill of Oak Flat. As the seven were elected April 6, each had to draw for the length of his term. Homer Reeves, W. E. Pittman, and W. O. Gainer drew one-year terms; H. Harvill, and Leon Yeates drew two-year terms; and John Boyett and L. M. Forrest three. Each of these trustees was serving on the board in district before the creation of the new District. The Board is now composed of the following: W. O. Gainer, Grover Carrell, John Boyett, Homer Reeves, W. E. Pittman, W. L. Hudnall, and H. Harvill.

Campus of Seven Acres

The Huntington High School Campus consists of seven acres covering two entire town blocks, located just north of the business center of the town on the main street. The school plant consists of three main buildings, gymnasium, band house, and "Tatler" office with an aggregate value of $70,000. The high school building is constructed of buff-face brick, the grammar school building is made of brick and hollow tile, and the others are frame. The band house and primary buildings are separate structures while the agriculture and home economics departments are taught in the same house.

Fully Accredited

All of the subjects taught in the high school which include vocational agriculture and homemaking except Bookkeeping and Spanish are fully accredited by the State Department of Education. Bookkeeping is being offered this year for the first time, Spanish is being taught for the first time in several years, and the credit is being renewed. Huntington has 29 credits and with Spanish and bookkeeping, there will be 32. These include: English 4 units, Ancient History, Modern History, American History, Civics, General Mathematics, Algebra 2 units, Plane Geometry, Solid Geometry, Advanced Arithmetic, Typing, Junior Business Training, Shorthand, Commercial Arithmetic, General Science, Biology, Band, Vocational Agriculture 4 units, Homemaking 4 and Occupations.

The Curriculum

In addition to the conventional academic subjects which are taught in small high schools, the Commercial Department is outstanding. The individual of tomorrow can not be careless in business affairs. Only yesterday many successful men rode the prairies of Texas. They never kept accurate records of their transactions, and in many instances could not read or write a business letter. They carried checks for weeks or even months without depositing them and violated nearly all other business practices, but today these practices are rapidly disappearing. Tomorrow will be a new day of accurate records, carefully worded letters and prompt pains-taking attention to legal requirements. Tax requirements, reduced profits because of competition and vanishing frontiers, increased complexity in technical operations, and many other factors forecast a greater need for business information and training of our youth today. These are necessary in order to equip our youth for competition on equal terms in the business world.

Business arithmetic carried 1-2 unit in value and is a prerequisite for bookkeeping which we hope will soon be added to the curriculum. The consumer's need of arithmetic has been intensified as a result of rapidly changing business environment; in other words, the growth of installment buying and the multiplicity of financial institutions offering various types of financial service requiring a keen mathematical sense on the part of the consumer for discernment of choice make this more imperative. Two types of students are recognized as needing this course; namely (1) the student who will go into specialized bookkeeping fields; and (2) the student who will receive no further business training. Both groups should be prepared to meet the needs of their business lives.

Band

Under the direction of Mr. I. P. Renfro, the school band has made an excellent showing. There are about thirty students enrolled in this organization who seem not to be afraid of work, and the results are commensurate with their expectations, and far in excess of the fondest anticipations of the community generally. Through the diligence of the "Band Mother's Club," and the cooperation of business organizations and patrons of the school, the band was presented with beautiful uniforms and several large instruments which included a baritone, a melophone, a bass horn, and a Sousaphone.

The band played at almost every entertainment which was held at the school building during the year, and several of the basketball games. They made several trips with the team and played at several neighboring community programs. It is expected that the Band work will be accredited next year and that its numbers will be increased to forty-five or fifty. The band organization is now housed in an attractive one-room building which is known as the "band-house". This building was provided about mid-term last session, and from that time on, it seemed that the organization was filled with an inspiration which was reflected in their progress during the remainder of the year.

The various departments in the curriculum are designed to train our students to do better the things which they are going to do anyway. Students should decide early in their high school careers, or even before, what they expect to follow as a vocation, and shape their curricula in keeping with these inclinations, Huntington High School Departments of Homemaking and Vocational Agriculture are especially outstanding. Girls are taught to make their dresses, prepare and serve foods, and to do the routine which is expected of an efficient house wife. Boys receive special training in agricultural pursuits such as farming, stock raising, and various skills which the successful farmer should know.
