Houston East & West Texas Railway Company, Index of Names in Pay Roll Book January 1921, First Period (2001:004)

Although a Finding Guide is available elsewhere on our website, the archivist also prepared the following name index, which is a list of employee names, occupation, and the station where they worked. Names are not alphabetized and instead are listed in order of appearance within the payroll book. Because the volume's pages are not numbered, artificial numbers have been assigned by the archivist to assist researchers in locating names. The first page is designated as page one, and subsequent pages follow in numerical order thereafter. These numbers are bracketed in the lower right corner of each page. This file is text searchable, to facilitate finding specific names.
