LUFKIN'S NEW HOTEL

THE NEW HOTEL ANGELINA

A credit to the best town in the South. Modern in every respect and where courtesy and service are paramount. T. H. Barnett, Manager (Insert.)

JULY 15 marked the beginning of a new epoch in Lufkin as a "Hotel Town," with the opening of the "Angelina," a modern fireproof hotel, equal in all its appointments to any large city hotel except for size; and even then it stacks up well with sixty-five (65) rooms, forty-six (46) having baths, and running water in every room throughout.

Although a formal opening is planned a little later, (due to some unavoidable delay in the furnishings, particularly carpets) the lumbermen really "opened" the doors to the public, giving it a fine start.

The management even with "green" help was equal to the occasion, serving a seven course luncheon to about fifty stockholders at 11 A. M., and one to a hundred lumbermen at 1:15 P. M., in a way that would do credit to any hotel in the country.

The building is five stories high, designed so that all rooms are on the outside—with wide walls lengthwise on each floor—accessible from the lobby by elevator service.

The first floor contains a spacious lobby, a large dining room, and a modern hotel kitchen, etc.

The rooms are handsomely furnished with heavy carpets and draperies, the best furniture obtainable, and a special screen door on each room that will insure a cool night's sleep to the weary traveler.

The lobby is spacious, well furnished with the very latest rugs and upholstered furniture, and every comfort for the traveling public.

The dining room is large and beautifully decorated and furnished with a large supply of linens, china and silver of the very finest, to suit the most exacting; three hundred can be served at a banquet comfortably and well.

The large kitchen has a great cooking range, steam warming ovens, electric dish washers, cold storage with every modern appliance used in the cooling art of a hotel, are provided equal to any (except in size) in this country.

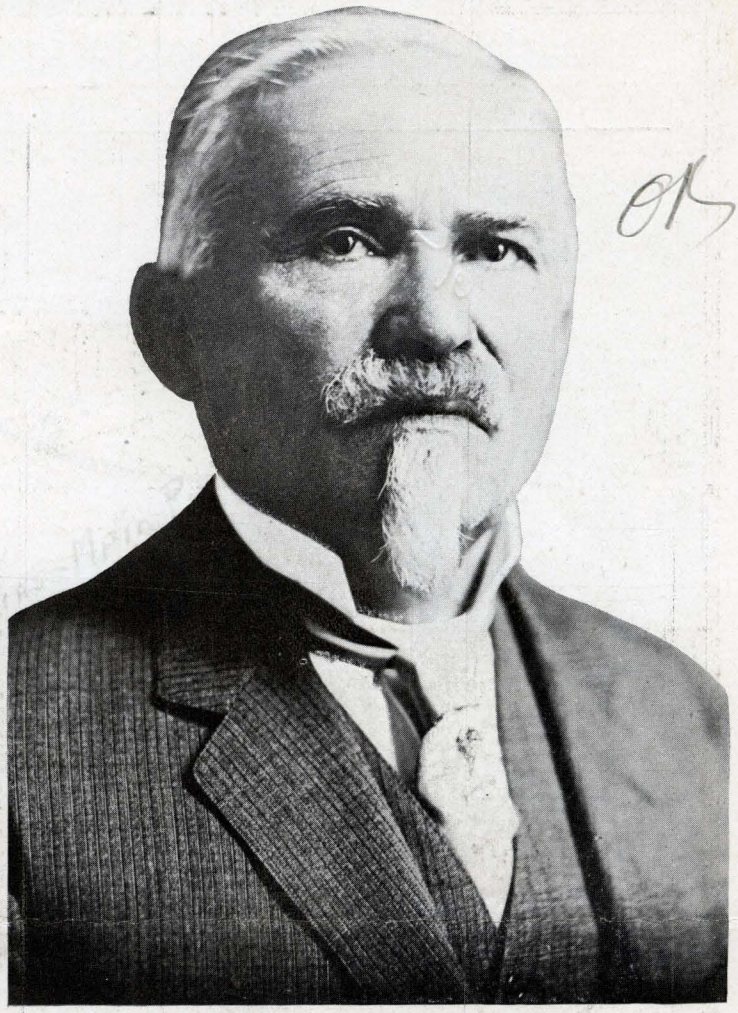

We are pleased to present to our readers a half tone

GEORGE A. KELLEY

JOSEPH H. KURTH, Sr.

TWO LUFKIN LUMBERMEN WHO MADE THE HOTEL POSSIBLE

LUFKIN has made greater progress to civic betterment in the last three years under Mayor Kelley's administration than in the ten years previous—an example of what business methods properly applied to city administration will do—to insure confidence—to create a united public spirit that has shown expression in many civic improvements, in paved streets, and lastly in a magnificent new hotel shown on the opposite page.

While Dr. T. A. Taylor should be given credit as perhaps the original promoter, G. A. Kelley and J. H. Kurth, Sr., taking practically half the stock, the other to be taken by the business men of Lufkin and Angelina County, made the hotel possible. Their backing the proposition soon developed the desire for the balance of the stock, not only in Lufkin, but by some of our ex-lumbermen who were formerly interested were glad to come in, among these being: A. J. Peavy, E. A. Frost, S. F. Carter, B. F. Bonner, John Bonner, S. M. Morris, and in Lufkin A. L. Boynton, Lee Ziegler, S. W. Henderson, R. W. Swank, E. L. Kurth, W. C. Trout and others.

Therefore the "Angelina" is an expression of the lumber fraternity's confidence in Lufkin, and their desire that those who travel to see them shall have all the comforts a modern hotel can give.

While the directors of the project took exceptional interest in the building, it must be said that Mr. Kelley fathered the undertaking, giving it his personal attention for nearly a year—architects and contractors left alone will design and finish the building—but, like building a saw mill, the personal supervision and interest of the owner makes a wonderful difference in the results—and in a hotel, even more than other structures, there is a never ending number of details to pass upon, from the digging of the foundations until the first guest registers.

In this Mr. Kelley took the personal interest necessary and the building and its appointments show the result.

Long ago, seeing the need of a new hotel for Lufkin, J. H. Kurth, Sr., was among the earliest champions of the project. Unfortunately, however, owing to sickness, he was away from home a great deal of the time, especially during the early months of construction, nevertheless he was much interested in the building and the final results.

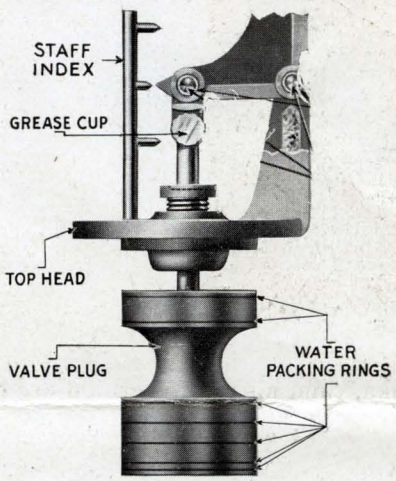

The stockholders, citizens of Lufkin and the traveling public will probably never know the sacrifice these gentlemen, particularly Mr. Kelley, have made for their comfort and convenience—yet it must be said that those interested fully appreciate this expression of real service to this community.

THE NEW STYLE IMPROVED

Trout Vertical Steam Feed Valve

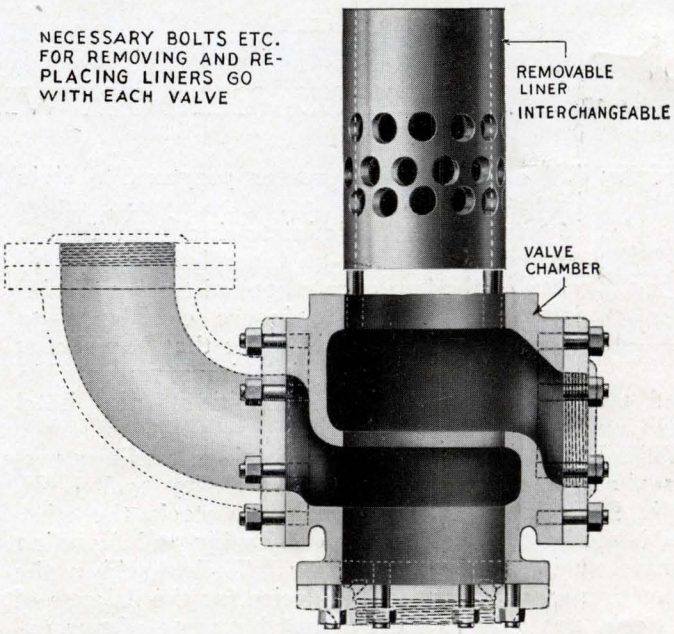

They have a renewable liner that is interchangeable, making it unnecessary for you to take your whole valve down for reboring—just insert a new liner and your troubles are over.

Positive shut off in case something breaks.

They will increase your cut 10% and lower your fuel consumption by the saving of steam. The saving of fuel alone is worth the price of the valve, yet this is a minor item of savings effected.

The Only Steam Feed Valve on the American Market Today With a Renewable—Interchangeable Liner

LET US SEND THEM TO YOU ON TRIAL

Observations at the Lumberman's Convention

LUFKIN, TEXAS, JULY 15, 1922

FROM THE "LUFKIN LEADER"

E. L. KURTH

WHILE wandering around the edge of the crowd, O. D. Newby of Camden lost his hat; claiming Bonner took it.

J. H. Kurth, Sr., calling Harry Roehl "Sonnie."

It would have been a calamity if the elevator had stopped running.

A certain lady from Polk County was considered the best looking at the convention.

Harry Roehl lost his rain coat—why carry one—there was no rain.

S. M. Morris was much among the missing.

Getting married didn't prevent Frank Tuxworth from getting up a good dry kiln article for the meeting.

John Bonner's "Josiah and Cachunka," and his negro sermon are more popular than ever.

Mayor Kelley should have heard all the complimentary remarks about the hotel.

Big Bob Carpenter broke the new barber chair testing it out for the first time.

The carpets were on the fifth floor, as well as all the "Trimmings."

John Phillips, the "Ice man" knows how to entertain and serve frozen watermelons—and Bonner knows how to eat them.

Ernest Kurth and John Bonner can sing well together when they are "fit."

Frank Tuxworth and his blushing bride took the doll with long tresses and a "comfort"—presented by Bonner as gracefully and as appreciatively as could be expected. Yet we cannot help but feel that the groom had a yearning desire to give someone responsible—a vigorous lift in the rear extremity.

Lufkin's new Hotel Angelina knows how to "serve" a lumber convention crowd and keep them all happy—eating, sleeping, dancing or drinking "punch."

John Bonner and Watson Walker made the 2:45 A. M. train for Houston.

Bob Carpenter located his pocketbook in time to leave Sunday noon.

All in all, every one had a good time that will not be forgotten soon. Lufkin can be classed as a convention city.

Jasper Peavy knows how to make it plain and tell it straight. His speech was to the point and highly commended.

Tullos and Barnett amply exemplified their experience as city hotel men. Their arrangements, even with green help, were like clock work.

Ward Kelley and Harry Roehle came loaded with statistics on costs of supplies, but failed to register. But they had a good time. Their turn will come next time.

Al Boynton wore the elevator out.

The ladies committee attended the visiting ladies royally—keeping the wives away from the hotel during the refreshment period.

Jack Wilson was a welcome new member who thoroughly enjoyed the convention.

Alex Thompson of Houston, E. E. Hays and wife of Carson and Zycher Baber of Maine, W. W. Wallace and wife and Miss Carpenter were among the notable who added dignity to the proceedings.

Chas. Haggerty was the Beau Brummel of the convention.

GEO. R. CHRISTIE

Chief Meyer of Wiergate can always have a good time.

Page Baxter Stalcup was the quietest man at the meeting.

Westly West sat still for four and one-half minutes by the watch.

Everybody enjoyed the "lake supper." Barbecue goat and "gar" as Bonner put it, still he couldn't satisfy his appetite for "cat."

Lee Ziegler's auto "service" was the best ever.

Harrelson should be hung for running off with the badger victim. Eagle lost his chance for revenge.

It is evident between his big Sunday Bible class and the Mill Managers Association, Hickerson will make a good president.

Mrs. Ernest Kurth was apparently among those missing.

Everybody agrees the new hotel was properly initiated.

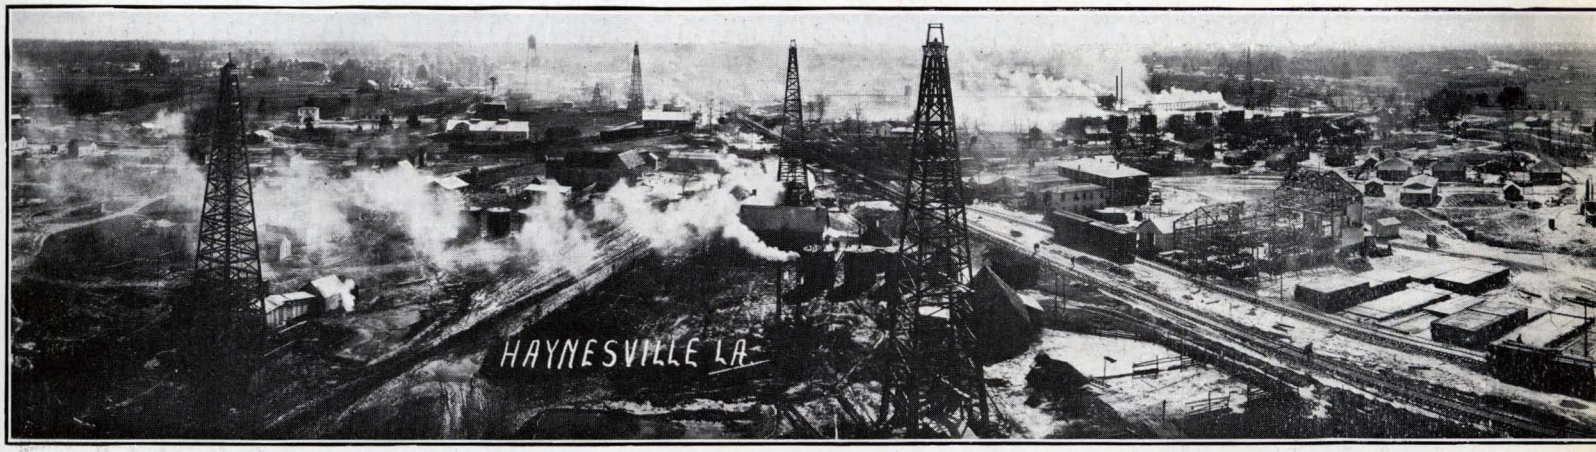

LUFKIN'S NEW HOTEL

(Continued from Page 2)

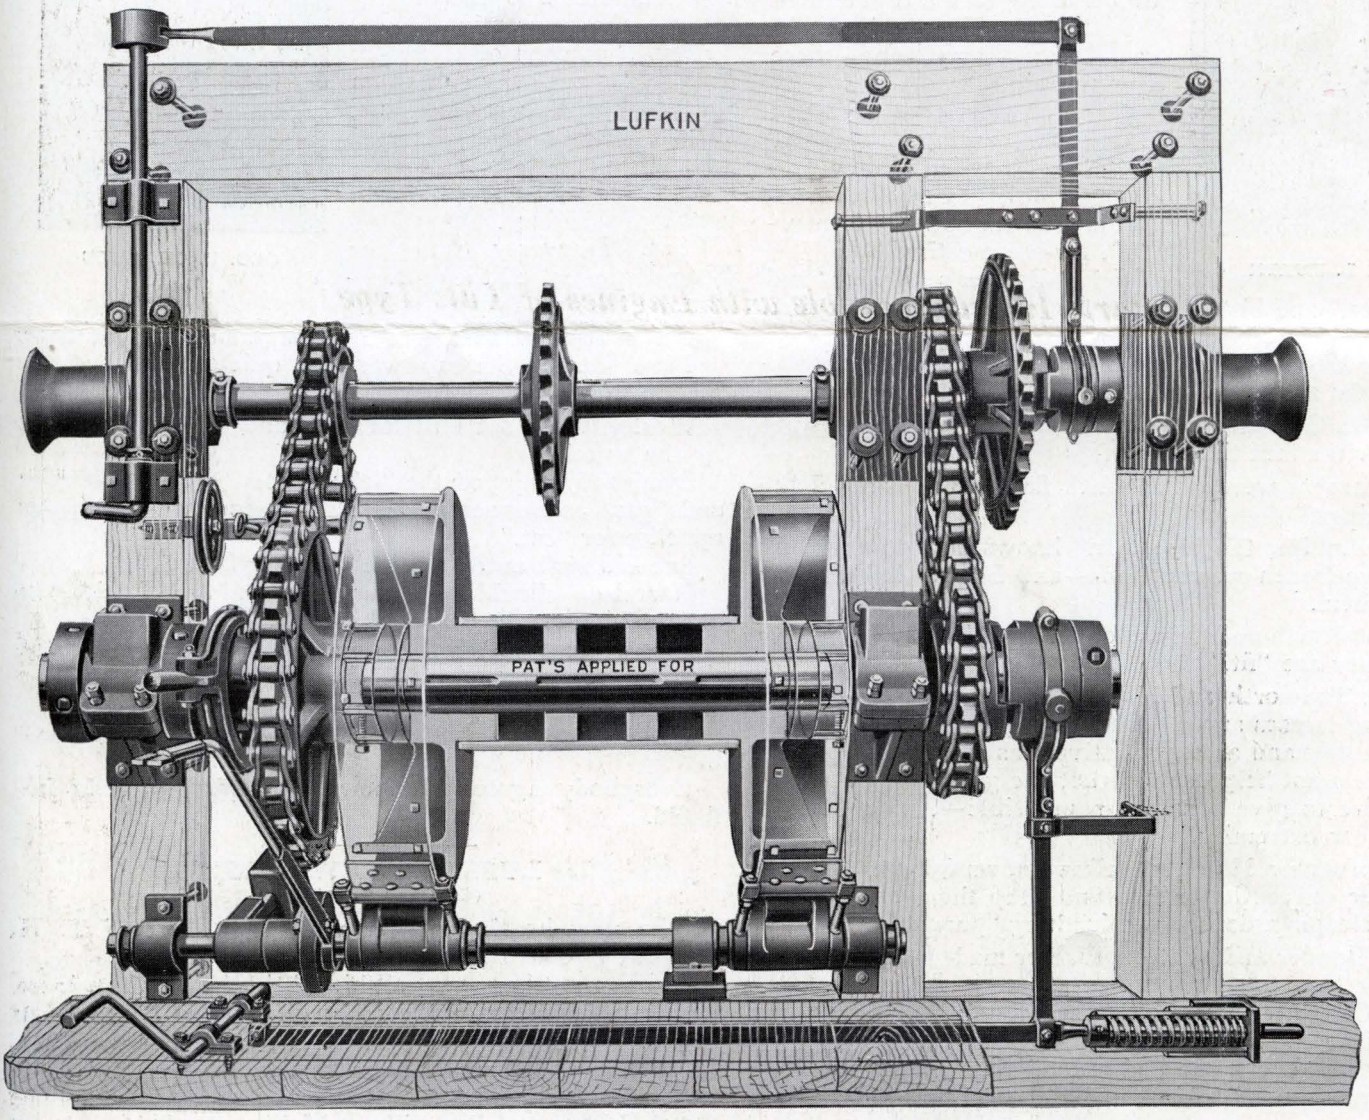

of the new hotel, together with the insert of T. H. Barnett, who will manage it.

Mr. Barnett has spent all his life in the hotel business, growing up through the most difficult end where the money is made or lost (the dining room and kitchen); is experienced thoroughly as a steward chef, and mananger in the largest and best hotels of the South—The Battle House and Brenville at Mobile, the St. Charles at New Orleans, and others of equal repute, so that he not only has the necessary experience but business acumen that is required to run a modern hotel. Judging by the start made, the Angelina is to be well managed and a successful venture for both the hotel and operating company.

8:30. Return to Hotel.
9 p. m. Reception and dance until 12 midnight.

"WHAT THIS COUNTRY NEEDS"

What this country needs is not a new birth of freedom, but the old-fashioned $2 lower birth.

What this country needs isn't more liberty, but less people who take liberties with our liberty.

What this country needs is not a job for every man, but a real man for every job.

What this country needs isn't to get more taxes from the people, but for the people to get more from the taxes.

What this country needs is not more miles of territory, but more miles to the gallon.

What this country needs isn't more young men making speed, but more young men planting spuds.

What this country needs is more paint on the old place and less paint on the young face.

What this country needs isn't a lower rate of interest on money, but a higher interest in work.

What this country needs is to follow the footsteps of the fathers instead of the footsteps of the dancing master.

WHERE IS YOURS?

A colored parson was reading the Ten Commandments to his congregation, and when he came to the one that leads to Reno, a sporty brother in the congregation snapped his fingers and registered an air of satisfaction, then whispered to his neighbor: "Now Ah knows where Ah left mah umbrella."

KU KU

"What party do you affiliate with?" the registrar up at Haynesville asked a dusky damsel who would be a voter.

"Huh! Do I has to answer that befo I kin vote? Well, I wants to tell you I 'filiates with a respectable man, and I ain't tellin' who he is, vote or no vote!"

Employer: "And you were in service during the war?"
Applicant: "Yes, I was a pilot."
Employer: "Air service?"
Applicant: "Nope, cavalry."
Employer: "Pilot, cavalry? What were your duties?"
Applicant: "I used to pilot here and pilot there."
—Back Fires.

Another new song—The Stockyard Blues; the words are not much but the air is bully.

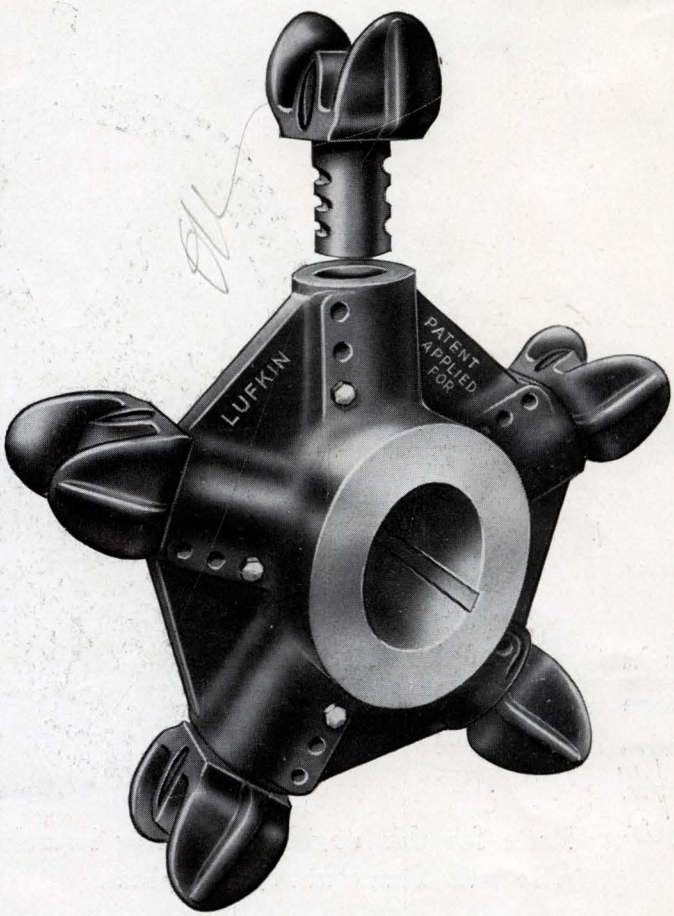

The Only True Expanding Feature in a Round Link Conveyor Sprocket Is Contained in the

New Style Trout

Machine Fitted

Expansion Sprocket

All teeth are machine fitted to jigs and templates—Note the real expanding feature—Turn the teeth around and raise it a "hair"—Take up as much as necessary when your chain wears. While this is a new designed sprocket we have patterns for most any size chain.

Our Beaumont Branch

Due to changes at the Crosby Hotel Building, and our inability to renew our lease, our office has been moved to 204 San Jacinto Building. Our warehouse facilities will be maintained as before.

Our friends will be welcome to our new offices as before—make it your headquarters while in Beaumont. **Our 'phone is still 1234.** Mr. Edwards will as heretofore represent us and manage this branch, and Mr. Ivy Horn will have charge of Office and Warehouse.

Your 'phone and mail orders will have the same prompt attention.

Phone 1—2—3—4

OUR ANNUAL PICNIC

As is our custom, the employes and their friends will have their annual picnic at Brookshire's Lake Labor Day, September 4th.

This is a big event not only for the employes, but for the citizens of Lufkin, particularly those associated with the Foundry; also its immediate customers, who have always taken great interest in this event.

The fun starts at 10 A. M., and there is not a minute wasted during an entire day. Games of all sorts—tug of war, baseball, battles royal, a badger fight, swimming contest, are the main features that keep the fun going.

Brill's band of 40 pieces will furnish music all day. A huge barbecue dinner, and watermelon feast in the evening, as well as a continual round of refreshments, are provided.

The Lufkin Foundry takes a great interest in the welfare of its employes—which is reciprocated and appreciated by them. This picnic is run by the employes, they and the company sharing the expense equally—a manifestation of the feeling that exists.

The company has had no labor trouble in fourteen years, even during the war.—From Lufkin Leader.

LUFKIN LINE LOGIC

Every dog has his day, but the dog with the sore tail has his weak-end.

Edison thinks college students are ignoramuses. Can it be that is the reason millionaires keep on endowing colleges?

The only American Book that has obtained extreme popularity in Europe, is the American Pocket-Book.

If there be two sides to the Irish question, the same individual never sees both of them.

The sense of touch seems to be developing at the expense of the sense of taste in Europe's suggestions as to the cancellation of the foreign debt.

Man may be the head of the household and yet may be merely a blockhead.

What is near-bier?

Having sunk the ships, now how shall we sink the world's floating debt?

It might be just as well not to kick about our coffee. The day may come when we shall all be cold and weak.

Marriage starts with billing and cooing. And the billing lasts.

Now we have scrapped the fleets, it might be just as well to scrap a few ambitions.

POST GRADUATE. A graduate from a correspondence school.

One good thing about rubber plants is that they are water-proof and require no watering.

Many a sweet pensive little girl grew up to be just expensive.

SPIRIT CONTROL. The physician. Formerly the butler.

It is not the rents that are tottering so much as those who are paying the rents.

The high cost of killing is getting to be as important a factor as the high cost of living.

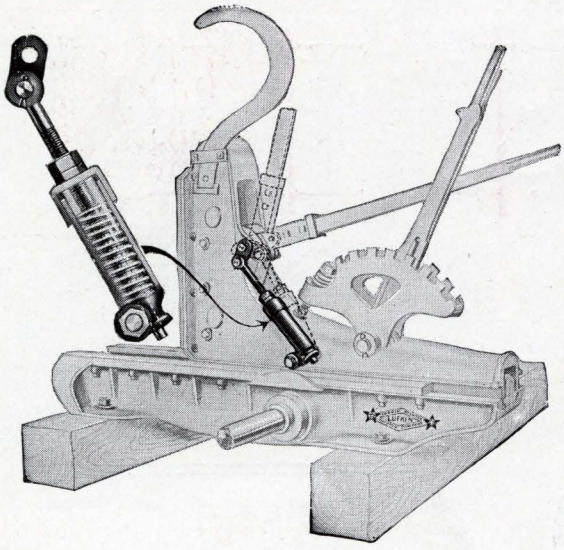

They say that Wood is fitted for Post in Phillipines. Why not?

The peacemaker is most blessed in the eyes of the underdog.

Don't give up the sip.

It is not the race but the streak that is the real yellow peril.
