LUFKIN

Gears

Meeting the Demands of the Steel and Aluminum Industries

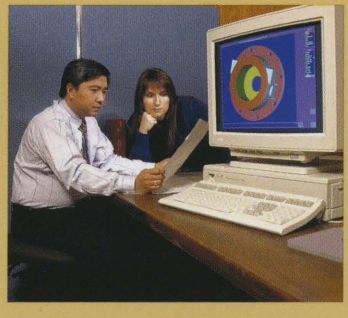

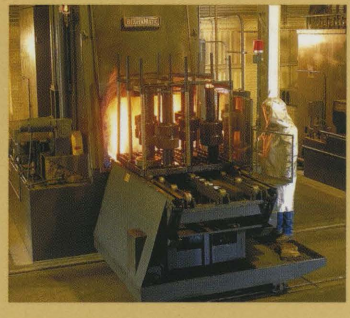

Copied from an original at The History Center. www.TheHistoryCenterOnline.com 2013:023

Steel industry service requires all Lufkin products provide exceptional performance even in the most extreme conditions.

A certified ISO 9001 company, Lufkin Industries has been supplying quality gear drives customized to meet the requirements of its industrial customers throughout the world for over 50 years. The extreme operating conditions found in metal processing mills require gear drives that are highly durable, resistant to constant stress and provide increased power capabilities in order to maintain optimum performance.

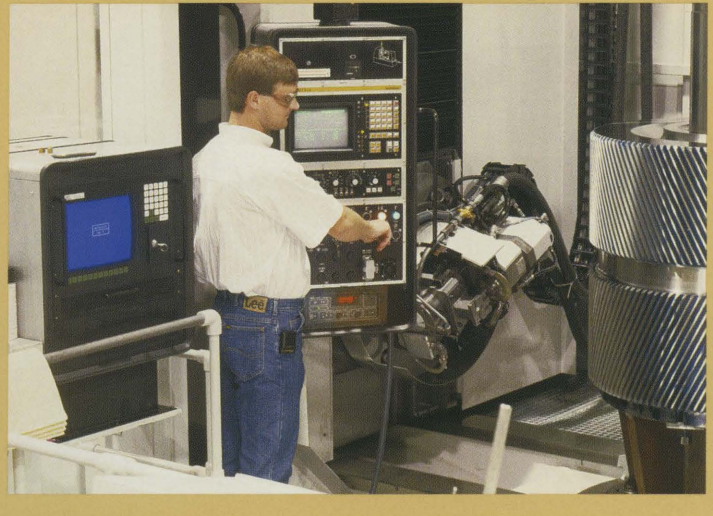

Lufkin produces gear drives, which meet the customized requirements of the steel and aluminum industries, with state-of-the-art 3-D design and manufacturing technology.

At Lufkin, all gear drives to be used in steel and aluminum industry applications are specifically designed and produced to withstand the intense heat, moisture and heavy shock loads present in the typical mill environment. Superior product technology combined with exceptional problem-solving capabilities allows Lufkin to produce customized gear drives which meet the tough needs of mill service.

By using state-of-the-art 3-D product design technology, Lufkin is able to eliminate potential problems prior to production. All design functions are totally integrated with the production phase; therefore, what is designed is exactly what is produced.

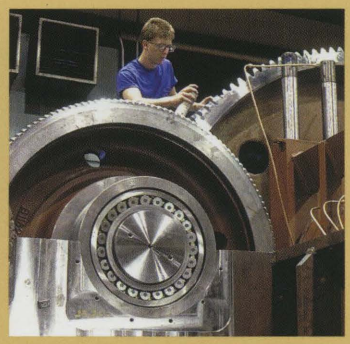

The latest technology in gear tooth machining ensures the accuracy and smooth operation of each Lufkin gear drive.

Lufkin is capable of handling all facets of the entire manufacturing process from the initial design to fabricating the gear boxes, to carburizing and CBN finish grinding the gear teeth. Strict quality controls and extensive testing are enforced on all products to assure product integrity and longevity.

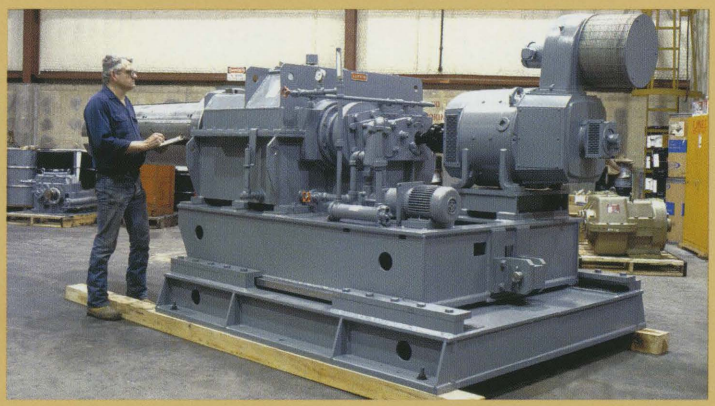

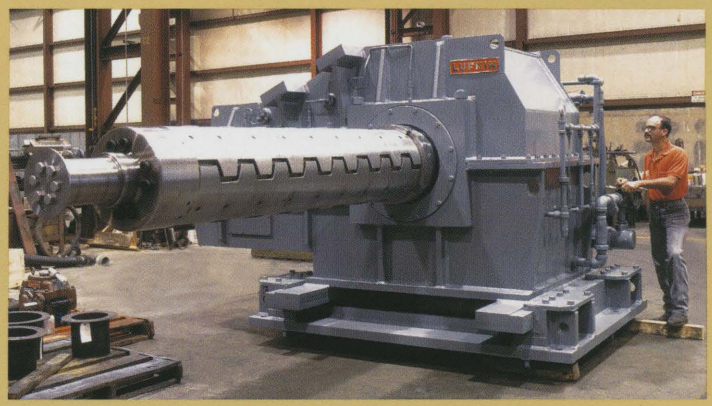

Lufkin Industries takes pride in the quality, performance and long operating life of each gear unit that is produced.

Product design technology, manufacturing expertise and a full range of testing capabilities enable Lufkin to provide gear units that are more accurate, smoother running and longer lasting even in the most demanding circumstances. Committed to excellence, all Lufkin products are backed with exceptional service support anywhere at any time.

The drive units shown above illustrate Lufkin's ability to custom design and produce reducers to meet specific mill builder requirements.

Mill drives produced by Lufkin have the reliability and features to meet a wide variety of applications such as:

Bar Mills
Billet Mills
Blooming Mills
Bridle Rolls
Cold Mills
Combination Drives
Edging and Finishing Mills
Hot Strip Mills
Leveler Drives
Pinch Rolls
Pinion Stand Drives
Plate Mills
Reversing Mills
Rewinders
Rolling Mills
Slabbing Mills
Structural Mills
Uncoilers
Wide Flange Beam Mills
Z Mills
