2C58

The bigger they come, the harder — and quicker — they fall with a LUFKIN.

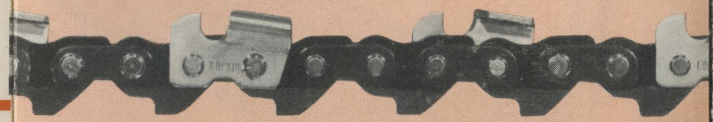

This saw does its own pulling — easier on the operator . . . easier on the equipment.

Putting this saw to the test is a cinch. Quickly, easily the teeth slice through the biggest tree.

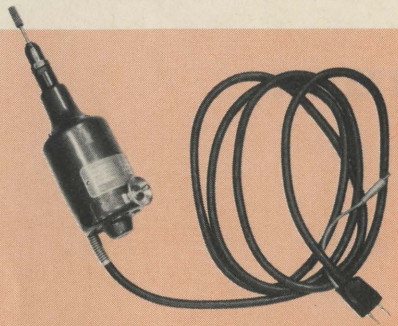

LUFKIN

CHROME TOOTH CHAIN

This new LUFKIN Chrome Tooth Chain means more profit for the timberman because chrome teeth hold a point much longer. Too, the rakers have a one-eighth inch face that is not chrome, allowing the filer to cut the rakers down to any necessary depth with an average file.

Light weight but heavy duty are the characteristics of this LUFKIN Chrome Tooth Chain.

DUMORE HAND GRINDER

Sharpen your chains with a Dumore Grinder for a sharp and accurate cutting edge. Motor .07 H.P. Available for 110 AC only. See your LUFKIN Dealer for a demonstration.

MIGHTY MIDGETS *Lufkin Model 30 - 3 H.P.*

and Lufkin Model 46-A • 5 H.P. One Man Operation!

With LUFKIN saws, you can carry the strength and might of three and five horses into the woods with you, and do your own felling and bucking. No matter what kind of cutting you want to do, you've got a speedy, labor-saving combination in LUFKIN saws and sharp LUFKIN cutting chains.

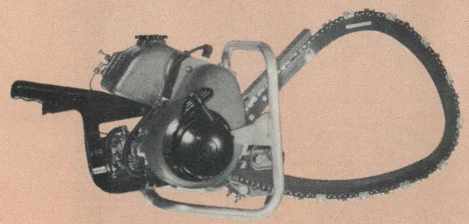

See your LUFKIN dealer and try out the new LUFKIN M30 and M46-A. From the moment you pull the starter, you'll know that these rugged workhorses meet the needs of modern timbermen.

When you need a chain saw, buy LUFKIN. You can't beat its performance.

CHECK THESE FEATURES!

- POWER PRODUCTS ENGINE – 3 H.P. and 5 H. P.
- AUTOMATIC CLUTCH – Centrifugal-wet type
- CARBURETOR–Tillotson all-position, engine runs any angle
- TRANSMISSION – Steel gears
- OILER – Manual type
- MAGNETO – Phelon
- STARTER – Self-rewinding
- CONTROLS – All within easy reach for efficient operation
- NARROW PROFILE GUIDE RAIL – Makes boring easier; keeps weight down and reduces binding. Available in the following lengths: 12″, 14″, 16″, 18″, 24″ and 30″ straight bar and 15″ bow.
- CASTINGS – Aluminum, easy to weld.

PLUNGE TYPE BOW

This is a Bow that will go! LUFKIN'S Bow Saw bucks them up quickly without binding in the cut. This 15″ Bow runs .063 and .058 chain, hard surfaced. It takes only a few seconds to change from bow to straight bar. You have the same tensioning device — same oil hookup.

This one-man LUFKIN Bow Saw is your answer for a versatile cutting tool.
